
Is G-d Just Having Fun With Numbers, or is He Marking Time, Waiting Us Out?

Author : Meiliken

Date : 15-02-2015

Does G-d do anything meaninglessly? If we wanted to get into a whole other discussion, we could and would argue that nothing in our lives is meaningless, especially not in these days. Nonetheless, the article is about something bigger, much bigger.

As previously advised, the Israelite exile in Egypt lasted **210** years from 2238 HC to 2448 when the Endless Sea was crossed and the 10 Commandments (Utterances) were given at Mt Sinai. These **210** years correspond to the **210** levels of [Joseph's Pyramid](#) and alternatively, to the **210** mir (secret or ancient) cubits of **27.5** inches each that the Pyramid is in height. From that moment in time (2448 HC) to the construction of the First Holy Temple in 2928 HC there

were **480** years, which is equivalent to that same height of the pyramid measured in feet. Those self-same **210** cubits equal **5775** inches, and this year in the Hebrew calendar, **5775 HC** is the year 2015 CE in the Western one, 3 years before the [prophetic date for Moshiach](#) consciousness in the world and geula (final redemption).

[The ancient cubit is derived from the expanded four aspects of the ineffable Name of G-d \(????\)](#). The base of the pyramid in feet (**756.25**) is, as it turns out, precisely the square of the measure of this cubit in inches, or **27.5²**. Using this secret (ancient) cubit measurements for the height and the base we get **210 + 330 = 540** plus 1 for the *kolel* = **541**, the gematria of the name Israel.

Also there were, as is well known, **12** tribes of Israel and **12 x 27.5 = 330**. And of course, there

are **12** inches in a foot. Now the difference in the base of the pyramid and its height in inches is once again precisely **3300** inches, or **120** cubits, and Moses, who was somewhat instrumental in the Exodus from Egypt and leading the Israelites to the Promised Land, lived 120 years.

And as we wrote about in "[The Real 5 Books of the Torah: Dimensions Beyond.](#)" **120** years is the length of our generations, those from Moses on, for as the Torah says in Genesis 6:3 "God said, 'My spirit will not continue to judge man forever, since he is nothing but flesh. His days shall be **120**'." And since there were **26** generations delineated in the Torah from Adam until Moses, with an average of **91** years each and since according to *chazal*, Moses lives on (reincarnates) every generation, he would live another **120** years **27.5** times. This gives us an average of approximately **107** years over **54** generations--analogous to the **54** portions of the Torah--to **5778**, since $5778 = 54 \times 107$, all the more remarkable since the sum of the integers from 1 to **107** is **5778**.

There's no question as to connection between Joseph's Pyramid and Biblical dates, the Name of G-d and as you can read in our [prior articles](#), the terms *H'Mashiach* (the Messiah) and *Moshiach Ben David*, but the question is *WHY*?

Could it have to do with the manifestation of the Future Holy Temple within the next 3 years, **3330** years after the Exodus? Did G-d want to set this all in stone for us as well as in paper (the Torah). And why are we just deciphering all this now?

The answer to the last question is pretty important, yet self-explanatory: Knowing the dates for [G-d Calendar](#) and the final redemption would have been counter-productive in any other generation. Only we (as a society) have the technology to grasp it and the urgency to do something about it.

By the way for those that like numbers, as G-d seems to, the [logarithm](#) for 600,000, as in the 600,000 Israelites, who were at Mt Sinai **3330** years ago, is **5.778**. Also, there is one more pyramid equation who my friend Zechariah will appreciate: If we add all the 3 different measures of the bases of the Pyramid ($330 + 756.25 + 9075$) and all those of the height ($210 + 481.25 + 5775$) plus **42** for the [42-Letter Name of G-d](#) that unlocks all things and all mysteries in the universe, we get 16,670, or **3330** shy of **20,000**. The spelled out number twenty (**20**) has the numerical value of *Keter*, the highest and crowning dimension of G-d, which is why it's used as such repeatedly in the Torah.
