
Frogs, Frogs and More Frogs--not a Freak Show.

Author : Meiliken

Date : 11-01-2011

Circus freak shows, usually include the world's tallest and the world's smallest, but Torah's longest and shortest is no freak show--it's very serious technology that can help greatly. The Second plague, frogs, is very special indeed. In our last article,

we showed how the word [frogs contains the hidden word birds, itself a code for angels.](#) Today, let's look at the **10** places the Torah describes the frogs swarming the Egyptians. In the middle of them the Torah makes a point of saying that they will be in the Egyptian's kneading troughs,

which in Hebrew is the only **10**-letter word in the Torah, matching the shortest verse in the Torah which we read a couple weeks ago, also **10** letters long: [Genesis 46:23, "And the sons of Dan were Chushim" \(VBNI DN ChShYM\).](#)

These all obviously have to do with the **10** sefirot (dimensions) of the Tree-of-life, but the word for kneading troughs, (VBMSHERVTYC) is very interesting. first of all, it begins with and (V) the **42**-Letter Name (ShMB) spelled out backwards (BMSH) and ends with the word Keter (CTR, the highest, crowning Sefira) backwards (VBMSHERVTYC)

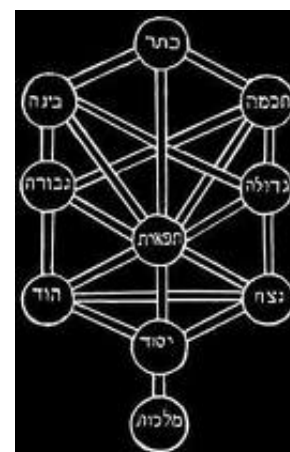

Similarly, the Name Israel in gematria atbash, leaving the central Resh (R) unchanged, transforms from YShREL to MBRTC or **42 - CTR** (keter) backwards.

The rest of the letters in the **10** letter word (**VBMSHERVTYC**) are spelling backwards, **YVEV**. We'll get to that in a moment but first we should note that this word is the **15th** in the verse and the total numerical value of this word is **985**, therefore **985 + 15 = 1000** (*keter of keter*), the full manifestation of all the *subsefirot* (dimensions, **10 x 10 x 10**) within the **10 sefirot**.

The rest of the letters in the **10** letter word (**VBMSHERVTYC**) are spelling backwards, **YVEV**, the masculine (or divine channeling) letters of the various Names of G-d., such as **YHVH** and **EHY H**. Notice that these Names have in common with **YVEV** the repetition of the 2nd and 4th letters--this pattern mimics the spiritual **4** phase process that Rav Ashlag explains in his [Ten Luminous Emanations](#) created the universe and still today guides our interaction with it. The [Zohar](#) reveals about the [Final Redemption](#) that it connects to the Holy name for Zeir Anpin, which is spelled name of **YHVH** in the form of **???-??-??-??**. When we removed the feminine or receptive letters (the **VD** of the letter **Yud** spelled out (**YVD**) and the two spelled out letter's **Hey** (**HE**), we're left with **YVEV**.

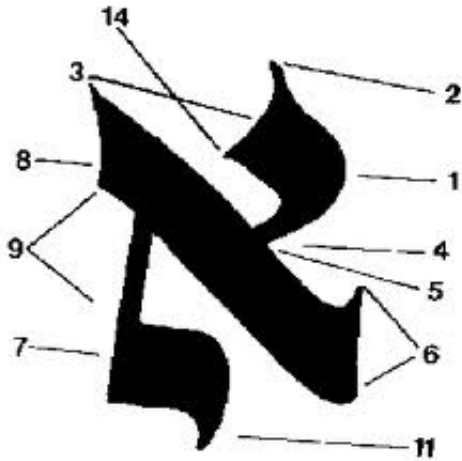

What's left over of this Name are the letters **???-??-??** which have numerical value **32** as the first **?** and last letters **?** of the Torah. Together they spell **??**, 'heart' with the numerical value **32**, connecting also the **32** times the word **ELOHM** mentioned in the story of Creation, and especially to the **32** Pathways that comprise the tree-of-Life.

Before we get back to the Torah's longest word and frogs, let's take a quick look at the Torah's shortest verse, and find that amidst the listing of the **70** Israelites who entered Egypt to begin the exile

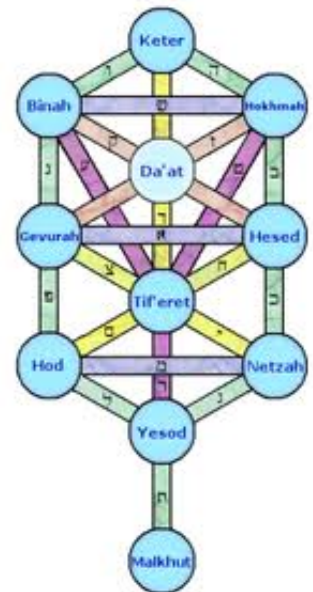

there, there is [the Torah's shortest verse, Genesis 46:23](#), "And the sons of Dan were Chushim" (**VBNI DN ChShYM**), and that similar to the Torah's longest word and also to the structure of the Tree-of-life, it is **10** letters divided into **3** parts (words), one of which is a permutation of Moshiaich (**MShYCh**). In fact, the verse contains the permutation of (**MShYCh BN DVNY**), or Mashaich Ben **70** since the last 4 letters have the numerical value of **70**. It could even be (**MShYCh BN DV - NY**), or Mashiach Ben David, NY.

We also find that both begin with (**VB**), whose spelled-out format (**VV BYT**) has a numerical value equal to **424**, that of Moshiaich Ben David. And moreover, that both include the letters that spell out the acknowledged initials (**VBMSH**) for "and the **42**-Letter Name). In this case the final letters add up to **1110** or **10** times Aleph (**111**) the first letter, and by design, the final plague, the killing of the first born, whose initials are (**MB**, **42**) begins at Exodus **11:1**.

The first plague, also of the life-flowing element water, is Dam, blood, of numerical value **44**. Frogs (Tzardim), the second of the 10 plagues is **444**, and the value of the initials (based on their first mention) of the first **9** plagues is **444**, the same as frogs. Why? For one, they are stem from the **4** letters of the YHVH and represent not just the 1st exile but all **4**--especially the **4th**--exiles; and two, because the plagues are all about the angels, the hidden code within frogs (Tzardim), and about rectifying and purifying the negative (anti-) Tree-of-life. This is why **444 = 4 x 111** (aleph). This is why the value of the

initials of the last 5 plagues = **358**, Moshiach. This is why the initials of the **11** words in all **10** plagues = **541**, Israel, and why the last plague's initials are **42, MB**, and also why there are **42** letters in the **11** Names of the sefirot in the Tree-of-life.

And it is probably why Obama is the **44th** President at this time and came in with the **111th** Congress.

It's time to recognize the signs around us, and to recognize those within us as well. Change occurs internally and manifests externally. Once we change, so to will our environment. The plagues didn't just occur outside the Egyptians windows, Torah makes the repeated point that they happened within the Egyptians homes.

Egypt (Mitzraim) means constriction in Hebrew, limitation. Don't make Pharaoh's mistake; don't harden your heart as times get tough. We need to soften our hearts if we want to experience

the world beyond limitations and illusions.
