
Part XVII Connecting the Dots Part 11c The Secrets and Understanding

While searching for something else about Corona, I came across an article we published last Sept 4th, 2019 which we began:

“...we showed a very clear face of a man pushing out of a corona hole in the sun that was over 100,000 miles across. Was this just an odd arrangement of light and shadows? Is not everything we see in our solar system on any scale just an arrangement of light and shadows? Or is it a trans-dimensional communication for us to decipher, or maybe to focus our attention on the energy emitted from the corona holes. Ancient kabbalistic texts often describe dimensional patterns in terms of faces, and the Sun is considered as the bundled dimension of *Zeir Anpin*, translated as “small face.” Moreover, kabbalistic thought is that anger flares from the nostrils.”

The Zohar tells us that a warning about every plague and crisis is announced to a nation from Heaven 30 days before it occurs. Perhaps, we missed the warning. Think the timing is off? When was Event 201? The virus broke initial containment in November, but when were the real first cases? If not for the Chinese whistle-blower who died, or the lab that released the genetic coding that was shut down, how long before the world would have known about this “flu?” How

many mysterious cases of SARs-like Flu were there back in October/November? Look to Iran. How do you ensure a pandemic?

Meanwhile, as the US goes into full lock-down mode, [this video about how our immune system really works may save your life.](#)

The Secret Pathway within the 72 Names

The bond between the 72 Names and the 42-Letter Name of G-d is eternal, both Names created in a single breath. Find 42 and find the path.

The 42nd Name or Triplet within the 72 Triplets is (??). It occupies the 2nd column, 6th row, as in 26, and has a numerical value 70. We have spoken enough about 70 years, etc. as the core Biblical/Historic time component, so let us move on to the adjacent 43rd Name (??) of numerical value 42. Together the adjacent 42nd and 43rd Names, which are both connected to the value 42, sum together as $(70 + 42) = 112$, as in the 112 Triplets that comprise the 4 Essential Elements/Forces of Creation. For anyone that has not been following this series from its inception, you can find the [entire work here.](#)

The key to this secret may be unlocked at the 42nd Name, but the path does not start there. The two consecutive Names prior to it, the 40th (??) and the 41st (??), together also have the numerical value $(27 + 15) = 42$. Then again, the 38th (??), 39th (??), and the 40th (??), together have the numerical value $(118 + 275 + 27) = 420$.

In the previous section of this series we discussed many of the Torah connections to the number **127**, including circling the square, number theory, and the *alef-bet*. So, how appropriate is it to find within the secret pathway, yet another **127** connection. The **41st** (???) , **42nd** (???) , and **43rd** (???) Names, individually connected to the value **42**, as in the **42**-Letter Name, but together, they add up to $(15 + 70 + 42) = 127$. As we will explain in a moment, this is not a coincidence, and it provides us yet another clue into how the 4 Essential Elements of Creation interact with the universe.

והו	ילי	סיט	עלם	מהש	ללה	אכא	כהת

For now, let us continue pursuing the secret pathway, where we see that the **4** Triplets of the **37th** Name (???) through the **40th** Name (???) sum to $(61 + 118 + 275 + 27) = 481$, the height of the Pyramid that we have previously associated with the **72** Name matrix in multiple ways, including the **39th** Triplet (???) that gives us the measure of the secret and ancient cubit, **27.5"** that the Pyramid was built with.

Thus, the secret pathway is anchored at the exact middle of the **72** Names, where we previously found the **36th** and **37th** Names summing to **155**, the atomic weight of Gold, Silver and Copper.

והו	ילי	סיט	עלם	מהש	ללה	אכא	כהת
הזי	אלד	לאו	ההע	זל	מבה	הרי	הקם

The full spectrum of the secret pathway stretches from the 37th Name (???) through the 43rd (???) Name, from “I am” to 42. The numerical value of that 7 Triplet pathway (61 + 118 + 275 + 27 + 15 + 70 + 42) is **608**, which is significant, but cannot yet be revealed. Nevertheless, the revelation comes from adding the ordinal placement of the 7 Names (37 + 38 + 39 + 40 + 41 + 42 + 43) = **280**. The value **280**, as we know, is always connected to **5** the final letters (?????) within the *alef-bet* that collectively represent judgment and end-of-days prophecy. It is also (**7 x 40**), the two Biblical time frames given for cyclical completion and maturation. It is also the sum of the Egyptian Exile and the Babylonian one (**210 + 70**) years, with **210** being the height of the Pyramid in cubits.

The value **280** is only a piece of this puzzle though. When we take the complete gematria value of this secret pathway or secret sequence, we get (**608 + 280**) = **888**.

