The Hakafot (Encircling)

Here is the secret to our universe. All spiritual light (energy) enters from a single point. It is spread outward to the **6** directions forming a cube. This branching outward is *Zeir Anpin*. It is singularly masculine energy. It is non-physical. During the branching or radiating outward, the energy goes through a **6**-step down process. This is also why the *Bimah*, the place where the Torah is read in a synagogue, is supposed to be **6** steps up. This is why males, who align with this energy, are the appropriate channels for this energy, and why they need to do the proper shakings of the **4** species in the *Sukkah*. For anyone that has not been following this series from its inception, you can find the [entire work here](#).

All **210** shakings (wavings at **42.5°**) must be done properly and completely and then they must be processed with a final step to transfer the energy into our world.

At the end of each daily shaking there is a special encircling that is performed, and at the end of the **7th** day there are **7** encirclings, making **13** in total, all with their special *kavanot*. Those **210** shakings/**13** encirclings gives us a ratio approximately equal to Phi(?) or **1.618....** Most congregations do not shake the **4** species in the *Sukkah*, and of those few that do, most do not shake on Shabbat. I was *gabbai* and announcer for my Rav, may his memory be for a blessing,

and on Shabbat we would lead about 200 men through all the shakings (without the physical species because that is prohibited) with the appropriate *kavannot*. He explained that the technology had to be completed. Now we can understand why. Time travels in circles.

This encircling process is necessary in order to transfer and manifest the energy drawn from the Point of Potentiality (*Binah*) through the 6 levels of *Zeir Anpin* into our world, *Malchut*. The circle is the vessel for the light energy of *Zeir Anpin*. The circle is feminine energy. The circle is the interface with the world of *Malchut*, a world devoid of its own energy. *Malchut* is the physical world. It is a world of illusion. Women, females, are represented by the circle and the circling. The anthropomorphic analogue of *Zeir Anpin* and *Malchut* is the penis and the womb.

The Zohar spends an inordinate amount of time discussing the spiritual male – female energetic dynamic as if its understanding was the most important of all. Because of who we are it is hard for us not to read sexual references and attractions into the spiritual metaphors whenever the terms male and female, masculine and feminine, vessel and penetration are utilized. The truth is that we are just reflections of spiritual, metaphysical, and physical processes that are yet to be understood. The trick is to read what we learn from the levels above and apply them here below, not the other way around, as we customarily do, inflicting our beliefs or the ones we are told we should believe by the main stream media and social mobs onto the metaphysical world.

The Torah provides hints to us in the meeting place of the Patriarchs and their future wives, or Matriarchs. When the women were first met, they were standing by the wells. And in the 40 years in the desert, it was Miriam who was in charge of the traveling well that provided water for all the Israelites.

The encircling we do, both men and women separately, on Simchat Torah and Shimini Atzeret on the 22nd day of the cosmic Holidays transfers the energy from the circling the men did in the Sukkah to our lives in this world and embeds it for the coming year, like the harvesting and storing of the crops typically done this time of year.

The process does not end there. Once

properly coupled, the radiant feminine energy must focus back on *Zeir Anpin*, which is why homes are typically cube shaped. The receptive feminine vessel must focus on building a household and reflect back on her source of light through *Zeir Anpin*. In this way the couple can draw the maximum amount of energy and their household can grow every which way, including in their individual and joint stature. If the circle of feminine radiant energy is too attracted to physicality or to other sources of light the circle will pull apart, break up, and energy will be inadvertently siphoned off into the physical world, draining the marriage, the masculine energy channel, and the household. This what the Adam and Eve story is all about.

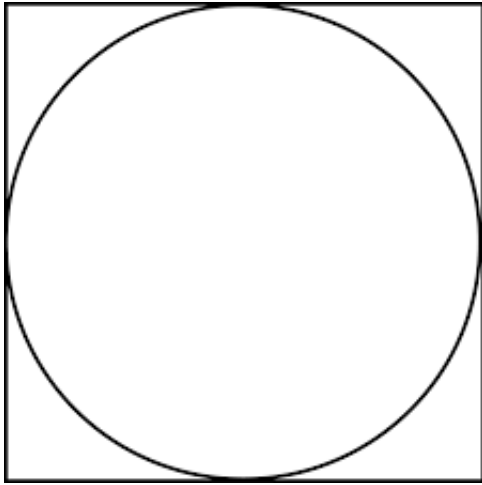

By circles, we mean to say spheres. The world of *Malchut* is all about circles, spheres. This is why the planets are round and their orbits are rounded. Circles and spheres are self-contained and can exist as beautiful bubbles in the world of *Malchut* without a masculine counterpart, but they will not be connected to the infinite light of *Binah*. Masculine energy cannot persist without a connection to the light source. Masculine energy that is connected to the light source but not properly coupled is a live wire and risks shorting out.

The world of illusion is designed to attract and tempt circles with promises of easy energy, but there is no real energy in that world. It is an illusion. Physicality only sucks energy; it does not share it. As the designed interface, feminine energy/vessels have a natural affinity for physicality, but masculine energy can be drawn to those illusions as well, and that is even more dangerous.

