
Part XX - C. The Axes of Creation

Author : Meiliken

Date : 11-05-2020

1776 and Spherical Time

In the previous section we made another connection with the year **1776** CE. Along that same axis through the vertical center of the *Merkabah*, a Star of David can be formed asymmetrical or opposite to the **3** parallel Stars and crosshairs that fill the **3** vertical tiers, as previously discussed. This new one is in the topmost tier, centered on the number **1**, and its coordinates are (10-15-17) and (19-24-26) with the same diagonal crosshairs as before. The total value for this new Star of David and its crosshairs is **1776**. For anyone that has not been following this series from its inception, you can find the [entire work here](#).

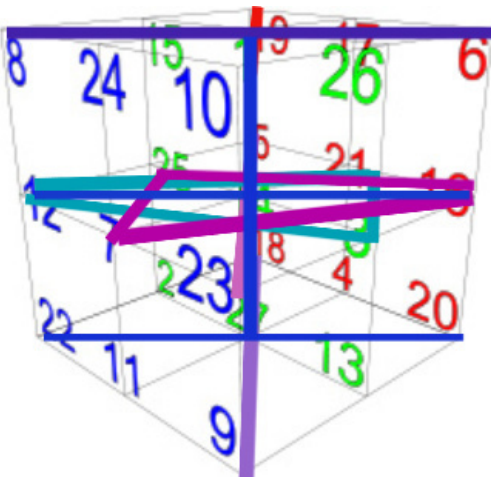

Now, we want to explain that the number and date **1776** is also found within the first **1000** digits of Pi. This was the year that the United States was founded (**1776** CE) and in that same year, two months earlier, the illuminati was also founded. The exact digital sequence in Pi is ...171**776** and is found at digit number **888**, exactly one half of **1776**. For those that understand the **17** was purposely designed to precede **1776** and for those that do not, just know that the answers are found in Questioning everything. Most telling is that the corresponding year in the **3760** sphere of time is **-1984** and the ratio of those two corresponding years (**1984/1776**) is 1.117117117, while the ratio of **1776** to **3760** is 2.11711711.... I promise we are coming to the moment for explaining spherical time. Meanwhile, the year **1776** HC in the corresponding Hebrew Calendar was also when the Tower of Babel took place and when G-d intervened to thwart the *Erev Rav's* initial plan for a New World Order. The year **1776** CE was their rebirth. By the way, with the extra year in the actual counting from year **1**, it is notable that the logarithm of **5778** is **3.7617**, just like the Creator intended.

Spiritual and Terrestrial Time

The dichotomy of Heaven and Earth built into the Torah's very first verse, "??? ????????????, ????? ??????????" Heaven and Earth, lays out the two parallel spiritual and the physical time frames. It's notable as we will see that the phrase "??? ?????????????? ?????? ??????????" has a numerical value of **1500**, when the *kolel* of One is added, just like the highest word value in the Torah, also of numerical value **1500**. The ordinal value of the first word in the 4-word phrase, *Et* (??), is **23**, like the first Triplet in the Torah (???), giving it the complete value of **424**, that of *Moshiach Ben David*.

