
Chapter XXXII Part N – The Journey Continues With the 3 Axes of the Portals

Author : Meiliken

Date : 28-04-2021

Engaging the Clutch

The rich quartz vein reveals another huge nugget. The **420th YHVH (????)** in the Torah is located at “I am G-d (????????),” which initiates the **10** Utterances. The clear mirror indicates that this means that there are **1400 YHVH (????)** from this point on. The Essential Cube of Creation based on the number **42** with its central position **14** appears hovering before us. [Do not proceed unless you have read at least Chapter 32, Spherical Time](#). If you are ready, a whole new world awaits. The [Journey begins here](#) if you missed it.

Parsing the Essential Cube of 42

For the first time we are being shown that each of the **27** positions in the Cube and in the *Alefbet* is a fraction of the whole (**27**), as in $1/27^{\text{th}}$, $2/27^{\text{th}}$, $3/27^{\text{th}}$... and that the sum of this series = **14**. In case we missed its point, the clear mirror adds that this means that the central position is equivalent to the entire cube of **27**. Then when we multiple these fractional positions by their ordinal equivalents and take their sum, we get $(1/27 \times 1) + (2/27 \times 2) + \dots (27/27 \times 27) = \mathbf{256.666}$, as in **2⁸**, the value of the Ark of the Covenant (**256**) and the inverse of all the letters, words and verses in the Torah ($1/5^8$).

When we sum the fractional **27** positions (**14**) with the products of those fractional positions multiplied with their ordinal equivalents (**256**), we get $(\mathbf{256} + \mathbf{14}) = \mathbf{270}$, or $(\mathbf{10} \times \mathbf{27})$

Next, it shows us that each letter value assigned to its ordinal position from 1 to 900 is a fraction of the whole (1) and that the sum of $1/1$, $1/2$, $1/3$... $1/900$ is **3.140155**.... We obviously see the link to Pi (**3.1415**...) without prompting, but the clear mirror reminds us that Pi is integral to the **42**-Letter Name in multiple ways. The inverses of the **27** letters thus form a circle whose radius is **1**.

Another way to fractionize the **27** letter values is to divide each by **27** as in $1/27 + 2/27 + \dots 900/27$ for a total of **185** or $4995/27$. When we add these **27** fractional values to the **27** products of the fractional positions times their ordinal equivalents, **256.666**, we get $(\mathbf{185} + \mathbf{256.666}) = \mathbf{441.666}$ or *emet*, Truth, as in the Tower of Truth, the **20** stacked cubes.

Then when that sum of Truth, **441.666** is added to the first series it showed us, that of the **27** positions as a fraction of the whole, or **14**, we get $(\mathbf{441.666} + \mathbf{14}) = \mathbf{455.666}$, as in the **41** letters in the **3** aspects of *Ehyeh (????)*.

Suddenly, we see the alignment with the first **14** letters of the Torah and the Name *Elohim*

(?????) that has an ordinal value of **41**, and with the letters (????) of numerical value **455**. The Torah begins with **3** words of **14** letters.

It seems that the Inner Cosmos will not be content until we have learned all the necessary secrets and rites of passage to the portals of ascension.

We can now understand that the entire **27** letters of the *Alef-bet* were folded into a Cube that integrates with these aligned portals. The letters were not just folded in so that their **27** letters would work together, but so that each plane of each of the **3** axes would work out to exactly $1/3^{\text{rd}}$ the totals, as in $1/3^{\text{rd}}$ of **185**, $1/3^{\text{rd}}$ of **14**, $1/3^{\text{rd}}$ of **4995**, $1/3^{\text{rd}}$ of **378**, "His Name is One."

The order and placement of the letters in 3-dimensional space had to be precise. There had to be one specific arrangement of the **27** positions out of the possible **27!** ways they could have been folded up. Only 1 possible way in 10888869450418352160768000000 possible combinations.

The letters were not just folded in so that their **27** letters would work together and/or that their **9** planes would work together, but that each column and/or row in each of the **9** planes would add up to **42**, the real key to it all.

We should also ask ourselves how we were even possibly able to come across that one way. What did the universe and the inner Cosmos have to do to get us this Cube in this timely fashion? Why? What is the real power behind this Cube?

How likely is it that the sum of the digits in the 10888869450418352160768000000 possible combinations of the **27** letters is **107**?

The still small voice wants us to know that extraordinary feats of the folding of time and space and fields and realities went into the Creation of this singular Cube. Of the 7 billion people in this plane of existence, the singular Cube was placed in your hands.