The cosmic window of Sukkot is a way to reorder and realign the natural flow of energy. The Holy Temple is the way to do it permanently. This is why the Holy Temple is designed in squares and cubes with no octagons, circles, or domes to short-circuit and cut off the energy, which would otherwise radiate outward to the edges of the spherical Earth.

What are round are the *sefirot* (spheres). The dimensions are spherical because they are vessels that house the different worlds (levels).

Squaring the Circle

The relationship between squares and circles and cubes and spheres is fundamental to our system; it is *Zeir Anpin* to *Malchut*, Heaven to Earth; and the program to the pixels. Our choice is to understand that there is a program, choose to be part of it, and then figure out how to best it. It is the choice that was given to Neo. The link to understanding the program, the link between the square and the circle is gematria, the simultaneous translation from *sepher*(???) to *sepher* (???), text to numbers, physical images to the coding. This is why the numerical value of the word “gematria” is **273**, and the area of the square around the inscribed circle is **27.3%** greater.

We have seen that the Torah is devised as a hypercube of 5^8 , as the number of words, letters, and verses (390,625) in it equal exactly 5^8 , and also that the word values (1024) in it, is exactly 2^{10} , which form the 2^{10} vertices on the 2^{10} hypercube. When we square the circle, the ratio of the 4-sided square to the circle is **127.3%** or **1.273** times. This is necessarily $4/\text{Pi}$. It is also clearly represented in the number of words, letters, verses, rows, and columns in the Torah: **401273**.

The difference between the **5** physical Elements of the Torah (**401,273**) and the **3** main physical elements of the Torah (**390,625**) is yet another cube, (**401273 – 390625**) = 22^3 , reflecting the **22**

letters of the Hebrew alphabet that are exponentially and energetically encoded to give us the gematria scale. This is why there has always been a prescribed set of blank rows in the Torah with explicit instructions to reproduce them precisely. The Torah was also designed such that this difference of 22^3 less the matrix of (248 columns x 42 rows) equals 232, the exact value of the 4 aspects of the Tetragrammaton.

יוד-הי-וי-יהי

יוד-הי-וא-יהי

יוד-הא-וא-הא

יוד-הה-וה-הה

One additional purposeful design note is revealed by the simple number theory application of the sum of the digits in $(401273 - 390625) = 42$.

Another purposeful design feature of the Torah is uncloaked by both number theory and a little known but most revealing gematria cipher in that the product of the digits in 390,625 divided by the sum of the digits in $390,625 = 1620/25 = 64.8$, while the product of the digits in (390,625 and 401,273) divided by the sum of the digits in (390,625 and 401,273) = $272160/42 = 6480$, or exactly 100 times the previous equation. If you recall, a similar application of this cipher applied to the Torah's first verse gave us Pi (3.14159...).

Some may look at the $272160/42$ equation and see references to the 72 Triplets (Names) and 216 letters in them with the 42-Letter Name and others may see a reference to the Moon's 2160 miles diameter.

These interlinking
equations are astounding and yet they tell only part of the story.

The Torah
equation is $(401,273 - 390,625) = (248,000 \text{ Phi}(?) - 5^8) = 22^3$

$$401,273 - 390,625 = 22^3$$

$$401,273 = 248,000\varphi$$

$$390,625 = 5^8$$

$$248,000\varphi - 22^3 = 5^8$$

$$22^3 - (248 \times 42) = \text{יהוה}$$

$$4 + 0 + 1 + 2 + 7 + 3 + 3 + 9 + 0 + 6 + 2 + 5 = 42$$

$$\frac{3 \times 9 \times 6 \times 2 \times 5}{3 + 9 + 0 + 6 + 2 + 5} = \frac{1620}{25} = 64.8$$

$$25 = \sqrt[4]{390,625}$$

$$\frac{4 \times 1 \times 2 \times 7 \times 3 \times 3 \times 9 \times 6 \times 2 \times 5}{4 + 0 + 1 + 2 + 7 + 3 + 3 + 9 + 0 + 6 + 2 + 5} = \frac{272160}{42} = 6480$$

$$6480 = 64.80 \times 100$$

The total number of words, letters, verses, rows, and columns in the Torah = $248 \times 10^3 \text{ Phi}(?) = 401273$. The total number of words, letters, and verses in the Torah = $5^8 = 390,625$. The difference between these two totals is $(401273 - 390625) = 22^3$ and $22^3 = 10,648$.

$$401,273 - 390,625 = 22^3$$

$$22^3 = 10,648$$

$$\frac{4 \times 1 \times 2 \times 7 \times 3 \times 3 \times 9 \times 6 \times 2 \times 5}{4 + 0 + 1 + 2 + 7 + 3 + 3 + 9 + 0 + 6 + 2 + 5} = 6480 = 10 \times 648$$

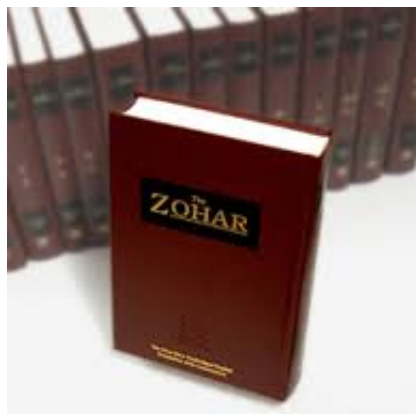

A Zohar Prophecy

Another possible reason for this confluence on **648** can be found in this excerpt from *The Divine Calendar*.

