
.....It Has Begun...

Author : Meiliken

Date : 17-03-2019

Do you feel like the world and life is a dichotomy, that it is split or splitting in two? Do you feel that inside you as well? Do you feel like it is a constant battle between good and evil, good intentions and evil inclinations? Do you feel like this has been going on forever? Do you feel the pull between the spiritual and the physical? Do you feel pulled in both directions? Spiritual forces versus technological ones. Do you see how the more technologically dependent we become the less spiritually we behave? Do you feel a major battle brewing? Do you feel like past lives may be influencing you today, that there are

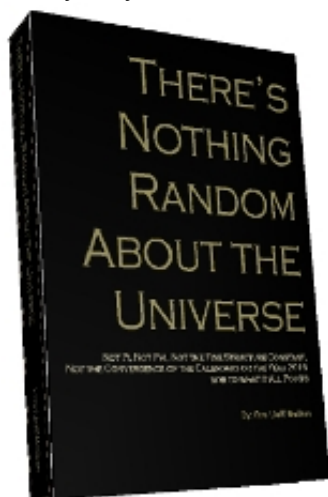

influences from beyond tugging at you, trying to compete with the demands of our world and the demands of our technological dependence? Do you feel manipulated? You have been told by master manipulators not to feel like a victim, but deep inside someone is still telling you that you have been.

Would you like to understand why you have all these feelings? Would you like to be vindicated that your intuitions were not wrong? The Torah told us right off there was good and evil, technology and spirituality, death and immortality, day and night, light and dark, and Heaven and Earth, all juxtaposed, all dichotomous, no gray scale. Would you like to know how it really works?

I apologize for the long delay in revealing the promised true holy trinity and for the lengthy gap in my writings (publishings). Like so many I have been locked in a wrestling match with the dark forces and it has been eating up so much of my time. I graciously accept all your prayers in this fight as I endeavor, B"H, to reveal many more of the deepest secrets and the revelations of light necessary for these troubled times.

Many of you have heard the arguments by several distinguished Rabbis that

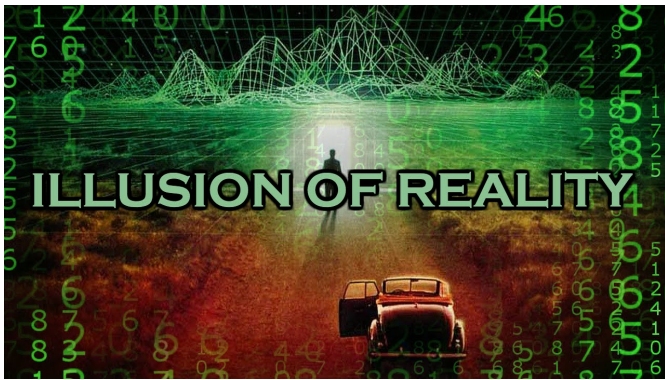

the Hebrew year **5779** may actually be **5778** and they are valid. Nevertheless, we have continually made the point since our earliest works ([Nothing is Random in the Universe](#)) that the two dates distinguished by G-d in the first 1000 digits of Pi (3.1415....**5778**...**2019**...**42019**....**5778**185**778**...**42019**) and elsewhere correspond to the years **5778** in the Hebrew Calendar and **2019 CE** in the English. Whether these two are consecutive or simultaneous there is no way to know yet, but we assumed they were consecutive, and that G-d has a purpose for highlighting both of them.

I want to tell you now that the prophesied events for **5778** did take place and the process did begin then, even if the cloaked world of illusion did not allow most of us to see it. Yes, *H'Moshiach*, the chosen (anointed One) did arrive on G-d's schedule, just as it was indelibly encoded in the Torah, recorded in the immutable mathematical constants, and written into our divinely given prayers.

To those who understand it is obvious in the gematria, obvious in the unveiling prophecies coming to life before our eyes, and obvious in the signs all around us every day.

