## Part XVII Connecting the Dots Part 12 Q.E.D.

**Author :** Meiliken

**Date :** 29-03-2020

### The Sacrifices

People who consider life sacrosanct have wondered why the Torah commanded the Israelites to make specific animal and bird sacrifices. The process was commanded to occur only when there was a channel directly to the Creator through the Holy Temple, the *Mishkan* (Tabernacle), or when commanded directly by G-d, as in the Covenant of Halves. In their absence the actual sacrifices were replaced by prayer. We are not going to get into ethics or even the technology of the individual sacrifices here, only the symbolism and the concealed encoded information being conveyed to us. For anyone that has not been following this series from its inception, you can find the [entire work here](#).

The sacrifices were meant to be made only directly to G-d, and under very specific conditions. They were not to be made through intermediaries, who purport to work for G-d, or who even put themselves in the roll of G-d, and certainly not at the behest of these individuals, for that is yet another way of the other side, the side of the physical illusion. It is a way to siphon off life-force energy from the Holy. By definition, all energy (light) is Holy, as it all has One original source.

The process of sacrificing is a process of separation. Both parts of the separation remain part of the source or whole, yet once separated they form two wholes, much in the way the Torah illustrates the separation of Eve from Adam. This is a very important illustration because it conveys to us in a very deft way that the separation is into feminine and masculine portions (wholes). The Zohar explains that there are two forces within the Holy of Holies, represented by the male and female cherubim.

Male and female, as previously explained, are not two attractive forces as they manifest within us humans. They are complimentary, contrary to how most humans embody them. As the Zohar explains in *Shemot* 6:38, the state of existential male or female depends on perspective. *Zeir Anpin* is male to *Malchut* and is female to *Binah*, which is male to *Zeir Anpin*, yet female to *Chochma*. All are female to that on High. A square inscribes a circle and a circle circumscribes that square, and another square inscribes that new circle, alternating male and female. At the center is a point, male to all else.

### QED

We have seen the obvious separation that splits the **72** Triplets into its first row and the remaining **8** rows, or **1143** and **8000**. That would be a separation into **1/9<sup>th</sup>** and **8/9<sup>th</sup>**. The value **1143** is akin to the sum of the *Bnei Adam*, *Bnei Noach*, *Bnei Israel*, and *Bnei Aharon* (????) or **(107 + 120 + 603 + 312) = 1142**. That the “sons of Aaron,” which are the *Cohanim* (priests) equals **312** is odd since the **312** cu is the measure of the Outer Courtyard of the Future Holy Temple, while the role of the priests is in the Sanctuary in the innermost place of the Holy

---

Temple.

The **11** Triplets of the first **8** words of the Torah naturally split into the **8<sup>th</sup>** word and the **7** words of the first verse of numerical value **2701**. That **8<sup>th</sup>** word has a value of **302**.

When we add the **1/9<sup>th</sup>** or **1143** separation of the **72** Triplets with the **1/8<sup>th</sup>** or **302** separations of the first **8** words of the Torah, we get  $(1143 + 302) = 1445$ , which equals  $5780/4 = 1445$  with the year **5780 HC** being the current year **2020 CE**.

While  $1/9^{\text{th}} \times 1/8^{\text{th}} = 1/72^{\text{nd}}$ ,  $(72 + 8) = 80$ .

Next, there are two Triplets within the **42**-Letter Name composed of the same 3 letters, (???) and ???), each of numerical value **500**, for a total of **1000**. If we separate these 2 Triplets of the 14 out, we are separating out **1/7<sup>th</sup>** of the Triplets and **1000** from the **3701**, leaving a remnant of **2701**, as in the value **1<sup>st</sup>** verse of the Torah that has **7** words.

The **3** splits in the Essential Elements, **1/9<sup>th</sup>**, **1/8<sup>th</sup>** and **1/7<sup>th</sup>**, or  $(1143 + 302 + 1000) = 2445$ , or **3** years shy of **2448 HC**, when the Torah was received at Sinai. We have recently covered what all that  $(9 \times 8 \times 7) = 504$ , connects to, and shortly we will reveal and important new connection.

The **15** Triplets of the *Shema's* first verse are naturally split into the first word/triplet (???) and the rest of the **6** words which total **708**, as in the Upper **42**-Letters and **14** Triplets of the Upper **42**-Letter Name of G-d. So, the first **1/6<sup>th</sup>** of the *Shema's* first verse has a numerical value of **410** and the remaining **5/6<sup>th</sup>** has a value of **708**.