“Before Isaac was born, Abraham had a son with Hagar, his wife’s handmaiden. They were eventually cast out, but Ishmael was also blessed to become a Great nation and was the precursor to all the Arabs. Ishmael lived **137** years. With the fall of Cyprus, all the Mid-east was subdued by the Arabs in **648** CE, which corresponds to **4408** HC and to **28** A.H. in the Islamic Calendar.

This date is significant for many reasons. Firstly, they all end in **8**, as with so many (almost all) of our remarkable divine dates, but more of that later. Secondly, **28** is one of the very few key core Torah numbers, but more of that later as well. Thirdly, **4408** HC is exactly **1000** years after **3408** HC, when the Second Temple was

built. And fourthly, **137** times **10** is **1370** years—ten years for each year of Ishmael's life exactly as prophesied in the Zohar—and adding the **1370** years to the year **4408** HC gives us **5778** HC, or alternatively adding it to **648** CE gives us **2018** CE, with **2018** HC being the year of the Covenant of Abraham and Abraham being the father to both Isaac and Ishmael.”

The Zohar prophesied that the Arabs would reign over the Israelites for **1370**, ten for every one of Ishmael's **137** years because of his repentance before he died. On **December 6, 2017**, President Donald J. Trump announced the United States recognition of Jerusalem as the capital of Israel and ordered the planning of the relocation of the U.S. Embassy in Israel from Tel Aviv to Jerusalem. That was the **18** of Kislev, **5778**.

Given all the prophecies and convergences around the year **5778** we should reexamine the **5** fixed written divisions of the Torah: the **187** chapters, **670** paragraphs, **304805** letters, **79975** words, and **5845** verses. If we separate out the digits **5, 7** and **8** from them, we are left with (1,6,0,3,0,4,0,9,9,4), which sum to $(1 + 6 + 0 + 3 + 0 + 4 + 0 + 9 + 9 + 4) = 36$, while all the **5's, 7's** and **8's** sum to $(5 + 7 + 7 + 8 + 5 + 7 + 7 + 8 + 5 + 8 + 5) = 72$. Nevertheless, just as we saw in the revealing cipher above, the product of the digits divided by its sum $(1 + 6 + 0 + 3 + 0 + 4 + 0 + 9 + 9 + 4) / (1 \times 6 \times 3 \times 4 \times 9 \times 9 \times 4) = 23328 / 36 = 648$ exactly, again.

$$\frac{(1 + 6 + 0 + 3 + 0 + 4 + 0 + 9 + 9 + 4)}{(1 \times 6 \times 3 \times 4 \times 9 \times 9 \times 4)} = \frac{23328}{36} = 648$$

$$6480 = 648 \times 10 = 64.80 \times 100$$

Cosmic Circles

The Torah

equation begins with the squaring the circle.

On the other hand, the ratio of the area of a circle that circumscribes a square to that original square is $\pi/2$ or 1.5707963... approximately 1.57080. When we do the *hakafot*

we are doing the encircling within the *sukkah*, the circle within the cube.

This is an important distinction: *Zeir Anpin* must enclose *Malchut*, the square must enclose the circle, or parts of the circle will be outside the square and thus not receive the energy from upper worlds. In **5779** and **5780** that physical formula has been systematically reversed, and the energy and protection of the upper worlds is being cut-off. It has been going on for decades and has reached the tipping point, or break point and physicality is paying the consequences.

We must

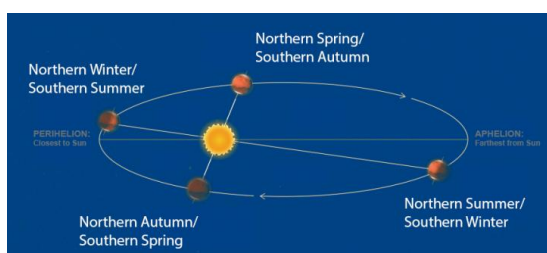

learn the cosmic system, which is the metaphysical pressure and field system along with its manifest physical attributes, and learn how to harmonize with it, as opposed to making up our own rules or trying to alter the universal design to our own agendas. Let us review how the cosmic system relates to the **27.3%** ratio of the square that is outside the circumscribed circle. We can begin with the gestation period of a human being **273** days and the human menstrual cycle that is **27.3** days.