Over millennia, the 5^8 elements of the Torah were sifted through by the most gifted tzaddikim, sages, and the greatest minds to find and organize the **112** Triplets (**336** specific letters out of **304805**) around the Cube for you.

Ancient secrets of the Universe, the Torah, the Triplets, and the **42**-Letter Name in particular have been guarded and preserved for generation after generation and now taught specifically to you.

Portals sealed and hidden from *all* since the moment of Creation have been revealed to *you*.

That is what is meant by being chosen.

Do not calculate other times. You were chosen in this time. Do not calculate other people; they were not gifted with the tools and knowledge, you were.

42 at the Center of it All

Maybe, we have been looking at this sideways. Yes, there is the **42-Letter Name**, the **42 Letters of the Name**, the **Name of 42**, the **42-Letter Sword**, the **Essential Cube of 42**, but what if **42** was not a Number, but the **Signature (Seal) of the Creator**?

As the **42-Letter Name** replaces the **Essential Cube of 42**, we are shown that the sum of the letter values, ordinal values, fractional ordinal values, fractional position values, and the product of the values times the positional values for all **27** letters is **(4995 + 378 + 14 + 256.666 + 4321.666) = 9965.333** or **7000** less than the sum of the **112 Triplets (16,965)**.

The still small voice whispers, "The Great Shabbat."

The Great Shabbat is the time period of *Moshiach*. It is the **7 Names Ehyeh (????)** found in the Torah.

With the **42-Letter Name** matrix now slowly encircling us we are reminded that **Pi (?)** and **Phi (?)** zigzag their way up through its **14 Triplets** like a double helix. We are then shown some new highlights. Illuminated before us as the matrix makes its slow sweep around us are the last Triplet of each of the **1st**, **4th**, and **7th** rows, **147**. Specifically, the same letters (??) are illuminated within those **1-4-7 Triplets**. Since each letter pair has a value of **490** or **(7 x 70)**, the **3** triple pairs total **1470**, or **10** times the age of Jacob (**147**). One of us shouts out, Glen no doubt, that the complimentary number to **147** is **853** or **358**. The Inner Cosmos does not disagree.

The ordinal value of each letter pair (??) is **40**, so the **3** triple pairs total **120**, or the age of Man (**120**), making the complete value for all **3** pairs **1590**. Scratching our heads, the clear mirror reminds us of the equation tying together the Fine Structure Constant (**1/137.035671756**), **Pi (?)**, and the sacred cubit:

$$\pi - (1/137.035671756^+) / 2750 = 3.14159000000000000000 = 3.14159$$

In terms exclusive to **Pi(?)**:

$$\alpha = 2750(\pi - 3.14159)$$

The still small voice whispers, "It's not the physics; it's where it comes from." We add, "And whose Signature is on it."

The number **1590** is just a more potent version of **159**, the 2nd Triplet in Pi and the gematria of "The World to Come, *H'Olam H'Ba* (????? ???)," and to make sure we realize the Creator of the Torah was aware of this, **159** is also the number of paragraphs in the final Book of the Torah. As the clear mirror points out, there are **670** paragraphs in the Torah, and with **91** in the first Book and **159** in the last, there are necessarily $(670 - 250) = 420$ paragraphs in the middle **3** Books, once again putting **42** in the center of it all, once again the flame (**42**) to the candle (**250**). We are flashed the **420** *YHVH* (????) through the **10** Utterances just to make sure we did not think that coincidental.

The clear mirror reminds us that the total value of the **7** Names *Ehyeh* (????) found in the Torah is **147** and that the universe was designed so that the field of the all-inclusive **42nd** Triangular Number would be **14147**, and that Shabbat (???), the **7th** day, is found **147** times in the Torah, while the **7th** Triangular number is **147**, Jacob's age, and that the numerical difference between the matrix' first line (????????), (**506**) and *satan* (**359**) is **147**.

This is interesting since we just learned that (???????????) and (?????????????) both have a complete value of **506**, as in "I am *H'Moshiach* and *Moshiach Ben David*, and since sandwiched between the **1st** and **4th** and the **4th** and **7th** lines are the consecutive letters that sum to **359** (???) on the **2nd** line, and (???????????) on the **5th** and **6th** lines.

