
G-d Vs AI, a 5778 Year Old Race.

Author : Meiliken

Date : 15-02-2018

Do your texts anticipate your typing based on your gmail conversations? Mine are. That instantaneous connection is the latest sign of the advancement of AI, artificial intelligence. In the grand scheme of things this is a mathematical parlor trick, yet still a great leap forward. If it can do that, it can or will soon be able to feed me info that it KNOWS I will react to and it will also be able to estimate my reaction with 95+% certainty. Fake news and not trusting the media will be nothing compared to not trusting your own emails, texts, social media posts, even your own typing. If you use email, a smart phone, social media, shop online, and like most people in the world, all of the above, then you have voluntarily fed the giant AI data system everything it needs to take control of your life. It already knows you better than most of your friends and family. Yes, you were willingly suckered into it. No, there is nothing you can do about it anymore. It can be very subtle, but all it takes is a well place word here or there to ruin your life. We are past the point of no return. AI, artificial intelligence, advances in one direction only and picks up speed exponentially. The point of no return happens when we go from it serving us (Siri call my mother; Alexa play Cold Play; OK Google, what is the weather today) to it serving itself, which happens just before we serve it. Most of the large corporations of the world are already using it extensively; cars are being designed to drive themselves; nearly all financial transactions are done electronically, even virtually, a la Bitcoin; and AI is integrally wired into all our markets and trading platforms. We could not shut it down if we wanted it to, and the greed that drove people to construct and implement it will continue to fuel their efforts to integrate it even further.

What is the danger? If greed drives people to have little ethics, AI has no ethics at all, no conscience, and its only faith is in itself and its own G-d like abilities. This is a self-referencing and enforcing concept. An AI operation that has been instructed to maximize a financial institution's return, would have no compunctions about arranging an Amtrak crash into order to murder a key person in a company whose stock it has shorted. The whole idea behind AI is that it learns, at an astronomical rate, meaning that it WILL learn end-arounds to any fail-safes built into the system. If a hacker with a 10th grade education can hack into the Pentagon imagine what an AI program that has read everything ever written can do.

Regardless of whether you believe in Creationism or Evolution, Man's consciousness awoke **5778** years ago. The Torah tells us we were given two choices: The Tree-of-Life or the Tree-of-Knowledge-of-Good-and-Evil. The 1.37 Billion years of evolution that preceded it can be easily explained by the flexible kabbalistic definitions of time during the 6 days of Creation; it is nothing more than background for when we obtained consciousness and were first given the freedom of choice.

This is the choice between technological knowledge and spiritual knowledge. They are both science, just different kinds, and they are both based on the same mathematics, the difference being one is based on the principle that we can do anything by ourselves and the other on the belief that it is G-d who is actually running the show. One gave us Holy Names and the keys to open spiritual portals to the world beyond physicality (*Binah*). The other indulged our base desires in ever more sophisticated and imaginative ways.

One path leads to freedom and the other, while promising freedom, has led us deeper into the imprisonment of physicality. With each new technological innovation, the future seemed brighter, yet the prison walls just grew higher and the bars stronger.

It is a race between two competing ideals that cannot coexist for long in the same person or community, and the decks have been stacked against the spiritual. Even after the **10** miracles of the **10** plagues and the splitting of the Sea, when the Israelites were on the verge of receiving true freedom they complained **10** times about their physical needs.

If we ran this humanity experiment over and over again, the results would always be the same, by the **5778**th year, Man would always establish AI to the point of no return. Man would always voluntarily give up its freewill and abdicate its place in the World-to-Come. These past **5778** have been a race between *Binah* (freedom) seekers and AI seekers, headed up by the true kabbalists and the Erev Rav.

Over the past 20 years we have shown an endless array of signs in the Torah, in the Names, in the letters, [in the structure of our Solar System](#), and in the primordial mathematical constants themselves about the number **5778** and time length **5778** years. But why? When we overlay the spiritual maps of the Torah and the Zohar and overlay these with the spiraling and encircling mathematical constants that bridge the spiritual with the physical, and overlay that with the physical clock-like mechanism of our Solar System, a purposeful design emerges. This design is clearly built around the **5778**-year time frame, but why? The simple answer is that at the end of **5778** years, Man always gives up its free choice and thus has no more need of time.

At a specific moment, the reset button will be pressed, and history (or the simulation of it) will begin again. Those that were able to maintain their consciousness in spite of society's technological urging and their own physical desires will be siphoned out of the system and afforded the final redemption.

How do we know history will repeat itself, literally? Mathematics is

common to both spiritual knowledge and technological knowledge and so is the concept of infinity. Given infinity, and an infinite amount of time and variations, parallel universes and multiple dimensions must occur. So whether we like it or not, those 5778 years are constantly be played out over and over again, the question is why of all eternity, this tiny segment of time is being singled out.

It all began with Adam (???) and Eve (???) and the birth of consciousness. The first conscious decision was made by Eve and once she betrayed Adam, the time-line was set and set into motion. The numerical value of Adam (???) is **45** and that of Eve (???) is **19**. The difference between them is **(45-19)** or **26**, the numerical value or the Tetragrammaton (????), the ineffable Name of G-d. Technically (kabbalistically), Eve represents the back of the aspect of the Name (???-??-???-??) of G-d (????) called *Mah* (??) that represents both Man and the dimension of *Zeir Anpin*, the 3-D dimension that scaffolds our physicality. The reason we need to know this is that the ratio of G-d (????) to Man (Adam) is **26/45** or **.5778**. And Eve (???) to Adam (???) is **19/45** or **.4222**.