Many

cultures believe feminine energy is tied to the moon. And since gestation and menstruation are decidedly feminine attributes, they must be right, because the ratio of the Earth's diameter to the Moon's diameter is 0.273. In other words, the moon is **27.3%**

the size of the Earth. Thus, the Earth metaphorically and metaphysically is *Zeir Anpin* to the Moon as *Malchut*. Moreover, it takes **27.3** earth days for the Moon to complete one full rotation with respect to the stars, and **27.3** days for the Moon to orbit the Earth. Circles and cycles. In this physical world, women and feminine energy are obviously tied to the Moon, and the Moon being **27.3%** the size of the Earth makes it equivalent to the part of a square that is outside the circle inscribed in it. The Earth is the circle and the Moon is the area around it within the square.

The Earth is the circle and the Moon is the area around it within the square. If you were designing the solar system you might draw it up that way 2-dimensionally and then extrapolate from there and it would work out perfectly. But if you were a meteor and you struck Earth and a part of it split off in a quintillion fiery fragments and over hundreds of millions of years coalesced in the Moon and settled into a steady orbit would your numbers have worked out so precise and harmonically perfect?

The Sun, on the other hand, is *Zeir Anpin* to the Earth, and ratio of the Sun's diameter to the Earth's is **4 x 27.3** times, mimicking the aphelion of the Earth's orbit around the Sun divided by the Sun's diameter, which is **4 x 27.3** million miles in diameter. Circles and squares.

The Moon to Earth ratio is **.273** and the Sun to Earth is **4 x 27.3**. And that ratio of diameters extended to the Earth and Moon together vs the Sun's is (**Pi x 27.3**).

Meanwhile, sunspots revolve around the Sun's surface in **27.3** days, and by the way we are only beginning to understand the relationship between sunspots, solar

flares, and solar minimums, on our weather, climate change, magnetic radiation belts, and our health. There is also **273** days from the summer solstice to the vernal equinox and **273** days from the winter solstice to the autumnal equinox, and **273** days from the end of Channukah to Rosh Hashannah. Cosmic circles.

We have to ask though, if the Earth is *Zeir Anpin* to the Moon as *Malchut*, and the Moon, whose diameter is **2160** miles, or **10 x 216**, the number of letters in the **72** Triplets, is the Earth related to the **42**-Letter Name? Does this relate back to the **272160/42** equation that described the Torah?

We began this section mentioning that the ratio of the area of a circle that circumscribes a square to that original square is $\pi/2$ or **1.5707963...**, which is true. What is also true is that if we take our square with a circle inscribed in it we get a ratio whereby the outer portion is **27.3%** of the total area, and if we subtract that area from the area occupied by the circle alone, we get an area of **.5707963** (57.07963%). Perhaps, this might be more recognizable as **5708**, the year Israel became a nation (1948 CE).

Universal Harmonics

There is a universal harmonic that someone wanted us to understand.

The Creator

of the Torah showed it to us explicitly and through basic quantitative encoding through the total of the **5** elements: **401273**. The Creator

of the Pyramid did too with the ratio of its height to half its base: **210/(330/2)**

= **1.273**. So did the Creator of the solar system with the ratio of the

size of the Earth to the Earth and Moon combined: **1 : 1.273**; and through

the ratio of the Sun to Earth: **4 x 27.3 : 1**; and through the ratio of the

Sun to the Earth and Moon combined: **27.3Pi : 1**. So did the Creator of the universe in that **4/pi**

= **1.273...** and **(4 - pi)/pi = 0.273...** and in the relationship of the **4-sided**

square to the inscribed circle **1.273 : 1**

$$\sum \text{words, letters, verses, columns, rows} = 248,000\varphi$$

$$248,000\varphi = 401,273$$

$$4 \text{ sided Square to inscribed Circle} = 1.273$$

$$\frac{\text{Pyramid Height}}{\text{Pyramid Base}/_2} = \frac{210}{330/2} = 1.273$$

$$\text{Earth}_d : (\text{Earth and Moon})_d = 1 : 1.273$$

$$\text{Sun}_d : \text{Earth}_d = 4 \times 27.3 : 1$$

$$\text{Sun}_d : (\text{Earth and Moon})_d = \pi \times 27.3 : 1$$

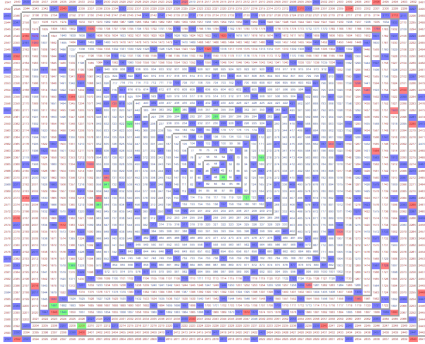

$$\frac{4}{\pi} = 1.273 \dots$$

$$\frac{(4 - \pi)}{\pi} = .273 \dots$$

Abraham showed

us too when he told us in the *Sefer Yetzirah* about the **10** sefirot of the Tree-of-life split down the middle, given that half of **546**, the numerical value of their **10** initials is **273**.

Stickiness

The Creator

of the universe wanted us to understand this harmony. If He wanted everything to be random, He would have made it random.