By now we have recognized that the **4** Essential Elements of Creation can be naturally separated into their male and female energetic components in a **1/6<sup>th</sup>**, **1/7<sup>th</sup>**, **1/8<sup>th</sup>**, and **1/9<sup>th</sup>** sequence. And the subsequent sequence of  $(6 \times 7 \times 8 \times 9) = 3024$  or  $(756 \times 4)$ , as in perimeter and base, measured in feet, of the Pyramid respectively. It is also the multiple of the two even pronic numbers,  $42 \times 72$ , so apropos to the **4** Essential Elements that include the **42**-Letter Name and the **72** Names.

The sum of the **4**-masculine separated or sacrificed portions of the **4** Essential Elements  $(1143 + 302 + 1000 + 410) = 2855$ , and the remaining feminine portion is **14110**. Together the total of the **4** Essential Elements are **16965**, which has an average of  $(16965/4) = 4241.25$ , an obvious connection with **424**, *Moshiach Ben David* once again.

Like the year **2448 HC**, if **2855** were a specific year it would be 1 year after the birth of King David in **2854 HC**. That is **906 BCE**, as in the value **(906)** of the final row of the **42**-Letter Name (??????), which is associated by the Kabbalists with King David. If we were to double **2855**, we would get **5710**, or the Year Israel became a Nation (**5708 HC**) plus the concealed **2** years.

You might want to sit down for this next equation. The average of the **4** Essential Elements of Creation (**4241.25**) less the exact height of the Pyramid in feet (**481.25**) or  $(4241.25 - 481.25) = 3760$ , the pivotal year "**0 CE**" in the Divine Calendar (**3760 HC**).

After everything else we have revealed and interconnected with the elements, there is no way this could have worked out accidentally. The Creative architect of the Pyramid also Created the

---

4 Essential Elements of Creation and thus the Torah in which they are embedded, and He also Created the complete timeline of our existence. QED

We could stop now if this was a proof, but our purpose is far greater: to discover how to harness these 4 Elements of Creation to reach the enlightenment of *Binah* hyperspace.

## The 5<sup>th</sup> Element

Hypothetically, if we were to add a cube ( $3^3$ ) comprised of the 27 letters of the *Alef-bet* to the 4 Essential Elements as a 5<sup>th</sup> Element of Creation, the average would now be  $(16992/4) = 4248$ . We would be adding only the value 27 and not the value of the letters. The cube would be indivisible and taken as One single element, just as we would add the *kolel* to an equation. The value 4248 is precisely equal to the sum of the 22 spelled out Names of 22 Hebrew letters. Please note that the Names of the final 5 letters are the same as their counterparts within the 22 letters, so there is no conflicting calculation.

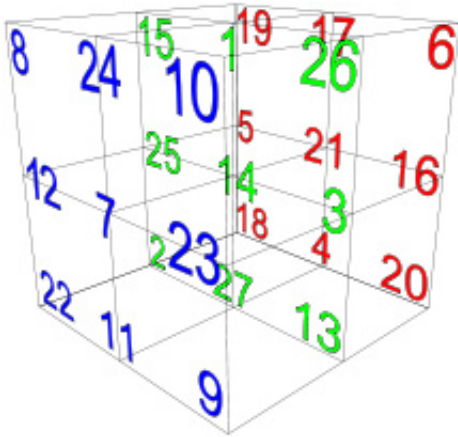

This makes sense since, as we have previously shown, the Hebrew letters are imprints of distinct upper dimensional energy forms, or pressure vectors upon the primordial fields in *Binah* and *Zeir Anpin*.

The connections to 4248 for the now 5 Essential Elements would now reflect the Primal Equation ( $1/.23571113... = 4.24248100...$ ) and the sum of the logs for the bases 1-10 for the number 1.998 or (3 x .666), which is precisely 4.248.

By the way, the sum of the square roots of the 22 letters subtracted from  $10^2$  Phi(?) is also 19.98...

Furthermore, there is also a correlation with the Primal (2,3,5,7,11,13...) Equation ( $1/.23571113... = 4.24248100...$ ) through its numerical string ...481..., as in the 481 ft height of the Pyramid, as regards the 112 Triplets. If not for the absolute proof we just saw above, this might possibly be seen as coincidental. Yet the 26<sup>th</sup> doubled word in the Torah's DNA is the word for day, *yom* (???), and it just happens to be found 481 times in the Torah, as if that measure or apex height (481' = 5775") has a connection to the end-of-days. The value of that doubled pair of (???) is 112, as in the 112 Triplets, and the individual word for day, *yom* (???) has a gematria *sofit* value of 616, that of "The Torah (*H'Torah*).” The 112 Triplets found in the Torah in the day.

