# Part XX - D. Dayenu

Author : Meiliken

Date : 18-05-2020

Is it enough? *Dayenu.*

It would have been enough that the Creator gave us **27** Essential Forces or pressure mediations to create our universe. It would have been enough that He gave us

the **27** Hebrew letters to represent them so that we may interact with them and one day comprehend them. It would have been enough that He gave numerical values to those **27** letters according to a sine wave with a slope of **1.6** and an exponential scale ($y = \textbf{1.313}^{x}$) that is based on the year He also gave us the Torah, **1313** BCE. For anyone that has not been following this series from its inception, you can find the <u>entire work here.</u>
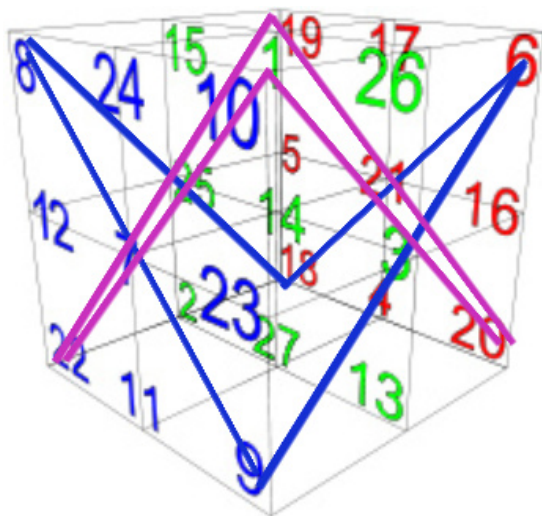

Dayenu.

It would have been enough that He arranged the *Alef-Bet* so that the **27** letters times the slope of **1.6** equaled **43.2,** the frequency (**432** Hz) of the shape of the Tree-of-Life.
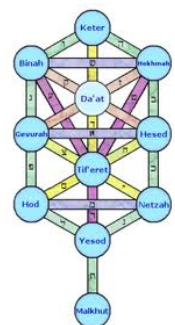

Two stacked cubes with the length of *Vav*(**?**) per side for a volume of **6**^{3} each cube, total **432**.

Dayenu.

It would have been enough that He gave us the **42**-Letter Names comprised of those letters to let us access those forces. It would have been enough that He arranged those **27** letters into a tight **3**^{3} cube so that each and every one of the resultant **27** columns and rows in that cube sums to **42** and connects us to those Names. It would have been enough that He arranged the **28** diagonals of that cube so that they summed in pairs and collectively to multiples of **42**, or that the ordinal value of the entire cube is **9** x **42**. It would have been enough that He arranged that the cube's corners, alternatively the end points of those diagonals to form opposing triangles that when multiplied form multiples of **42** (i.e. 8 x 9 and 9 x 6 = **126**; and 22 x 10 and 10 x 20 = **420**) and the Masonic symbol of the compass.

*Dayenu.*
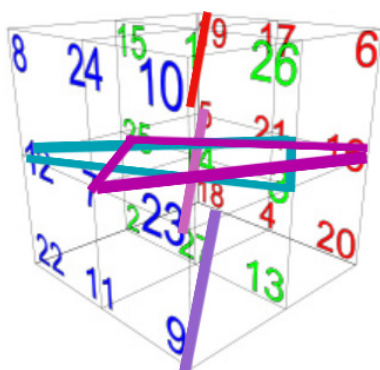

It would have been enough that He arranged each letter in the cube so that they formed triangles and bars of numerical triplets from **111** – **999**. It would have been enough that He arranged those numerical triplets into parallel Stars of David along a central axis of the cube. It would have been enough that He arranged all **27** letters so that they formed **9** triplet triangles and bars in order of the *Alef-bet* (**…,???**) (**,???**). It would have been enough that He arranged those **9** triplets so that they formed parallel Stars of David and bars along yet another central axis of the cube, perpendicular to the first one. It have would have been enough that He arranged all **3** orthogonal axes so that they formed
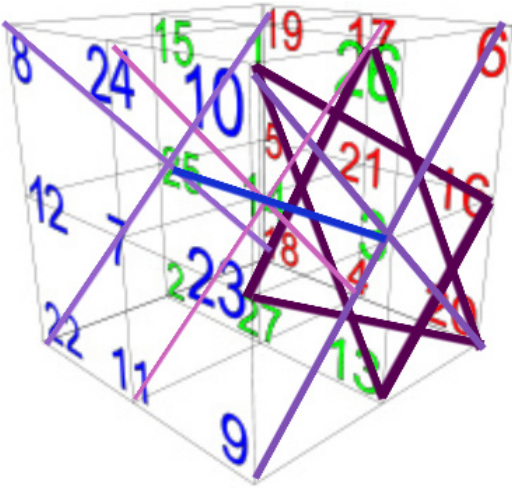