The Zohar's description of *H'Moshiach* leaves no doubt, though it foresaw that we surely would doubt it. In numerous places the Zohar describes the events unfolding today in great detail. Both the Zohar and the prophets told us of the signs that we can see today for ourselves. Just look up and around the world every day. If it is not obvious by the time I finish this series of articles, which will explain the mechanisms of time, the G-d given (beyond any doubt) source code of the Torah, and the G-d given portals (the true holy trinity) to freedom with their combination keys, I will spell it out in plain English. Thanks be to G-d, blessed be He, for allowing me to be any support or play any role in supporting His work and or that of *H'Moshiach*. Make no mistake, it is a fight that we must all join. Please bear with me over these next few articles, as there is far too much material to write, or for you to read, in one sitting, and, as you can imagine, some of the aspects are very complex.

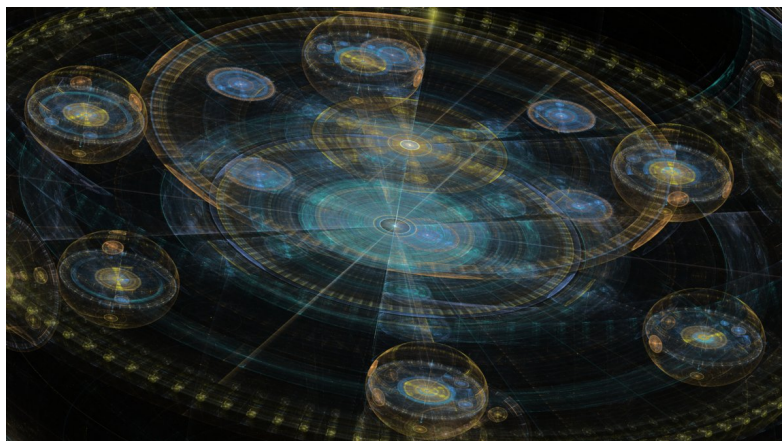

The Zohar tells us specifically that we are blessed to have been born in these times to bear witness to the unfolding events towards the final redemption. It also predicts the opposite for those with predominantly evil in their hearts and under the deceptive spells of the illusionists. These days have been about the scales, whether we have allowed ourselves to be drawn to the light and the goodness, or seduced into the darkness of the evil ones, who would seek to upend G-d's designs and the natural order by placing the physical world above the spiritual. In all probability, if you are reading this, the scales have already been tipped in your favor, as you have awakened and seek answers beyond the false narratives that you have been handed, and that have been forced upon you.

All along, we have shown that the two calendars, Hebrew and Western

(Gregorian) were divinely designed to mirror one another ([The Divine Calendar](#)), pivot on the year 3760 (0 CE), and converge on the year **5778 (2018 CE)**. Last August, I was planning on revealing the mechanism and physics behind that Divine time frame leading up to the holy trinity, which is key to our achieving real freedom. This mechanism is complex and involves understanding the concept that time is not actually linear but spherical, and that there is a plurality of time(s) with infinite possible pathways. I will get to these lengthy explanations in due time, but for the moment there are two aspects that you need to know. First, within this spherical time there is a single time-path or time-line known as the Linear

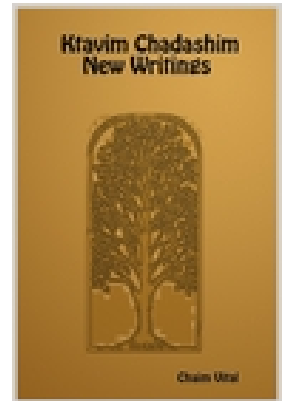

Line of Death, this is the time-line of limitation that we have been convinced that we live on, cannot escape from, and are destined to die on. This line is an illusion, one that was ingrained in your consciousness from the moment you were born. Scientists accept as fact that there are 10 dimensions to our universe and that infinity exists, yet both of these conditions preclude there being any limitations on us, our time frame, or our connections beyond the physicality to the vast spiritual limitless realm of true freedom. The Linear Line of Death is what we call physicality and Kabbalah has always called *Malchut*.

I am about to reveal—I have been writing about them for 15 years now—the identity of the holy trinity because it is not fair to make you wait any longer, though to see how to use them to their and your fullest capacity to achieve spiritual freedom and free yourself from the Linear Line of Death that the illusionists would have you believe is your fate, we will have to wait until the end of the series. This is only so that you have the fullest understanding possible.