והו	ילי	סיט	עלם	מהש	ללה	אכא	כהת
הזי	אלד	לאו	ההע	זל	מבה	הרי	הקם

There is a phrase in Psalms 19:2 “????????????, ????????????? ?????????-????” “The Heavens declare the glory of G-d” that equals **888**. Nonetheless, we find another 3 Name sequence immediately following the secret pathway of 7, bringing its chain to 10. This extended sequence bridges the path to the 47th (???) and 48th (???) Names, which total (**400 + 55**) = **455**, the sum of the 3 higher Names *Ehyeh* (???) associated directly with *Binah*.

אלף-הי-יוד-הי
אלף-הה-יוד-הה
אלף-הא-יוד-הא

In this additional 3 Triplet bridge (44th, 45th, and 46th) sequence (**45, 91, 280**) connecting us to *Binah*, we have an equation. The value **45** we have previously discussed as representative of Adam/Man and the *YHVH* Name associated with Man and *Zeir Anpin* (????????????). Likewise, the value **91** from the 45th Name (???) is associated with Amen (???) and the unification (????????) of the *YHVH* (????) and *Adonai* (????) that bridges our world and *Zeir Anpin* and that elevates our prayers. Then the last Name in the sequence, the 46th (???) once again has the value **280**, matching that of the **5** final letters. If you have ever heard that this Name, or any of the 72 Names means something in particular and will help you get anything in life, please forget it. Rabbi Chaim Vital of blessed memory warned against using the Names in this way and indicated that there is no one pure enough on earth to do so. You may have been sold the idea that you fit that bill, or that you know better than him, but you would be connecting to things that can only backfire for you. As he and Rav Brandwein explained, the **72** Names connect above *Zeir Anpin* and any impurity you bring there will need to be cleansed and you along with it. It is the opposite with the **42**-Letter Name as it connects us from below. This is why it is so important to know and understand the correct pathways and not take shortcuts into the unknown.

To further understand how this **3** Name bridge works energetically, we can review the concept of One that we discussed much earlier in this series. First, we can see that **91 = (7 x 13)**, bringing together the **7** levels of *Zeir Anpin* with the value of *Echad*, One. Secondly, we see that **91** is also the sum of the digits from **1 -13**. And finally, we see that the sum of the sum of all the numbers through **13** is **455**, which is the sum of the **3** aspects of higher Name *Ehyeh* (????), associated with *Binah*. As the energy and connection elevates through the 7 dimensions of *Zeir Anpin* on the way to *Binah*, it builds in **13** steps and then again in **13** more, as in the **13** Attributes of G-d.

This also ties in with another of the 4 Essential Elements of Creation, the first **8** words, or **33** letters of the Torah:

8 Words = 33 Letters

33 Letters = 11 Triplets

33 Letters = 3003

$$33 \text{ Letters} = \sum (1 - 77)$$

$$33 \text{ Letters} = \sum (1 - 77) = 91 \times 33$$

$$33 \text{ Letters} = \sum (1 - 77) = \sum (1 - 13) \times 33$$

$$11 \text{ Triplets} = \sum (1 - (7 \times 11)) = \sum (1 - 13) \times (3 \times 11)$$

In review:

$$91 = (\text{יהוה}) + (\text{אדני})$$

$$\sum (1 - 13) = 91 = (7 \times 13)$$

$$\sum \left| \sum_{i=1}^{n \rightarrow 13} (1 - n) \right| = 455 = (\text{אהיה})_3$$

אלף-הי-יוד-הי

אלף-הה-יוד-הה

אלף-הא-יוד-הא

$$13 = \text{Echad} (\text{אהד}) = 1$$

This **13** Triplet sequence that took us from the middle of the **72** Names to the fully expanded level of *Binah* has a total ordinal value (36...48) of **546**, the same as the initials of the full 10 *sefirot*(dimensions). Nonetheless, let us get back to the **7** secret pathway sequence that totaled **888**.