It is that simple. Let us be

frank. There is nothing random about our universe. There is a 50/50 chance that a coin flip will be heads or tails, but about a 70% chance that the answer will

be part of a like series of HH... or TT... of any length. That is stickiness or

clumping and we observe it all around us in the universe. If you observe the traffic

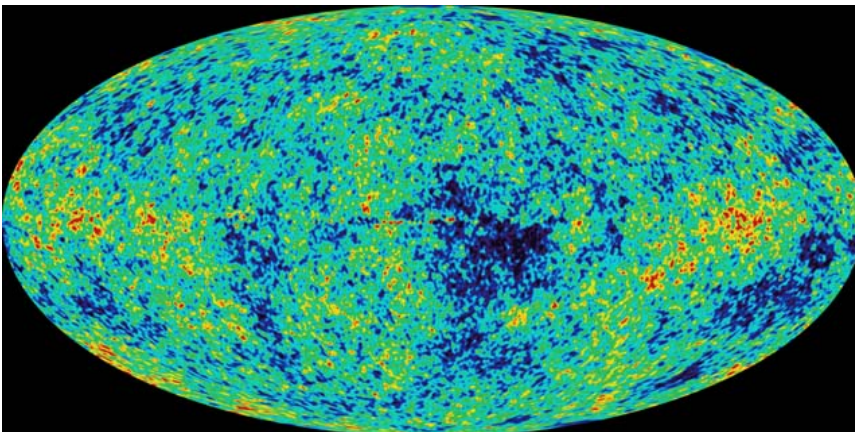

flow on our highways you will notice that after a certain saturation point the

traffic slows and clumps up for no particular reason then speeds up and

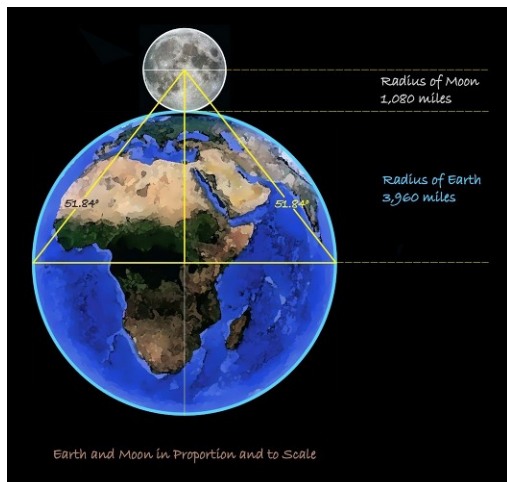

separates again for a while before repeating the pattern all over again. This clumping is seen throughout every corner

of our universe in every medium we have analyzed with huge and small void and

tightly packed clumps of matter or radiation and it has nothing to do with gravity.

7 Harmonies

The Creator

of the universe wanted us to understand this harmony. If He wanted everything to be random, He would have made it random. Instead, He made the sum of the Earth's radius and the Moon's radius together equal exactly **7!**

miles or $(7 \times 6 \times 5 \times 4 \times 3 \times 2 \times 1)$, which is **5040** miles. He also made the difference between the square

root of **5** and that of **3** be **.50401717...** Why this alignment?

Only time and further understanding will tell. We know that the first Book of the Torah has **50** chapters and the second has **40**, and we have

already seen the Earth/Moon relationship built into the quantitative sum of the

Torah, so we know this harmonic alignment is connected. Moreover, since this relationship is so

blatant and easy to see it was something we were not meant to miss.

Perhaps it

has to do with the **7** dimensions of *Zeir Anpin* (**6**) and *Malchut*

(**1**) together, as in the Earth and Moon together, the archetypal male and female together.

The Creator

of the Torah gave us additional hints when He made the collective value of the **4th** and **5th** Books of the Torah, *Bamidbar* and *Devarim*, equal to **(248 + 256)** or **504**.

This harmonic with **5040** leads us to the equation $(5040/112) = 45$, which in turn connects this Earth/Moon relationship with the relationship between the Individual Books of Moses and the **112** Triplets and/or **112** Chakras (vortices) in our bodies. It connects them all to Adam(**45**) and the aspect of the Tetragrammaton (????) that applies to the Man, *Zeir Anpin* (????????????), of numerical value **45**.

1273 and the Essential Proportion

Regarding those **112** Triplets that hold the key to the bridge between cosmic realities, the sum of the initials of the **11** Triplets of *Bereshit* together with the **15** Triplets from the *Shema* were designed to total **1273**.

In other words, the **26** initials of these **26** Triplets--**26** being the numerical value of the Name of G-d (????)—were designed to equal **1273**, the universal value that squares the circle, defines our solar system and is built into to the Phi(?) defined dimension of the Torah (**401273** entities).

Whose name is associated with **1273**?

Let us not forget that within the **42**-Letter Name, the differential between the 6th Triplet (**330**) and the 5th (**57**) is **273**, and that as we saw previously, those line differentials in the **42**-Letter Names Matrix gave us the Names of the Matriarchs, the feminine Archetypes, of which **273** is associated.

