
Mashiach Ben David and the Ana B'koach

Author : Meiliken

Date : 25-12-2008

The numerical value of *Mashiach Ben David* is **424** and the ordinal value of the letters in *Mashiach Ben David* (MShYCh BN DVD) is 82 therefore the complete numerical value for *Mashiach Ben David* is **506**, which is not only the numerical value of *Ahavatchinam* (unconditional love) but is the numerical value of the first line of the the **42**-Letter Name (the Ana B'koach) which we know from *chazal* bring us miracles and is directly associated with bringing about the *geula* (the final redemption).

The value **506** is also found in **3** sequential groupings amongst the last **7** letters (**KShKVZYT.KShKVZYT.KShKVZYT**) of the **42**.

And **506** is also the exact number of Torah occurrences if the 14 sets of triplets within the **42**-Letter Name.

Moreover, while there are **426** phrases in the Torah that have a numerical value of **506**, there are **387** of the them within individual verses. And while **426** is close enough to **424** to draw a connection, **387** is the exact numerical value of the 3rd line (NGD YCSh) of the **42**-Letter Name. And the location of the first phrase to total **506** is Genesis **3:14**, :YhVH Elohim El H"NChSh" which because the final word has the same numerical value as *H'Mashiach*, the phrase can read, "The Lord G-d [said] to the Messiah."

The number **314**, the mathematical constant Pi is integral to the design of both the Torah's first verse and independently the **42**-letter name. One example is found when we divide the number **9** by the small gematria of first line of the Ana B'koach (ABGYTZ), which has a value of **506** in regular gematria, since $9/.123049 = 73.141593$, extraordinarily close to Pi **3.14159265358**.

And while this is amazing, we further connect the dots with the 3rd verse of the *Ana B'koach* (NGD YCSh) that permutes to (ShDY CNG), which is *Shaddai* (**314**) and **73**, the value of *Chochma* (wisdom) the 9th *sefira* (dimension) as in $9/.123049 = 73.141593$ once again. *Shaddai* (ShDY) is the Name of G-d found on every Mazuza and it helps protect our gateways, of which the *Ana B'koach* has **173**., corresponding not only to its small gematria but to what the *Zohar* explains are the **173** keys of Moses.

Now, as we explain in much greater detail in *There's Nothing Random in the Universe*, a cursory examination of the first 12 digits of Pi **3.14159265358** reveals 4 obvious sequences, when broken down into triplets, **314**, **159**, **265**, and **358**. **314** is *Shadai*, placed right in the gateway; **159** is the small gematria value of the upper **42**-Letter Name of G0d; **265**, is he combination of the Tetragrammaton (YHVH) of value **26**, and its pronounceable component, *Adonai*, of numerical value **65**; while **358** is the numerical value of *Mashiach*. But what makes this sequence even more telling is that the middle two triplets add up to $(159+265) = 424$, the numerical value of *Mashiach Ben David*.

But considering that we found the first **506** phrase at verse **3:14**, and $506 + 314 = 820$, the full value of the verse, Leviticus 19:18 paraphrased as "Love thy neighbor as yourself," we can see the love with which the Torah, our physical universe based on Pi, and the *Ana B'koach* were designed and embedded. Now all we have to do is connect to it.

The *Ana B'koach* and the Torah cannot be separated, one is integral and integrated within the

other and both are designed with the technology to help us bring about the the necessary transformations to bring *Moshiach*. So when the *Ana B'koach* is recited with the right *kavanot* (intentions) it is like reciting the entire Torah, and enveloping yourself with unconditional love. To those that know, it is the tree-of-life, and it can impart *Mashiach* consciousness.

To learn more about this, and to understand all the phenomenon concerning the Ana B'koach you should read *The Genesis Prayer*, published by St Martins Press.