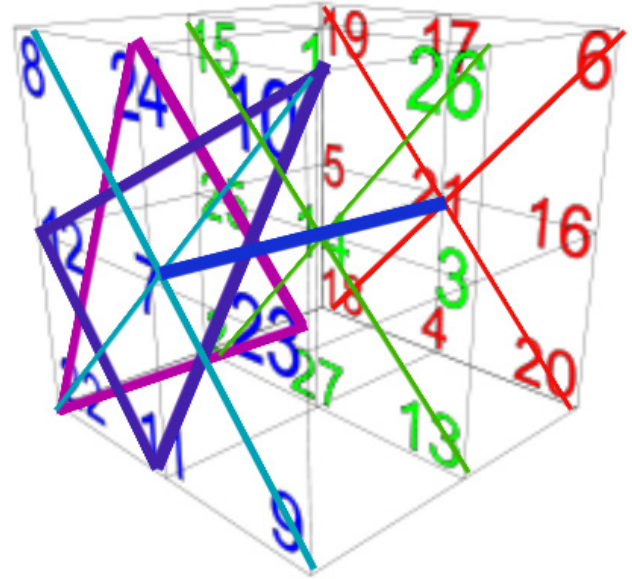

Then when adding the ordinal value, the complete numerical value of the entire phrase is **1657**, the year the Biblical Flood began, counting from year **1**. Meanwhile, the complete gematria value with the *kolel* for the 7-letter phrase for Heaven "??? ??????????????", corresponding to the spiritual time frame, is **888**. The other top tier Star of David in the vertical axis has one triangle (???) with **888** as its value and the other with **666**, giving it an average of **777**, nearly matching the complete gematria value for the 7-letter phrase for Earth "????? ??????????", corresponding to the terrestrial time frame, **776**. Meanwhile and the **7** Triplet sequence within the **72** Triplets that we recently discussed has a value of **888**. Of further comparative note is that the ratio of **888** to **1657**, or Heaven to the finality of corruption and evil in the year of the flood, is the same as the ratio of **2018** to **3760**, which is G-d willing the finality of corruption and evil and the elevation to the freedom of the Spiritual realm. Please note that in spherical time, as will be explained soon, both **2018** and **3760** are the same point in time, like two expanding bubbles meeting in this current time frame.

Triplet Magen Davids

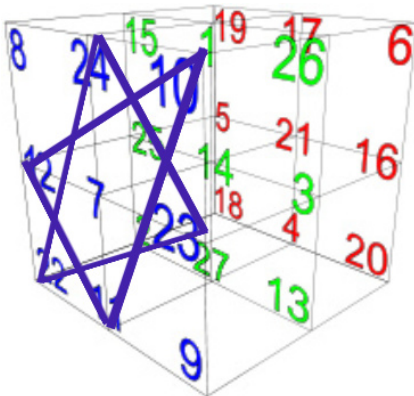

In the prior two parts of this chapter, we have seen **3 Magen Davids** complete with crosshairs lined up vertically through the **3** horizontal tiers of the Bird's Nest Magical Cube of **42**. We also explained how the **27** ordinal values were systematically laid out in the cube by the Creator. They were laid out, vertical plane of **9** by vertical plane of **9**, in **9** triplets (1,2,3; 4,5,6;...25,26,27) so that within each triplet no number would occupy the same plane as another, horizontal or vertical. Well, that design resulted in the formation of intersecting triangles that formed yet another set of parallel Stars of David and the bars that bisect them.

This second set is perpendicular to the first set, and just like the first set its **36** total numbers sum to **6660**. Also, like the first set, there