The **26**

initials of these **26** Triplets equal **1273**. On the other axis of the Primordial *Alef* are the **86** Triplets of **42**-Letter Name and the **72** Names (Triplets) combined. Together, their initials total **3842**, the exact same value as first **42**-letters of the Torah that are associated with the origin of the **42**-Letter Name. They are also the total of the first **21** spelled-out letters of the *Alef-bet*.

The ratio

between these two axes is $3842/1273 = 3.018$, which is precisely equal to the cube root of **1** cubit: $\sqrt[3]{27.5} = 3.018 = 3842/1273$. So, if we cube the ratio ($3842/1273 = 3.018$) of the *Alef* axes formed by the **112** initials of the **4** Essential Elements (Forces) we get **1** cubit.

Do you know

what else was **1** cubit cubed? The sapphire Tablets Moses carried down from Sinai, and the hatchway above Noah's Ark.

$$\frac{\text{Initials 42 Letter Name} + 72 \text{ Triplets}}{\text{Initials Bereshit and Shema Triplets}} = \frac{(14 + 72)}{(11 + 15)} = \frac{86 \text{ Initials}}{26 \text{ Initials}}$$

$$\frac{86 \text{ Initials}}{26 \text{ Initials}} = \frac{\text{אלהים}}{\text{יהוה}}$$

$$\frac{86 \text{ Initials}}{26 \text{ Initials}} = \frac{3842}{1273} = 3.018 = \sqrt[3]{27.5} = \sqrt[3]{1 \text{ Cubit}}$$

If we were

to back away from the cosmos one second and examine this from afar. We might see that **1273** and **1.273** and **273**, might signify something more than the ratio that a square makes to an inscribed circle and that there is a reason **273** is the value for the word gematria (the bridge to Understanding). We might understand that **1273** and **273** represent some kind of force

or pressure upon our universe and that that is why the Earth, Moon, and Sun are in harmonic alignment with it. Are the Earth, Moon, and Sun just succumbing to, or obeying, this specific pressure mediation from a higher dimension? Or maybe they were designed to do so from their moment of Creation? And let us not forget that this same pressure (force) exerts itself on the female body and childbirth.

While we are out there beyond the cosmos, does **3842** represent another type of pressure mediation, one that gave rise to the **21** letters *Alef*(???) to *Shin* (???), and the first **42** letters of the Torah?

Are these two pressure mediations represented by the Tetragrammaton (????) of numerical value **26** and *Elohim* (?????) of numerical value **86**? And are they harmonically entwined in the ancient and secret cubit? What does this say about any structure purposely and consciously built utilizing this cubit?

And what do these Names tells us about how to apply the **4** Essential Forces behind the **112** Triplets? The Tetragrammaton (????) breaks down to (?? and ??) or **15** and **11**, as in the **15** Triplets of the *Shema* and the **11** of *Bereshit*.

Adam and Eve

The Zohar speaks endlessly about the Earth-Moon relationship through the G-d/*Shechinah* relationship. Simplistically, the *Shechinah* is the female aspect of the Tetragrammaton (????). The Tetragrammaton (????) is *Zeir Anpin*, or Earth in this relationship, and the *Shechinah*, according to the Zohar, is the Moon. The actual definition of the *Shechinah* is far more complex, as are most matters of true Kabbalah.

The relation between **45**, as in the Earth-Moon/Triplet ratio **7!/112**, and **26**, as in the

Tetragrammaton (????) and the **26** Triplets, harks back to Adam and Eve and the fundamental forces and particles in our known universe. As previously discussed, the level and aspect of the Tetragrammaton (????) that applies to the Man are the **6** bundled dimensions of *Zeir Anpin* known metaphysically as (????????????), of numerical value **45**. In an even deeper concept, the kabbalists explain that the Names consists of a front (????), kabbalistically a male aspect, which is also the original Name, and a back (????????), kabbalistically a female aspect, which is the spelling out of the Name, or numerically **26** and **19** respectively.

Reinforcing these conclusions

is that Adam and Eve, or numerically $(45 + 19) = 64$, which is 2^6 , representing the **6** dimensions of *Zeir Anpin*. As it happens, there are exactly **19** free parameters or measured constants that are necessary for our known universe to exist. In other words, if you change even one of these **19** parameters, or measures of the fundamental particles and forces, the universe never would have sprang into existence in a form anywhere near to what we know today, no life as we know it, no planets, etc. Of these **19** unchangeable parameters **10** consist as mass: the mass of the Up, Down, Charm, Strange, Top and Bottom Quarks; and the mass of the Electron, Muon, Tau and Higgs. The other 9 of the **19** parameters deal with energy and rate of decay: the decay rate of the Down, Strange, Charm and Bottom Quarks; the strength of the Strong Force, Weak Force, Electromagnetic Force and the Higgs Field; and the QCD parameter. Of the **45** total unit value in Man (Adam), **19** correspond to Eve, representing physically. These **19** correspond to the **19** parameters of physicality. The other **26** correspond to the essence unknown, the ether, the forces and pressures and fields whose interactions create, in the same way Adam gave way to Eve, the **19** parameters of physicality.