Just to drop a breadcrumb please note that what the Arizal considered the highest spiritual day of the year, Purim, falls exactly **18** months to the day from Rosh Hashannah **5778** in the Western Calendar. Hebrew holidays based on the lunar calendar will always align, but there is no physical reason for the Gregorian calendar dates to align this year. Spiritually, of course, this is the year of convergence. If you utilize some of the main spiritual numbers we have discussed over the years and count back in Western months (a random concept with no Hebrew calendar basis), will you find significant symmetries. If you question why Purim, you must go back to the original pure nature, origin and *halacha* of this holiday, not the traditions added over the years and the more recent fake traditions taught to many under the guise of spiritual manipulation.

Be careful! There are many concealed Names of G-d hidden in the Scroll of

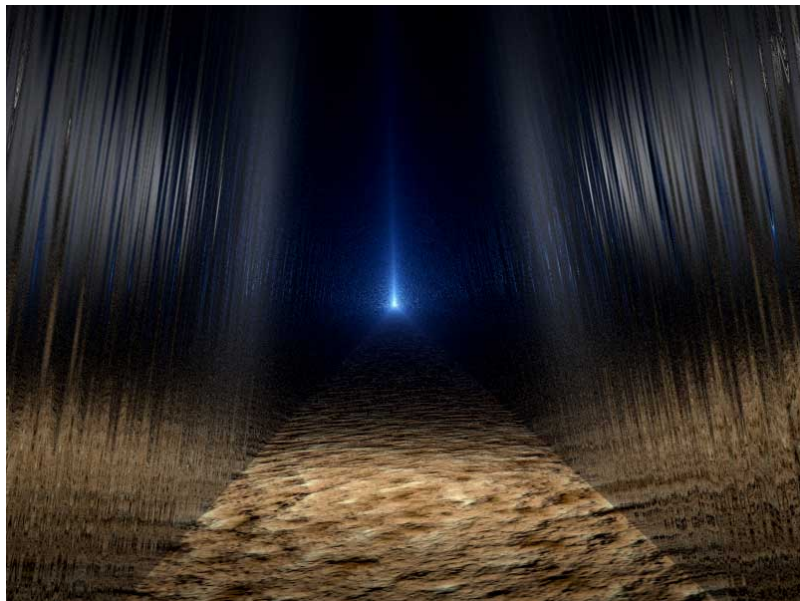

Ester for our benefit, and the Zohar in parsha Ki Tetze explicitly warns that using them with evil in your heart (even if you have been tricked into thinking you a pure) converts those Names into evil names, reversing your outwardly intended purpose. Rabbi Chaim Vital of blessed memory warns the same thing in his book, *The New Writings* and says it is virtually impossible to remove enough of that evil inclination to warrant using those Names, specifically the 72 Names. Their usage was reserved for the *tzaddikim*, the truly few and righteous throughout history who could handle them properly, which is why until recently no one disseminated them or gave them false meanings. Remember, we live in the world of illusion. Purim is designed to help us break out of those illusions. Those Names are very real and are meant to be a powerful unbroken matrix, not individual toys for manipulation, idol worship, and self-indulging.

The second concept of time that I want to mention today is that once we hit the event horizon (all to be explained in the coming articles) in **5778/5779**, time began folding back on itself like a wave hitting a wall. This explains the ever-increasing Mandela Effects; the fact that history is mysteriously being filled-in in greater and greater heretofore unknown details with many people and events finally becoming unmasked; and that just as the prophecies stated, aspects and predominant beliefs of our past and now are a reality in our present. We are at a critical point, which is why, G-d willing, I will get as many