Using the value of *Binah* as **1000**, which is also *Alef*(???) , and subtracting **112**, as in the **112** Triplets, which we know is the bridge to it, we get the equation: (**1000** – **112**) = **888**. Hence,

within the **72** Names, we have a secret bridge or pathway from the **112** Triplets or 4 Essential Elements of Creation to the hyperspace realm of *Binah*. There is another equation inherent in this schematic because **888** = (**8** x **111**) and **111** is also *Alef(???)*. Therefore, (**1000** – **112**) = (**8** x **111**) = **8** x *Alef(???)*.

$$(1000 - 112) = 888$$

112 Triplets + the **7** Name Pathway = *Alef(אלף)*

$$(1000 - 112) = 888 = 8 \times 111 = 8 \times \text{Alef}(\text{אלף}).$$

$$1000 = 112 + 8 \times \text{Alef}(\text{אלף}).$$

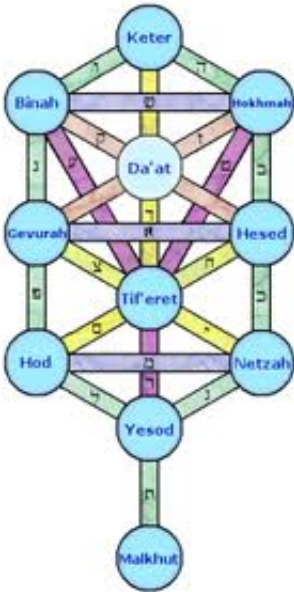

$$\text{Alef}(\aleph) = 112 \text{ Triplets} + 8 \times \text{Alef}(\text{אלף}).$$

Keep in mind that *Alef(?)* is One.

Nature

Ketoret (????), “Incense” also has an ordinal value of **70**, like the value of the **42nd** Triplet(???) at the core of the secret sequence within the **72** Names. The word, “*Ketoret* (????) Incense,” as used in the Torah, and subsequently in our *siddurim* (prayer books), refers to a particular blend of **11** herbs and spices used by the *Cohen H’Gadol*, the High Priest to among other special uses, remove plagues. Unfortunately, we only know a few of those spices and little of their secrets. And like the **11** Triplets of Bereshit **1:1** and

the 11 *sefirot* (dimensions) that they connect to, which includes the 11th dimension of *Da'at* (Knowledge), all 11 must be included and working together to be effective. Keep in mind that when the *sefira* of *Da'at* (Knowledge) within the Tree-of-Life schematic is engaged the initials (???) of its the central column (*Keter-Da'at-Tiferet*) has the numerical value **424**, as in *Moshiach Ben David*. This is by design. The central column represents a balance in the fields, perhaps the Inertial Plane of Potentiality. *Da'at* as a *sefira* (dimension) itself represents a balanced state between the upper dimensions of *Binah* and *Chochma*.

The 11 Incense combine to return the world to a state of balance and turn off the viruses. *Moshiach Ben David* is our channel and pathway through the dimensions, which restores the equilibrium. The cure that shuts off the coronavirus already exists. It always has. Even if the virus was engineered by man it relied on Nature, and Nature can shut it off instantly. It is a matter of understanding Nature. We are only a part of Nature. Even our own bodies are outnumbered internally. The cells in our bodies are outnumbered 10:1 by our microbiomes consisting of viruses, bacteria and fungi. The genes in our bodies are outnumbered 150:1 by our internal viruses, bacteria and fungi. We would not survive a day without them, not as a human being, nor as a species. And they have been around billions of years before us.

We developed consciousness about 5778 years ago. The Fungi colonized the planet,

transformed the rocks to soil, intelligently cultivated grass, plants, and trees and agriculture 2 billion years ago. Then they started breeding animals. If you look down at the soil beneath your feet, you will see that 30% of that soil consists of Fungi. They developed the plan to live in harmony with the bacteria and the viruses long before we came into existence. They developed the plan to live in harmony and exploit us, not the other way around. We are one species, and we cannot get along with one another for very long no matter what the situation, not even husband and wife or brother and sister. Yet the 150 million species of Fungi are all harmoniously networked across the globe and have been for eons. They are also harmoniously networked with nearly all the trees and plants and animals on the planet. Our brains are patterned after the safe neural networks the Fungi create.

Where do you think we should look for the cure to the coronavirus? Our engineering labs?

There is a reason the flu diminishes every Spring and it is not because of warmer weather. Think about it. What is blowing through the Spring air as the trees begin to bud? What are we breathing in? Make sure you get that fresh air this Spring, stand 6' away from one another, but breath deep. It is Nature.

This subject is far far deeper than we have presented here, including the fact that the Fungi have a developed a way to communicate with us. Remember, Nature is a part of the Creator. No matter what, the Creator still calls the shots. It is not for nothing the Hebrew word for Nature (????) has the same numerical value as *Elohim* (?????), "G-d" the 3rd word in the Torah, which, of course, makes it a part of the 11 Triplets. And while the ordinal value of *Teva* (????), Nature, is 32, as in 32 Paths of Wisdom that connect the *sefirot*, and as in the 32 times the Name *Elohim* (?????) appears in Creation, the complete numerical value of *Elohim* (?????) is 127.