## The Cube of 27

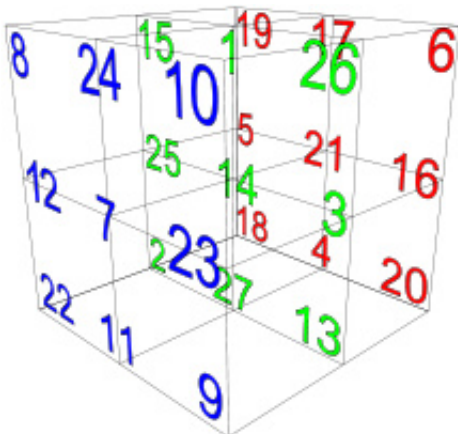

As Moshe pointed out to me, there is a magic cube of **27** or  $3^3$ , whereby each line, horizontal or vertical, and also **4** the diagonals through cube equals **42**. It is possible these align with the **27** letters of the *Alef-bet*. The sum of the **12** outer diagonals of this magic cube equal **504** or (**12 x 42**), which also means the average outer diagonal is also **42**, so this might indeed be the code to the arrangement of the **27** letters of the *Alef-bet*, matching their **27** ordinal values to their respective coordinate (X,Y,Z) in the **3 x 3 x 3** matrix.

The total number of triplet lines within the cube that equal **42** include the 4 inner diagonals, the 12 outer ones, the 3 axes, and the **36** horizontal and vertical ones for **55** in total. This is equal to **2 cubits (27.5" x 2)**; the height of the Pyramid entrance (**55'**); the square root of the Pyramid's perimeter; and a reference to the **42** and **55** words that begin with the letter *Vav(?)* in the *Shema*, **13** in the paragraph of **42** words and **42** in the rest of the *Shema* for a total of **55**. And this **13, 42, 55** sequence in turn is related to the exceedingly rare Indices of Prime Bell Numbers.

With **9** cubes per face and **6** faces to this  $3^3$  magic cube, and **1** cube in the center, there are **55** letter cubes.

At the center of the cube of **27** is the number **14**, as in David (???) and *Yad* (??), hand, and gold (??). The golden cube of David. A sun in the center, a star in the center, the Hand of G-d.

Surrounding that central number **14** in all three axes is the sum **28**, making each axis, **42**.

Now, perhaps the most telling of all within the magic cube of **27** are the **8** corner numbers that add up to **112**, as in the **112** Triplets. Think of it: the **112** Triplets surrounding the central cube.

It takes **3** to make a Triplet and the central cube of **14** to complete a Triplet, as in **3.14** and  $(3 \times 14) = 42$ , the **3** Hands of G-d. When the central cube is added to the **8** corner cube numbers, to make **9** cubes or **3** Triplets we get  $(112 + 14) = 126 = (3 \times 42)$ .

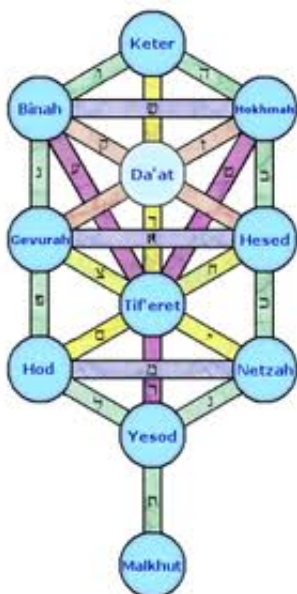

Meanwhile, like the **112** Triplets of the **4** Essential Elements of Creation, the **5<sup>th</sup>** Element naturally divides into **9** Triplets using the gematria cipher *AYK-BeCaR*. In this cipher the letters of similar value exchange places (1-10-100, 2-20-200...9,90,900). For the purpose of forming Triplets we get (???) , (???)...(???) or **(111,222,333...999)**.

The sum of the cubes or **27** ordinal values is **378**, the numerical value of *chashmol*, the angelic cloaking and in modern Hebrew, electricity. It is also the value of the famous phrase "*Echad Ushmo Echad* (????????????)" or "His Name is One." Very fitting. Very telling.

The value **378** is also the sum of the digits through the **42<sup>nd</sup>** prime and  $(378 + 42) = 420$ , so we see that there is indeed an inherent mathematical link between **27** and **42** that extends back to the beginning of time, meaning this magic cube of **27** and **42** is a very special arrangement, not just of the numbers, but of the Hebrew letters they represent. Do not lose sight of the fact that the Hebrew letters' values were assigned mathematically by a cosine function wave along an exponential scale based on the date the Torah was given to us on Mt. Sinai (**1313** BCE). Do not forget that the order of the Hebrew letters is determined by what pressure vectors they imprint on *Zeir Anpin*, or that the **6**-sided cube represents the **6 sefirot** (dimensions) of *Zeir Anpin*.