The clear mirror further points out that each of these sequences end with the numerical value **107**: the sequence from the **2nd** line continues into the **3rd** (????), and the **6th** line ends with (??). In both instances *satan* is connected with the **107th** triangular Number, **5778** within the Signature of the Creator that defines and controls physicality. What is this telling us? Whatever it is telling us, it has been saying it since before time and physicality began.

The clear mirror goes further still and shows us that the **3** Triplet sequence (???????????) that adds up to **359** has an ordinal value that breaks up (?????????????) into $(81 + 26) = 107$, exactly like the values in the **2nd** portal, *Anochi YHVH* (?????????????). The illusion that guards the gate, and the Name that protects us from that illusion.

The 2nd portal, *Anochi YHVH* (????????), including the 420th *YHVH* (????), is found at the Smoking Mountain (?????) or (210 for “The Mountain” and 420 for “Smoking”). The clear mirror reminds us that we find the word *Ashen* (???) of numerical value 420 in both the 2nd line (?????) of the 42-Letter Name matrix and rising vertically in the final column of the same matrix (?????). It is the smoke of the 11 incense, as in the initials (??) of (????????).

Like the singularity of the Essential Cube of Creation, so too is the arrangement of the 42-Letters.

On the surface this connection to the event horizon of 5778 seems like prophesy embedded in the 42-Letter Name, but it is far deeper.

Of those 1st, 4th, and 7th lines, the first (?????) and last (????) both contain letter sequences totaling 506, as in “I am *H’Moshiach* and *Moshiach Ben David*, and “unconditional love, *ahavat chinam* (???? ???),” the bread that sandwiches in the slices of *satan* like a Big Mac.

That the 1-4-7 lines of the 42-Letter Name Matrix align with the 7 Names *Ehyeh* (????) and the 147 mentions of the 7th day in the Torah is obviously by design, a design constructed before the advent of Creation. As we saw, 506 trumps *satan* (359) by 147, by tapping into the 7 Names *Ehyeh* (????). The 42-Letter Name matrix is no schematic; that is what the numbers are. The 42-Letter Name matrix is a cosmic processor and elevator. It works from below to above and is the only Name to do so, hence it must be in the center of our portals to engage the latching mechanism and begin the ascension.

The 3 Axes of the Portals

When the 42-Letter Name matrix reaches the middle or 4th level (?????) it has already attracted and destroyed the lower elements of *satan* in our desires and is now at the place of the will, *Ratzon* (????). The numerical value of this line is 704, which is why it was designed to latch onto and engage with the earth (????) of numerical value 296. Together, they equal 1000, or *Binah*. Once engaged, the 42-Letter Name matrix twists and becomes locked in. The Earth and what it presents is at the very center (??) of the 42-Letter Name and as we have previously been shown, it is surrounded by the seven planets (satellites): the Sun, Moon, Venus, Mercury, Mars, Saturn, and Jupiter.

The clear mirror shows us that the earth is a metaphor and that the complete gematria of the two portals together, *Elohim* (?????) and *Anochi YHVH* (??????????), is **296**, meaning the 3 planes (axis) are centered on the very center (??) of the **42**-Letter Name.

The clear mirror blesses us with deeper insights. As we have learned previously, the value through the center of the **42**-Letter Name between the (??) is 1833, as in the 1833 letters Samech (?) of value **60**. Now, we learn that the *atbash* of the **5** final letters is also **60**, while the *atbash* of David is **280**, the normal value of the **5** final letters, which are connected with the end of days, and the normal value of David is **14**, as in the center of the Essential Cube of Creation. Taking the process one step further, the clear mirror explains that $(296 + 424) = 720$, which equals $(1000 - 280)$, analogous to the **720.0**, **280.0** square roots of the **72** Triplets.

The earth, **296**, represents physicality. Once it is engaged with the transformational **42**-Letter Name, the **72** Triplets are ignited along with their **9** candles and flames. This all occurs in the bottom 2/3 of the **42**-Letter Name matrix. The **42**-Letter Name processes and nullifies physicality but properly engaged it can do much more.

The Zohar tells us that the Hebrew word (???) of numerical value **12** is representative of the **12** directions/edges/columns of the cubic *Zeir Anpin* which is the same level as the **42**-Letter. The clear mirror shows us that there are exactly **455** (???) in the Torah, as in the **41** letters in the **3** aspects of *Ehyeh* (????). We are again reminded that at the end of the first **14** letters of the Torah and the Name *Elohim* (?????) with an ordinal value of **41**, we found the letters (????) of numerical value **455**. The clear mirror takes it a step further and shows that the complete value of (???) is **24**, which means that the complete value of the **455** (???) in the Torah is **10,920**, exactly the same as the **420** *YHVH* (????) through the **10** Utterances. What we are being shown is that the cubic *Zeir Anpin* fits perfectly being the two portals, which is where the **42**-Letter Name fits in, propping open the two portals, at *Elohim* (?????) and *Anochi YHVH* (??????????).