Notice that the word for Nature, *Teva* (????), is designed to link the 11 Triplets of Creation (*Bereshit* 1:1) and the 14 Triplets of the 42-Letter Name, and also the 72 Triplets. The value of its first two letters (??) is 14 and the value of its last two letters (??) is 72, with its central two letters(??), most appropriately, equaling 11. We should further note that the letters (??) are found together in both the 4th and the 5th rows of the 42-Letter Name (14 Triplet) matrix, pivoting off its central axis point.

The Secret Power of 8

The **7** Triplet sequence in the **72** Names was all about the **42**-Letter Name, which are the **14** Triplets of the **7**-level matrix that bridges our world through the **7** levels of *Zeir Anpin* to *Binah*.

We just spoke about a clue we found in the secret pathway within the **72** Names about the primordial design of the **4** Essential Elements of Creation. It had to do with the connection between the **42**-Letter Name and the number **127**. The number **127**, as we explained previously, connects with the number **7** through the **7** combinations of Bereshit 1:1; the $(2^7 - 1)$ Mersenne Primes; the **7th** Prime in Primeth Recurrence series, which is the **127th** Prime overall. That particular prime number is **709**, which is also the value of the “Incense (????),” the Biblical antidote for plagues.

The total of that **7** Triplet sequence, **888**, brought us another clue. We know, the number **8** is representative of *Binah*, the **8th** highest of the *sefirot* (dimensions) and that the Torah understanding was written on that level, which is why its words, letters, and verses total exactly 5^8 . Moreover, we know that nearly all the Biblical dates end in the number **8**, as we saw in [The Divine Calendar](#). So does *Moshiach*: 358.

שְׁמַע יִשְׂרָאֵל יְהוָה יְהוָה אֱלֹהֵינוּ יְהוָה אֶחָד

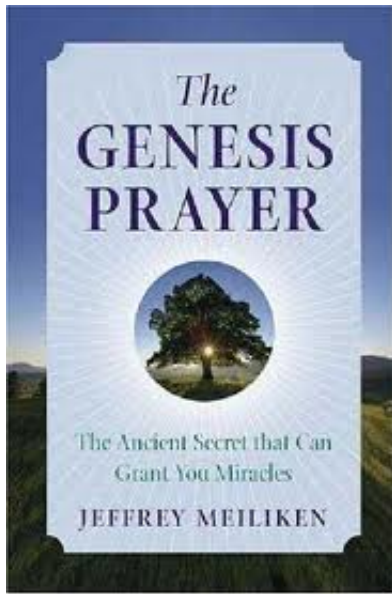

With these clues, we realize that 3 of the 4 Essential Elements also connect to **8**. The value of the *Shema*'s first verse also ends in **1118**. Moreover, the *Shema*'s first verse is found at *Devarim* **6:4** or 8^2 . Furthermore, The *Shema*'s first verse is also known as the **15** Triplets and it contains the Upper **42**-Letter Name of G-d, which has numerical value **708**. Notice the design of the value **1118**; it is comprised of two separate numbers, **1110** and **8**, which leads us to the equation $(1110 + 8) = (111 \times 10) + 8) = (10 \times Alef(???)) + 8)$. This is obviously reminiscent of the $(8 \times 111) = (8 \times Alef(???))$ equation from the **888** Triplet sequence above that also represented *Binah*.

The **72** Names themselves is a matrix of **8** columns, and as we have seen it mathematically separates into the first row of **8** Triplets and a 8^2 square of **64** Triplets that sum numerically to **8000**. The numerous ways it connects to a perfect **1000** is another indication that the **72** Triplets operate on the level of *Binah*.

Then there are the **11** Triplets from the first **33** letters of Genesis, which comprise the first **8** words of the Torah. Those **8** words equal the sum of the integers from **1 – 77**.

So, we can now understand that the **15** Triplets of the *Shema*, **72** Triplets of the **72** Names, and the **11** Triplets of Genesis, which is **98** Triplets in total, operate at the hyperspace **8th** level of *Binah*, and that the **14** Triplets of the **42**-Letter Name operate at the **7** levels of *Zeir Anpin*. Thanks to the secret pathway, the schematic of the **112** Triplets and the arrangement of the **4** Essential Elements of Creation is much clearer.

The **42**-Letter Name will help us climb to the edge of *Binah* hyperspace

enlightenment. The full **112** Triplets will help us cross over into Oneness. For anyone that has not been following this series from its inception, you can find the [entire work here](#).

Stay healthy. Support your immune systems and may G-d protect you. Use the **42**-Letter Name. As it says in Google, **42** is the answer to all the secrets of the universe.