The ratio of the Eve to

Adam proportion or Eve/Adam is **19/45** or **42.22%**. Another way to view this **42.22%** and **57.78%** split is that the Creator to Adam proportion is **57.78%**. Thus, the Tetragrammaton (????)/(????????????????) or Front/Whole is **57.78%**, and the Back/Whole is **42.22%**.

Moreover, as

the Adam and Eve ratio broke down to **19/45** or **42.22%** and **57.78%**, so does the the Tetragrammaton (????) ratio of (?? and ??) or **15** and **11**, as in the **15** Triplets of the *Shema* and the **11** of *Bereshit*. The ratio of **11/26** and **15/16** works out to **.423** and **.577** respectively.

The Time Ratio

The total number of words, letters, verses, rows, and columns in the Torah = $248 \times 10^3 \text{ Phi}(\?) = 401273$, giving us part of the **3842/1273** = $^3?27.5 = 3.018$ equation. We also know that the total number of words, letters, and verses in the Torah = $5^8 = 390,625$ and that the difference between these two totals is $401273 - 390625 = 22^3$. When we take the digits in **401,273** and **390,625** as triplets (401, 273, 390, 625) and take their average, we get **422.25**, pretty darn close to **.4222** (42.22%).

The first **42**-Letters of the Torah that summed to **3842**, as the other part of the **3842/1273** = $^3?27.5 = 3.018$ equation, are cosmically conjoined with the **42**-Letter Name that comprises the 14 Triplets of the **4** Essential Elements. The complete value of those **42**-Letters is **4225**, also pretty close to **.4222** (42.22%).

We also saw a very similar number in the pivotal calendar Log (**5760**) = **3.76042248**, which converted the year 2000 in the Hebrew Calendar (**5760** HC) to the year **3760** HC, the year "0" in the Western Calendar, followed by numbers that could represent the **42** rows and **248** columns matrix that the Torah was designed around. Maybe it is a way of conveying that the dual calendars and/or time connects to the fundamental feminine essence, and to the ratio of physicality to entirety, and/or circular or spherical time, or to all those concepts at once.

Can it possibly be related to the **422** years that the Second Holy Temple stood, or the year **-422 BCE** that the First Temple fell? Or the **4228** sum of the primes through the unique number **210**—itself representative of the **210** years of the Egyptian Exile—considering the sum of the first **21** letters of the *Alef-bet* added up to **3842**?

As an aside,

the First Holy Temple stood for **410** years, as in the **410** value of the first Triplet of the *Shema* Essential Element (???) with its enlarged letter *Ayin* (?) of numerical value **70**, as in the **70** years between the two Holy Temples, and as in the year the Second Temple was destroyed, **70 CE**, and the number **422**, which is the numerical value of the Hebrew word for **70**.

Regardless, another way to view this Essential ratio is as the comparison of the physical (**19**) parameter component to the Spiritual (**26**) component, two incommensurate phases of the duality that defines our existence. To be incommensurate they must be *nothing* like each other. If you recall, electricity is a byproduct of two incommensurate fields, the magnetic and the dielectric, coming together. There is nothing more incommensurate than physicality and spirituality. The difference between the two incommensurate ratios is $(.5778 - .4222) = .1556$, a number that we saw previously in $\text{Phi}(\text{?})^9$, or $\text{Phi}(\text{?})$ cubed cubed, **76.0131556....**, which it turns out is the square root of **5778.000**.

These are the ratios between the two incommensurate components, spiritual and physical, and the whole of Creation, so it is fitting that the ratio between them is $19/26 = .73076....$ and the numerical value of the Torah's Creation verse is the sum of the integers from 1 – **73**, and the ordinal value of its first word ("In the Beginning) is **76**.

Genesis 1:1 "In the beginning God created the heaven and the earth."

?????????????, ?????? ??????????,
??? ??????????????, ?????? ??????????.

In the beginning, G-d created the Heaven and the earth, two incommensurate fields, Heaven and earth. Why are we emphasizing the term incommensurate fields? Because as we saw with electricity and magnetism, it takes two paired incommensurate fields to seemingly create something from nothing "*Yesh me-Ayin*."

Is time just the result of pressure

mediation on two paired incommensurate fields?

The Lord G-d

The numbers are not just numbers; they represent Names of G-d. The **112** in the **112** Triplets represents the Name, “The Lord G-d (????? ????)” or the **26** (????) and **86** (?????) Triplet axes. The Name, “The Lord G-d (????? ????)” is found **21** times in the Torah, corresponding to the higher Name, *Ehyeh* (????) of numerical value **21**. That is, it is found **20** times in Genesis and once (**1**) in Exodus. It also connects to the sum of the first **21** letters, as we just saw.

The first and final letter (??) in “The Lord G-d (????? ????)” has the same numerical value as *etrog*, the **4th** species. The two initials and final letters together equal **616**, the numerical value of “*H’Torah*, the Torah.” The set of inner and outer letters are each equal to **2 x 28**, which obviously matches the **4 x 28** value of **112**, as in the **112** Triplets. Please note that like the **28** letters in the Torah’s first verse, there are **28** divisions within the **4** Essential Elements that comprise the **112** Triplets: the **9** rows of the **72** Names; the **7** rows of the 42-Letter Name; the **8** words of *Bereshit*; and the **3** rows of the Upper 42-Letter Name plus the **1st** Triplet of the *Shema*’s first verse).