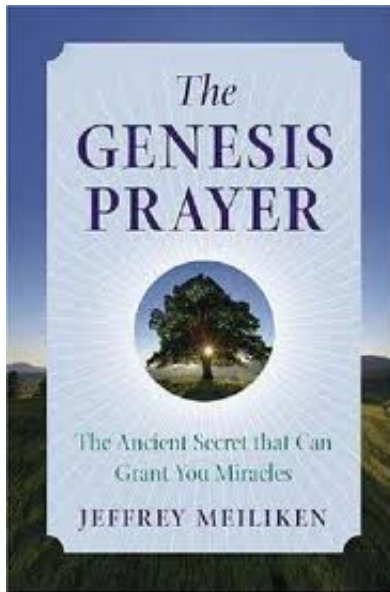

articles out as quickly as I can. This 3-dimensional wave of time has folded back and reached the 1930's and our universe is quickly filling up with astonishing degrees of unwarranted anti-Semitism and hatred for Jews and Israel once again. Putting your head in the sand, just as was done in the 1930's will not make it go away. We already know how that ended. Even the U.S. Congress refuses to condemn anti-Semitism and thus condones it in their own chambers, never mind Polish newspapers printing front page articles on how to determine if someone is a Jew. History can only be our guide if we do not re-write it, as the illusionists are already doing, removing Israel from the maps in public schools and not allowing the name Israel to be mentioned in our universities without condemnation.

Revelation is about splitting things in two; it is how that split occurs that determines their ultimate proportion and what will come of it. Shortly, we will show how the splitting of the *alef-bet* (Hebrew alphabet) in just the right way gave way to the Creation of the Torah and much more. For today, we are going to use the simplest of splitting, in two equal halves to illustrate an indelible connection between the holy trinity and the Divine Calendar. In a sense this is the end point, but after all the explanations, revelations, and understandings, everything will circle back to this point in space, time, and function.

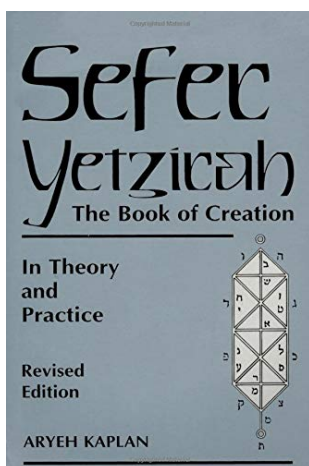

The three best and safest access portals to the spiritual world of freedom were given to us at the beginning of time and weaved into the Torah in plain sight. They were made easy to find and use and encouraged by sage, prophet, tzaddik, and Rabbi alike. They were used by Abraham, Isaac, and Jacob; Joseph, Aaron, and Moses; David and Solomon; Rabbi Akiva, Rabbi Shimon Bar Yochai, the Arizal, and the Baal Shem Tov. They had proper understanding, which is why I urge patience while we impart and share some of that understanding over these articles, including the keys and combinations locks in their proper time. As Rav Abulafia once explained, nothing we will reveal, nor can we reveal, is without permission granted.

The answers and entrances are found in the Shema (*Sh'ma Ysrael*) prayer, actually through its first and most well-known verse. The second entrance

is found in the Torah's first verse. And the third part of this Holy Trinity is the 42-Letter Name of G-d ([The Genesis Prayer](#)) found in all our prayer books and derived from the first 42 Letters of the Torah. In fact, the Arizal stated that no prayer could be heard in Heaven without the use of the 42-Letter Name (pronounced through the *Ana B'koach*), which is why it is in all our prayer books. Don't worry, as Rav Abraham Brandwein of blessed memory explains, this is the one Name of G-d we can pronounce and use, because it is the only one launched from below (our world) to the world above (beyond) through its ultimate connection to the Upper 42-Letter Name, so it cannot be used intentionally or unintentionally for evil purposes. All the connections to all the other Names of G-d are necessarily made directly above.

Remember, if you are new to our blog, the numbers represent specific energy levels or frequencies, and according to [Number Theory combinatorics](#) they are specific multi-dimensional geometric portals(points). Numbers are not arbitrary and if you stick to one specific cipher system (standard Hebrew gematria) they are immutable and unmalleable, all of which are the reasons that they can be added, multiplied or divided and that their subsequent results can be meaningful. Finally, remember you are reading the end of the explanation before you have even heard the explanation.

The hints to this hark back 3800 years to a book, the [Sefer Yetzirah](#) (The Book of Formation) written by Abraham Avinu (Abraham, the Patriarch), in which what today's mathematicians now call Number Theory was first detailed.