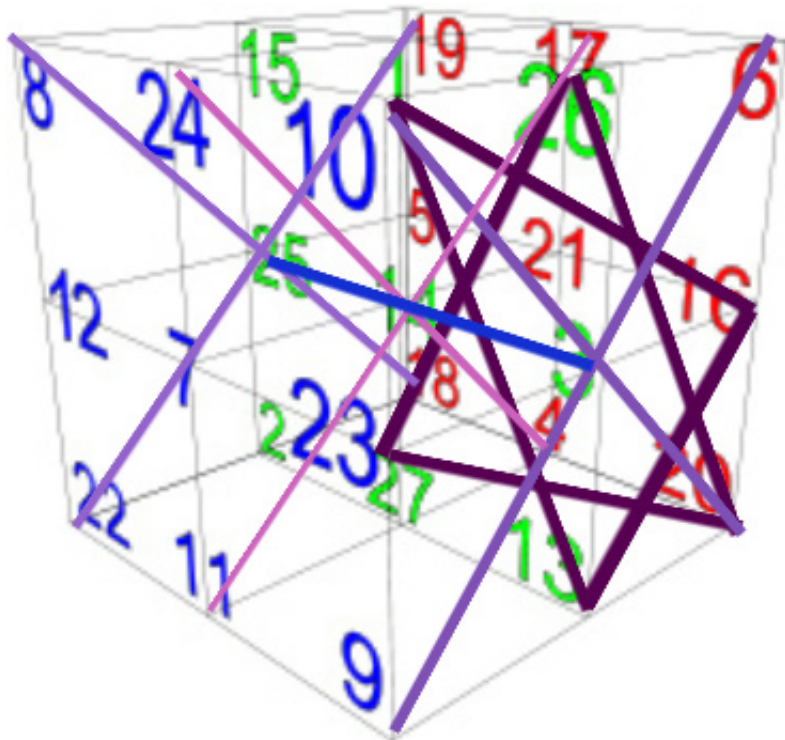

is a ratio of **15 – 150 – 1500** built into the **3** planes of **9**. In this case, one of the triangles in the front vertical plane (**22,23,24 ???**) sums to **1500**; a bar (**13,14,15 ???**) in the middle plane sums to **150**; and a triangle (**4,5,6 ???**) in the rear plane sums to **15**.

Interestingly, the two crosshair bars of the front vertical plane add up to **441**, the numerical value of Truth (*emet*), while the two triangles, (**???**) and (**???**) of the Star of David sum to **1560**, or **10 x 156**, the numerical value of Joseph and/or Zion. Now here is the kicker: the sum of the Star of David with its crosshairs in this vertical plane of **9** is **(1560 + 441) = 2001**, and the corner of the plane is **9 -11**.

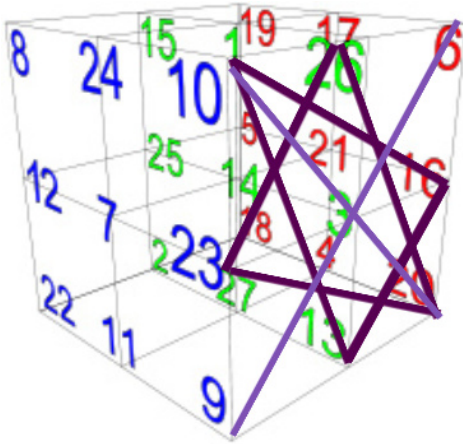

We should also point out that a separate (**22 - 8 – 7 – 9 ????**) triangle on this same vertical plane (face) equals **424**, *Moshiach Ben David*.

There are, though, **3** axes to the cube, and as it turns out the **3rd** axis also forms **3** parallel Stars of David with crosshairs that also sum to **6660**. And just like the other two axes there is a ratio of **15 – 150 – 1500** built into its **3** tiers or planes as well. Just like the second axis, one of the triangles in the front vertical plane (**20,23,26** ???) sums to **1500**; a bar (**11,14,17** ???) in the middle plane sums to **150**; and a triangle (**2,5,8** ???) in the rear plane sums to **15**. The **3rd** set and axis is perpendicular to the other 2 sets and axes.

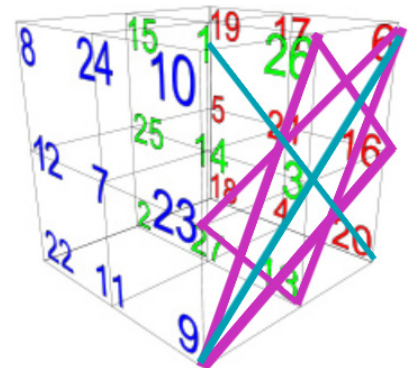

While this progression of *Yah* (??) from **1** to **10** to **100** in each of the **3** tiers in each of the **3** axes is of paramount importance in the cube's Divine design, the **3** sums of (**15 + 150 + 1500**) total **4995**, the sum of the **27** Hebrew letters. Please kind in mind, that the **27** letters used to compile these **3** sets are not the same as the Hebrew letters from **1 – 27**, since some are duplicated, and some are not included at all. When we go from **1** to **10** to **100** we are expanding from *Malchut* to *Zeir Anpin* to *Binah*. One of the Arizal's Rosh Hashannah *kavannot* is to draw down the **150** Lights, specifically as **10 x Yah** (??).