The clear mirror adds that the *atbash* of *Ehyeh* (????) is **620**, as in *Keter*.

The two portals, while **107,000** letters apart in the Torah, are centered above one another in hyperspace, like a cross-hairs. As we just learned, the central line of the **42**-Letter Name forms the 3rd axis through the center, and together they equal $(704 + 296) = 1000$, *Binah*.

א
ל
אנכי-יהוה
ה
,
ם

The bottom 3 letters (???) of numerical value **55**, act as steps to the double Gates, while the value of the inner letters (????) is also **55**, pulling the letter *Hei* (?) into the center.

א
ל
אנכי-ה-יהוה
,
ם

With the **42-Letter Name**, there are a total of $(42 + 13) = 55$ letters in the **3 Axes** of the Portals, like the $(42 + 13)$ *Vav* (?) schematic in the *Shema* where we began our journey.

Now, the value of the inner letters (?????) is **65**, as in *Adonai* (?????), with a complete value of **112**, as in the **112 Triplets** and the unifications of *Elohim* (?????) – *YHVH*(?????) and of *Ehyeh* (?????) – *Adonai* (?????) – *YHVH*(?????). This **4-directional** placement of the **112 Triplets** in this critical position is further emphasized in the sum of the outer **4** letters (?????) plus the inner **5** (?????), which is **112**. The value **112** is also the *atbash* value of *Moshiach*.

The 112 Triplets and the 2 Portals

The gematria of the last **3** lines of the **42-Letter Name** matrix is **1375**: the Phi(?) angle (**137.5°**)

at the center of Spherical Time; the result of dividing the event horizon limit by **42**, $5778/42 = 137.57\dots$ or the height of the encasing pyramid by **42**, $5775/42 = 137.5$: and the **50**-cubit height (**1375**) of each of the Gates at the Future Holy Temple. Its corresponding measure is $(3000 - 1375) = 1625$, or *Binah* (**1000**) and *H'Keter* (**625**).

So, since the counter, or corresponding, space for the first **3** rows is **1378**, or *Binah* (**1000**) and "His Name is One," (**378**) and that of the last **3** rows is **1625**, the counterspace for these **6** rows in the **42**-Letter Name matrix is **3003** as in the value of the **11** Triplets of *Bereshit*. This means that **12** of the Triplets of the **42**-Letter Name matrix merge with the **11** Triplets of *Bereshit* to form **6000**, while the central line (2 Triplets) of the **42**-Letter Name matrix merge with the **7th** word (the Earth, **296**) within the **11** Triplets of *Bereshit* to form the final **1000** of the **7000**. The **7000** is also very much the **7000** in the **107000** letters, or **100,000** plus **7000**, or *Zeir Anpin* plus the period of *Moshiach*.

We also see that with the **11** Triplets of *Bereshit* surrounding the center of the **42**-Letter Name and the **72** Triplets merged into the same center, we have 3 of the 4 sets of the Essential Triplets aligned within hyperspace.

As we are warned that the opening of the Gates/Portals may now be imminent and inevitable, the inner cosmos shifts our attention back to the goings on within the Cavern of Perfect Numbers.

Stacked Integer Fields

The Perfect Numbers are numbers whose proper factors add up to the number itself. We learned that numbers were integer fields based on the number 1, and each of the factors in a Perfect Number is a separate integer-field group, stacked on top of each other. One of the interesting things about Perfect Numbers is that they include each other.

As Triangular Numbers, they all start with 1, then 2– 3 followed by 4 – 5 – 6; which thus forms the 1st Perfect Number **6**, built of **3** tiers. The next Perfect Number starts with the **3**-tier stack of **6**: (1; 2 – 3; 4 – 5 – 6) and continues: 7 – 8 – 9 – 10; 11 – 12 – 13 – 14 – 15; 16 – 17 – 18 – 19 – 20 – 21; and finally 22 – 23 – 24 – 25 – 26 – 27 – **28**, which terminates in the 2nd Perfect Number. There are now **7** tiers and hence the **7th** Triangular number, **28**.