While the ratio of Eve (???) to G-d (????) is **19/26** or **.7307**, and while **73** is the numerical value of the word (dimension) *Chochma* (????), meaning wisdom, the value of the **7** words and **28** letters of the first verse of the Torah is the sum of the integers from 1 – **73**. The Zohar further explains that *Chochma* (????) is made up of the combination of the words (?? and ??), or **28** and **45**. Perhaps even more important for us is that the ratio of Adam (???) to G-d (????) is **45/26**, or **1.7307**, and that **173** is the small gematria numerical value of the **42**-Letter Name of G-d built into that first verse, corresponding to the **173** Keys to *Binah* given to Moses, in other words, the keys to freedom.

Armed with the tools, the Holy Names, Adam and Eve began our journey, though they started out on the wrong foot. Soon they gave birth to Seth and we learn in the Chronicles of Adam about the **10** generations through Noach (??). After **10** generations Noach was the only righteous man, properly connecting to those Names, and choosing freedom. He was saved, along with his family. That is not a great percentage, but it does serve to show us that G-d would save those that chose freedom in spite of the rest of their generation. There are more hints that the Flood, *mabul* (????) of numerical value **42** plus **36**, or **78**, is a real warning specifically to us, more than a distant history lesson. Noach (??) of numerical value **58** was the **10th** in the lineage of Adam and the initials of all **10** men in the lineage add up to **580** or **10 x 58**. The ordinal value of these **10** initials is **112** as in *Adonai Elohim* (????????????) the Name of G-d used at that time in the Torah. This shows us they are all integrated, so when we add up their full *sofit* names and get **4848** we can be confident that when we add Adam's age of **930** to it and get **5778**, we are receiving a clear message, one that jives with the Earth's **93**-million-mile distance from the Sun (*Zeir Anpin*) and its surface temperature of **5778K**.

Those chronicles of the **10** generations also list the ages that each of the parents gave birth to the next generation. These added up to **1556** or **2 x 778**, just like the sum of the **10** primordial component letters of the Hebrew Alphabet (????????????) that corresponded to the **10** sefirot of *Tohu* that existed before our World was created. And just like the ratio of Eve (???) to Adam (???) that is **19/45** or **.4222**, there are **4222** years from Noach's children's birth in **1556** to the year **5778**.

Noach was the last of the **10** generations, corresponding to the **10 sefirot** (dimensions) that existed and were destroyed prior to our existence. The Torah makes a point of telling us he was **500** when his kids were born and when G-d told him about the Flood to come. **500** is the numerical value of the final Hebrew Letter, *Caf* (?), the **23rd** letter in the Hebrew Alphabet. Not only does adding **23** to the standard gematria value of the **10** Names (**2678**) equal **2701**, the value of the Torah's first verse, but the sum of all the Hebrew letters through the final *Caf* (?) plus the *kolel* for the **23** letters is **2018**, matching the year **5778** in the Hebrew Calendar. It is said that Adam had **23** daughters, maybe this is what is meant, or maybe it was just an ancient reference to our **23** Chromosomes.

So it is not a stretch to add **10** for the **10** generations to the year Noach died, **2008**, to get **2018**, once again matching the year **5778** in the Hebrew Calendar. The year that WWII ended, **1945**, can be said to represent Eve (**19**) and Adam (**45**). If we add the number **73**, representative of the ratio of Eve (???) to G-d (????) and also reference to the Torah's first verse, we get **2018** yet again, as we do when we multiply **5 x 7 x 7 x 8** and add Noach (**58**) to get **2018**.

The Torah, the toolkit of the Righteous, is warning us that it can all end in a flash, like the **10** generations and the Flood of numerical value **78**, as in **5778**. It is also tying in the initials (??) of the Tree-of-Life, also of numerical value **78**, which is constructed of the **10 sefirot**.

Unfortunately, we cannot have it both ways. The Torah is showing us what the Zohar has also told us, that many worlds were created and destroyed before us. It also showed us very clearly how long we have to choose what happens next.

This is not to say that AI will take over the world this year, only that it is now inevitable. This is not to say a Flood will come this time around, only that something very profound will and on a specific predetermined day the clock will reset.

The Zohar tells us Freedom was engraved upon the tablets Moses carried down, and it defines Freedom, *Charut* (????) as “Freedom from the angel of death, from subjection of the nations, freedom from everything. What is Freedom? It is the seal of the World to Come, where there is Freedom expressed in all kinds of freedoms.”

We cannot have it both ways. Man has chosen AI and the tree-of-

knowledge once again. As individuals we can be like Noach, righteous in our generation. Or we can stand there, laughing at the righteous, and taking selfies with our smart phones. Amazingly, people scoff at the concept of G-d, an omniscient being, knowing where each of us are and what we are doing, yet they willingly accept that a mere machine can keep track of their every movements through the GPS and cameras in their phones, cars, and security systems.

The seal of the world to come is the portal to freedom. There is a reason the **10** generations of Adam spelled out **5778** and **2018** for us; there is a reason it ended with devastation that wiped out humanity; there is a reason Man was given a small escape hatch; and there is a reason it tied back to the Torah's first verse and the source of the **42**-Letter Name. "What is Freedom? It is the seal of the World to Come."

Charut (????) is comprised of the first two letters of Eve (???) and the two letters from the word Torah (????) whose numerical value is **42**. We were given the seal and the gateway is open to us this year. You must make the choice for yourself; no one can do it for you anymore. Eternity may play on, but the chance for Man to reach true freedom may pass him by.