If you recall, the vertical axis Stars were constructed entirely out of similar letter values, like **222** or **888**. When we examine the counter or opposite Stars in that same vertical axis, all **3** of them are wholly comprised of triangles that sum to either **15**, **150**, or **1500**. The uppermost one has a triangle of **150**, and another of **1500**, and a bar of **15**, and with the other bar of **111**, it gave us **1776**. The middle tier one has a triangle of **15**, and another one of **1500**, for a total of **1515**. The bottommost tier has a triangle of **15**, and another of **150**, with a bar of **1500**.

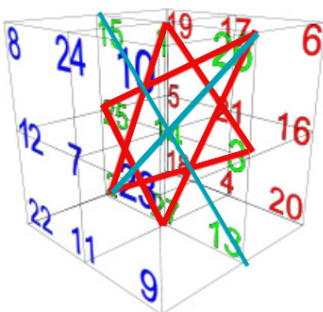

We saw several interesting connections in the front face, or in other words the front plane, of the second axis (8-10-9-22), and find the same with the front face/plane of the third axis(10-6-20-9). The sum of the two triangles of the Star formed in this plane add up to $(1500 + 120) = 1620$, an obvious connection to *Binah* (1000) and *Keter* (620) and a less obvious connection of the 6 points of this Star to the 6 Matriarchs—Sarah, Leah, Rivka, Eve, Miriam, and Rachel whose collective complete value is 1620, as previously explained in conjunction with the 42-Letter Name matrix. By the way, the Crosshair bars of that face equal 231, as in Abraham's 231 Gates created by the 231 letter pair combinations of the *Alef-bet*.

In order to keep the Stars properly oriented and aligned throughout the 3 axes, we began each upper triangle in a specific corner. If we

were to create a different or opposite Star of that same third axis front face as the 1620 sum, by beginning its upper triangle with the NE corner instead of the NW one, the sum of its Star and crosshairs would be 1656, the Biblical date of the Flood.

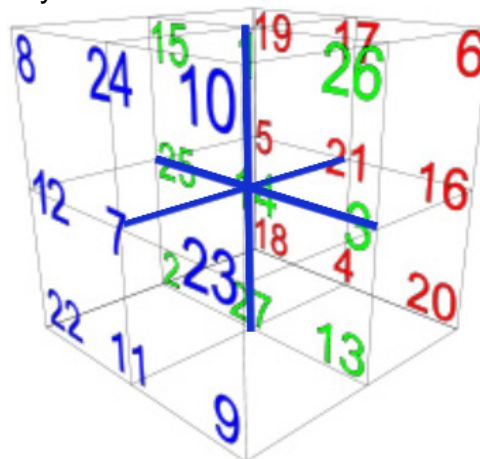

Another date baked into the Magical Cube of 42 is found in the sum of the Star of David (2-1-3; 26-25-27) with its crosshairs (13-14-15; 2-14-26) in the middle of 2nd plane of the 2nd axis, which

is **3408**, as in the year **3408** HC, the year the **2nd** Holy Temple was built.

It is also interesting that the sum of the crosshairs of the rear or third plane of the third axis is **1998** or (**3 x 666**).

Remember, this is a cube and as such it can be rotated along any of the **3**-axes, so none are more than momentarily vertical or horizontal, and no face is any more

considered the rear face than it is the front one. All **3** sets of Stars of David with their crosshairs equal collectively (**3 x 6660**) or **19980**, which also equals (**4 x 4995**), the sum total of the **27** letters in the Bird's Nest. And in case you did not get the point in the previous section, **4995 = (45 x 111)** and (**3 x 6660**) equals **19980 = (18 x 111 x 10)** and the square root of **18** is **4.2426....**

Always 3

3³ Letters, **3** Stars in each axis, **3** units in each Triplet, **3** Axes, **3** Planes in each axis, **3** Tiers in each and axis, **3** Patriarchs, and **3** columns in the Tree-of-Life, **3** visible dimensions to our existence, **3** aspects to time.