1
2 – 3
4 – 5 – 6
7 – 8 – 9 – 10
11 – 12 – 13 – 14 – 15
16 – 17 – 18 – 19 – 20 – 21
22 – 23 – 24 – 25 – 26 – 27 – 28

It is the nature of Perfect Numbers, as they are the sum of their proper factors, to have a highest factor that is equal to exactly half it, at least for even Perfect Numbers, and so far, no one has found an odd one. This means that the first few highest factors are **3, 14, 248, and 4064**, which is what the still pool was showing us. When we ponder perfection, we should only think of perfection. Perhaps, that is why He placed these unicorns in this cavernous zone. Perfect Numbers stand out as peaks of perfection, but on closer inspection we were shown that it is their highest factors that were their peaks and that these were representations of the cosmic and hyperdimensional fields that define our existence. The clear mirror within the pool shows us that the word for “the field (????)” of numerical value **314** is found **50** times in the Torah and **333** times in Tanakh. Moreover, its ordinal value is **35**.

The **42**-Letter Name reappears and in the clear mirror we see that the complete value of “the field (????)” is **359**, replacing the value of *satan* for the 6 sequential letters of the 4th and 5th lines (??????).

The Perfect Number, **3550336**, floats up and then separates as **35-50-336**, completing the story told by its younger dimensional siblings. Does this existence we know as physicality actually exist without the Torah? Only in our minds, our limited minds. Without the existence of the Torah, is there any meaning to the Perfect Numbers?

Integer Fields

Just when we think that we could not be more honored and privileged or absorb any more secret and sacred knowledge, the clear mirror informs us we are about to go deeper yet.

The floor falls out from under us, literally, and we find ourselves floating in space within space, taken to another level like a dream within a dream or like another level of construct within construct as in Inception. Once this happens, though, our perception changes and we realize if this shift is possible then another higher shift is possible and another. We begin to realize that this *is* the nature and construct of the universe, and that in our physical avatars we may actuality have been on the lowest level, or one of them, since we also recall our studies on the **7** worlds below *Malchut* that feed off of it.

We also wonder if it was because of the understanding of the **42**-Letter Name that we were able to make this leap upward, just as Rav Brandwein advised us.

Nonetheless, here we are, floating in space amongst large bright spheres that represent units of 1. The clear mirror reappears and reminds us that we learned that all numbers are integer fields based on the number **1**. Like the structure of the *Alef-bet*, each field is layered from **1** to **11**, **111...111111111** with a total possible occupancy in that first field-layer of **45** units of **1**. We are surrounded by **45** spheres, which then fade away, yet we can still feel their presence, as if they have not gone anywhere.

The next layer up represents the 10's and it is layered likewise from **1**, **11**, **111...111111111** with a total possible occupancy in that field-layer of **45** units of **1**. Null fields are just empty space. It continues this way, in groups of **45** representing decimal places (1, 10, 100, 1000...) for every integer through infinity. In our world, this is the basis of base 10 mathematics. In the hyperdimensions, this is the source of understanding and a higher level of processing.

So, the sum of the first **9** integers is **45** and the sum of the first **10** is **46**, as in the value of the word “cubit,” the celestial measuring unit. One cubit is equivalent to one elevation.

One cubit is equivalent to one elevation, at each and every level. So, a Gate that measures **50** cubits is measuring **50** levels of elevation within the integer fields of Oneness as in the **50** Gates of *Binah*.

In Number Theory, there is the premise of summing the digits within a number and an equation and the Torah and Inner Cosmos have shown us repeatedly of the significance of these often unexpected outcomes. Now, we can understand the design and hyperspace reasoning behind them. The layered fields of Oneness are equivalent to the summing of the integers. For example, $10 = 1$; $28 = 10$, and $134 = 8$. In the case of 134, the layers are 1111, 111, 1 that total 8 (1's).

This makes the Triangular Numbers, sums of sums. So, the 4th Triangular Number, 10, is also 46 Ones, the cubit, and the 7th Triangular Number, 28, is also 154 Ones or 7 x 22 groups of One. Those groupings of 7 and 22 are interesting as they correspond to the 7 layers of the 7th Triangular Number and thus to “The Earth,” the 7th word and to *Zeir Anpin*. Through hyperdimensional mathematics those groups can be divided into $22/7 = 3.1428..$ or Pi (?), 28 as the 7th Triangular Number and most importantly 3142, the real reason the clear mirrors took us down this path of deeper and everlasting knowledge.