The Zohar tells us it started with a point, then there were 4 (sides), then 8 columns (corners), so there were 9 columns (cubes) in 6 directions. The **3<sup>3</sup>** cube. The Zohar is describing the unfolding of space, but it is also describing "The Cube." The Zohar calls them columns because the forces flowing into, or through, them are continual, columns from *Binah* hyperspace and beyond.

## 9 - 11

If we add these **9** Triplets of the **27** letters to the **112** Triplets, we get a total for the **5** Elements of **121** or **11<sup>2</sup>**, as in the **11** Incense and **11 sefirot** (dimensions). That brings the total letters in

---

the **121** Triplets to **363**, the numerical value of *H'Mashiach* (?????), whose complete value, given its ordinal value of **57**, is **420**. By the way, the complete value of **42** (??) is **57**. And here we are in the later part of the **57<sup>th</sup>** century. And the complete value of **57** (??) is **78** in case you were wondering.

We saw in the previous section the hidden cube of **9<sup>3</sup>** in the center of the **42**-Letter Name and how it incorporated the **11** Triplets. We also reviewed how **1000** letters of the *Shema* form a cube of **10<sup>3</sup>** and how the **216** letters of the **72** Names form a cube of **6<sup>3</sup>**. Together the **3** cubes (**729 + 1000 + 216**) equal **1945**. When we add the **5<sup>th</sup>** Element, the cube of **3<sup>3</sup>**, we get (**1945 + 27**) = **1972**. Then when we add **28** for (**9 + 10 + 6 + 3**) we get (**1972 + 28**) = **2000** for the **5** Elements.

**9....8....7....6...5...**

With the split between the male and female component portions of the **4** Elements of the collective **112** Triplets equal to **2855** and **14110** respectively, we find that **2855** is about **1/5<sup>th</sup>** of **14110**, or approximately **20%**. It is exactly **1/5<sup>th</sup>** of **14275**, off from **14110**, by **165**, the numerical value of "*H'Etz*, the Tree (???)". This means that **2855**, or the male proportion of the **4** Essential Elements, is **1/6<sup>th</sup>** the total, as in the **6** bundled dimensions of *Zeir Anpin* and the female proportion is **5/6<sup>th</sup>**. As we illustrated in the beginning (Part 2) of this *Connecting the Dots* section of this series, the initials (??) of *Ohr HaGanuz* (???? ??????????), known as the light set aside from Creation for *Moshiach*, hint at the proportion (**1/6<sup>th</sup>** and **5/6<sup>th</sup>**), while the ordinal value of Light (????) is **27**.

Adding **1** to the sacrificed or separated portion of the **4** Essential Elements gives us **2856**, which considering the **1/5** proportion of male/female portions is oddly reminiscent of the **28056** letters *Hei*(?) in the Torah, each of numerical value **5**. It is also oddly reminiscent of all the words in the Torah plus **1** divided by **28** or (**79976/28**) = **2856.2856**. Splitting the cube of **27** into **1** part and **26** parts as we did with the other **4** Essential Elements would be like adding (**1 + 2855**) and (**26 + 14110**), giving us a male/female energetic ratio for the **5** Elements of **2856/14136** = **20.20373**, as in the year **2020** CE. Plus, the **203** could represent the first **3** letters of the Torah (???) that equal **203**, or the sum of the square roots of the **9** Triplets (**111,222,333...999**), also **203**.

Once we get into the math and even the Hebrew letters, we lose focus of the big picture and what we are really talking about. We are talking about the **4** basic elements that Created the universe with a droplet (cube) of another **5<sup>th</sup>** Element. Think of it as **4** test tubes of different color substances and a tincture of a fifth. When you mix them together properly an entire universe appears. That may be a little too simplistic, but now you get the picture. This is why the technology was not just handed to us. For anyone that has not been following this series from its inception, you can find the [entire work here](#).

Zohar Miketz 14:237 quotes Malachi 3:20 and refers to *Ohr Haganuz*: "*That sun will then shine from one end of the world to the other. Israel will be cured, but the idolatrous nations will be burned by it. Concerning Israel, the verse reads, 'Then shall your light break forth like the morning, and your health shall spring forth speedily; and your righteousness shall go before you; the glory of Hashem shall be your rearguard'.*"

---

May we all be blessed with good health and that the sun shines soon.