Rotation on the Axes

With simultaneous rotation in the **3** axes the cube could be, like the electron, perpetually spinning unless we stop to observe it. This spinning cube or orb is spinning on a central point, the letter *Nun* (?) and where do we find a Torah reference to this? In both Numbers **10:35-36** and Psalms **107** where we find an inverted *Nun* (?), usually horizontally flipped, sometimes vertically, occasionally both, depending on who is interpreting it. This occurs with no other letter in the Torah or Tanakh. The two verses in the Numbers 10:35-36 represent an inversion of the Torah. They have **12** words and **7** words respectively, while the Torah first and last verses are **7** and **12** respectively. There are **85** letters in this verse and **5⁸** words, verses, and letters in the Torah. These two verses are about the Ark of the Covenant, when it goes and when it comes, and thanks to Ezra, we recite it **3** times a week when the Torah is removed from the Ark for reading. The Ark (????) has a numerical value of **256** or **2⁸** and is the inverse of the Torah in that **5⁸ = 390,625** and **1/2⁸ = .00390625**.

לתור להם מנחה ועצן יהוה עליהם יומם בנסעם
 בן המנחה ויהי בנסע
 הארץ ויאמר משה קומה יהוה ויפצו איביך ונסו
 משנאיך מפניך ובנחה יאמר שובה יהוה רבבות
 אלפי ישראל ו
 יהי העם כמתאננים רע באדני יהוה וישמע יהוה

It is said that this special window between the two inverted, or axially spun, *Nuns* (?) belongs in another section, where the banners and locations of the **12 Tribes** are to be placed, akin to the location of the Magical Cube with the **112 Triplets**, just as two *Nuns* (?) of **50** each and **12** equals **112**. Others say that it represents a **7th** Book of the Torah since it splits the Book of Numbers into **3** separate sections. Moreover, it is said that its **85** letters are representative of a much larger text. Given the inversions we see demonstrated in the paragraph, we may guess that in comparison to the **5⁸** words, verses, and letters in the Torah, there might be **8⁵** words, verses, and letters in this hypothesized Book, and $(5^8 + 8^5) = (424,000 - 607) = 424,000 - (500 + 107)$.

The 19 words, 2 verses, and 85 letters add up to **106**, the numerical value of the spelled-out letter *Nun*(???) . With One for the Book or paragraph, it is **107**.

It is in the **107th** Psalm that we once again find the inverted *Nuns* (?), and the **7** inverted *Nuns* (?) therein begin sequentially with the **23rd** verse, and as we know the **23rd** Hebrew letter is *Caf*(?) of numerical value **500**. The number **424,000** as (424×1000) , as *Moshiach Ben David x Binah* cannot be overlooked. What is this like? It is like the **107,007** letter in the Torah that begins the **10** Commandments.

Likewise, there are two places within the **72** Names, where back-to-back Triplets contain the letter *Nun* (?), the first two are in the exact center of the Names, like the cube, at Triplet numbers **36** and **37**, the same two that gave us the atomic numbers of Gold, Silver and Copper, and the other two are at Triplets **53** and **54** that sum to **107**. With the *kolel* of **4**, the **4** Triplets sum to **720**, and with their ordinal location values, **900**. The last and final Hebrew letter is *Zadi* (?) of numerical value **900** and when spelled out (???) with the *kolel*, it has a value of **107**. The exact collective value of the first **3** Triplets is **256**, the same as The Ark (????). The fourth Triplet connects with **107** in that $(54 \times 107) = 5778$ and the **107th** Triangular Number or alternatively, the sum of the integers from 1 – **107**, is **5778**.

There is nothing in the Torah that does not have deep meaning. There is nothing in the Torah that does not involve deep technology. There is nothing in the Torah that does not direct us towards obtaining and elevating to a state of *Binah* consciousness and the revelation of *Moshiach Ben David*.

How odd that the key to our solar system and universe is the number **273** and the key to our existence is the Cube of **27** Letters (Essential Forces) spinning in **3** axes!

Enjoy La'g B'Omer and connect to R' Shimon Bar Yochai, author of the Zohar