We now understand that “The Lord G-d (????? ????)” is the Name designed into every cubit of Holy construction.

We now understand that “The Lord G-d (????? ????)” is the Name designed into the essence and structure of the **112** Triplets.

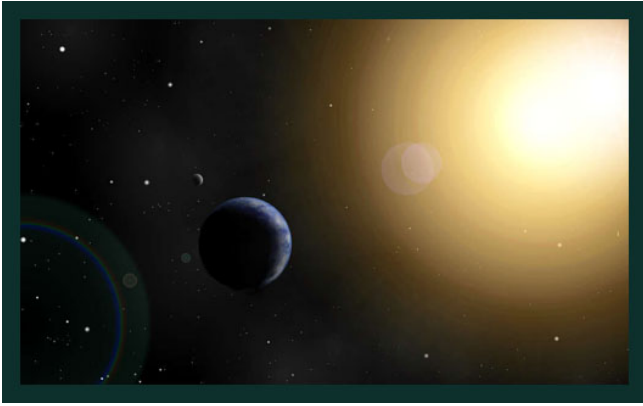

We now understand that the letters in “The Lord G-d (????? ????)” are not depictions but representations of pressure mediation and field modalities from non-physical higher dimensionality.

We now understand that, just as the Torah advised us, we are not to worship their image, but their essence and to strive to understand their ways. Nor are we to worship their collective image, but His collective Essence, for G-d is One. He and His Name are One. The tools to understanding were given to us along with our consciousness. To understand His ways look deeper into the Commandments and *mitzvot*, look deeper into everything, the metaphysics and hyperphysics pathways are all embedded there.

The Natural Order

We have been led to believe by scientists, academics, and all those that have a stake in us buying into their organizing skills that there is no natural order to the universe, that everything happens randomly and that it is Man's right to harness the universe to his will. What would happen if we were sold a bill of goods by certain Titans throughout history and that that theory about the universe being random is not only wrong, but backwards, or even upside down. Put it this way, either the Titans of tech know that the universe is not random and we are being wholly manipulated, or they are playing a high stakes game in which they do not have a clue as to the rules, and we are their playing chips.

Imagine what could happen if the cycles of birth get messed with, or the relationship between the Earth and the Moon and the Sun are tampered with, or what about the temperature scales. After all, we know that the set point of the universe is Absolute Zero at **-273** degrees Celsius and **273** is the freezing point of water on Kelvin scale (K). Therefore, the triple point of water, or point where the temperature and pressure of the three phases (gas, liquid, solid) of water coexist in thermodynamic equilibrium is **273 K**. Moreover, gasses expand by **1/273** of their volume with every degree Celsius. Does this sound like the temperature scales were conceived randomly or by divine inspiration and guidance?

Speaking of temperature, the cosmic microwave background (CMB) radiation in the universe is **2.73 K**, meaning the temperature of nothingness, the remnant of the so-called Big Bang is **2.73 K**. So empty space is **2.73 K** warmer than Absolute Zero at **-273** degrees Celsius, while the core temperature of the Sun is **27.3** million degrees Fahrenheit, and sunspots (places of relative coolness) revolve around the Sun in exactly **27.3** days. That is the same **27.3** days that our Moon orbits the Earth, and those relative revolving cool points on the Sun are just small puddles in its surface temperature of **5778?K**. Is the point to show us that nothing is random, or to warn us not to mess with this fine balance and instead that we should concentrate on our spiritual growth? Leave the physics alone and work on the metaphysics that brought it into being. In other words, get closer to G-d, or stay in Egypt.

Climbing Mt Sinai was a metaphor. Most of the time G-d communicate with Moses he wasn't on the mountain. Whenever the swirling cloud, the vortex, surrounded Moses He received G-d's words and understanding. The issue is getting closer to G-d and attracting the metaphysical vortex, not climbing a mountain.

What about

gravity, would that be a good thing to mess with? You know how **32 ft/s²** is the acceleration of gravity on Earth, meaning if we drop an object it will speed up **32ft/s** every second it falls. While that is oddly symmetric with the freezing point of water and the design of the Torah's **32** Paths of the Tree-of-Life, and the design of the Future Holy Temple ,and the design of the Pyramid's capstone, we also know that the acceleration due to gravity on the Sun's surface is **273 m/s²**.

Those Titans

might not want to mess with our cell's biology either, since the sum of the molecular weight of the **20** amino acids in our bodies is **2738.01 g/mol**.

There is a harmony to the universe and a system of incommensurate fields interacting to produce that harmony along with resonant pressures and angles that guide those fields. Whole new levels of understanding are in order, none of which have to do with physicality.

For anyone that has not been following this series from its inception, you can find the [entire work here](#).

In the final portion of this 11-part section (Part XVII) we will reveal the secret formula.