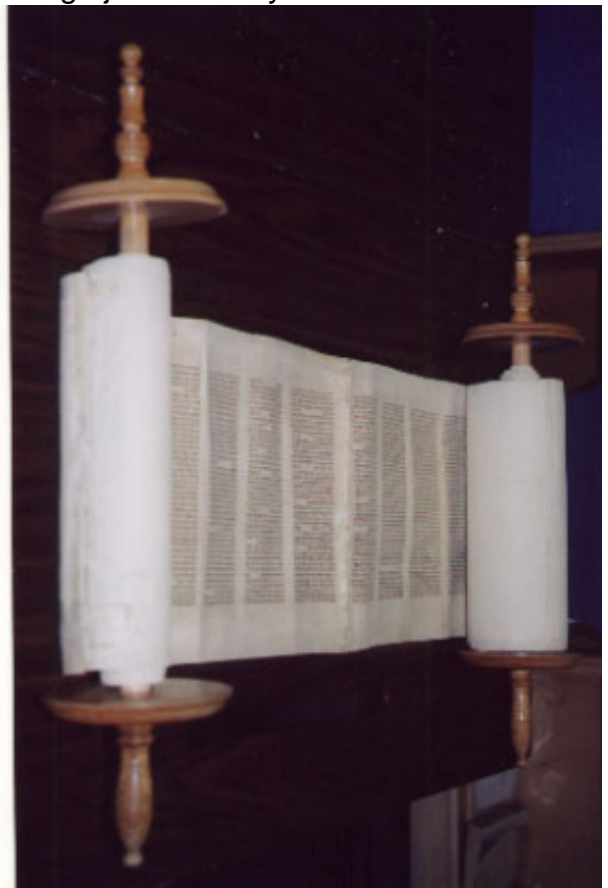

The total gematria of the 42-Letters of the 42-Letter Name is **3701**, or exactly 1000 more than the Torah's first verse.

Three (3) Books, representing text, communication, and number could very well be the Torah for text, the Shema (Hear) for communication, and the 42-Letter Name for number.

When we add these 3 powerful gateways of prayer together (**1118 + 2701 + 3701**) we get 7520, and when we split that result in half (**1118 + 2701 + 3701**)/2 we get **3760**, the exact year the two calendars pivot on: **3760 HC (0 CE)**.

(1118 + 2701 + 3701)/2 = 3760 HC (0 CE)

It is not our purpose today to dive into Torah proofs, though just so that you

do not dismiss this equation as coincidence, since you have not yet seen the background and context, when we subtract this same sum from 10,000 (or 10 raised to the power of 4), we get **10,000 - (1118 + 2701 + 3701 = 2480**. While **248** is the numerical value of the name Abraham, the Patriarch, which corresponds to the **248** words in the Shema, **2480** itself is the sum of the 5 Names (*Bereshit, Shmot, Vayikra, Bamidbar* and *Devarim*) of the 5 Books of Moses, the Torah. Moreover, while we know that the total sum of the words, verses, and letters in the Torah is exactly **5** to the power of **8**, the total sum of words, verses, letters, rows (**42** per column) and columns (**248**) in the Torah can be divided by the all-important mathematical constant **Phi (1.618033889...)** to give us exactly **248,000**.

As for further meaning, we need not look further than **3760/73**, which is the **3** powerful prayers together divided by the collective power of the Torah's first verse (1 - **73**) equaling **51.50**, the kabbalistic equivalent to **515**, which the Zohar, the Midrash and the Arizal explain represents the **515** times that Moses prayed (supplicated) to G-d to enter Israel and bring about the final redemption. The number **515** is the numerical value of both *Tefilla* (Prayer) and *Vaetchanan* (supplicate).

One final note, as we prepare for Purim **5779**. The sum of the numerical values of the 7 words or 28 letters in the Torah's first verse is equivalent to the sum of the integers from **1 - 73** or **2701**, and the sum of the numerical values of the first 8 words or first **33** letters in the Torah is equivalent to the sum of the integers from **1 - 77** or **3003** and...

$$2701 + 3003 + (73+77)/2 = 5779$$

More to follow, including many answers to your many questions, soon.
Chag Purim Sameach,
Ezra