9 parallel Stars of David and crosshairs, and made each axis set of Stars and crosshairs equal to **6660**, resulting in all of them together equaling **3** x **6660** and **4** x **4995**, the value of the entire *Alef-bet*. It would have been enough that He arranged for all the **36** letters utilized in each of those parallel sets of Stars of David and crosshairs that equal **6660** to be equal to the sum of the integers from 1 – **36**, or (**666** x **10**).

Dayenu.

It would have been enough that He arranged each letter in the cube so that they formed triangles and bars of numerical triplets that generated the triplet root letters of every Hebrew word, and that the entire Hebrew language thus formed a tangled Bird's Nest within the confines of the cube.

Dayenu.
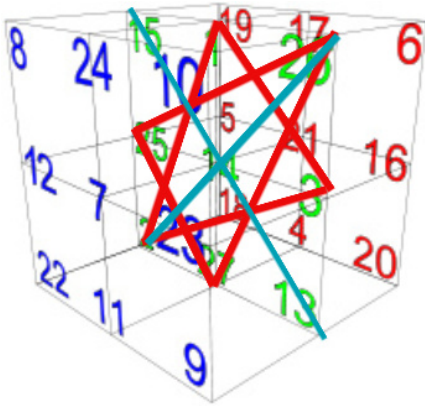

It would have been enough that He arranged for specific triangles and/or Stars of David to give us specific key dates in history, including the date of the Flood twice in **1656** HC and **1657** HC; the infamous **9/11/2001** that may have signaled the start of *Oy and Ashrei*; the construction of the Second Holy Temple in **3408** HC; and the year **1776**, whether CE or HC.

Dayenu.

It would have been enough that He arranged the cube so that each tier of **9** sub-cubes or letters summed to **1665,** and that the year of the Flood in **1656** HC equals (**1665** – **9**).

Dayenu.

It would have been enough that He arranged the cube so that the left face, or alternatively the back tier of the 3-14-25 axis, equals **1395**, the exact sum of the numerical values of the **6** Matriarchs—Sarah, Leah, Rivka, Eve, Miriam, and Rachel—and that the Star and crosshairs of the right face, or alternatively the front face of that same axis, equals **1620**, which is the sum of their complete numerical values, representing *Binah* (**1000**) and *Keter* (**620**), and also the resultant value of (**4** x **9** x **9** x **5**).

Dayenu.

Plan of the Third Temple
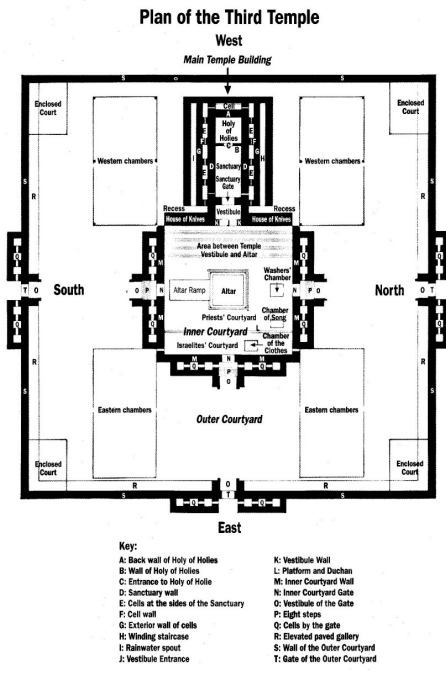

It would have been enough that He arranged the cube to compliment and fit into the exact center of the **112** Holy Triplets, which He had concealed throughout the Torah. It would have been enough that He arranged the cube so that the **8** corners summed to **112**, and that each pair of opposite corners equaled **28**. It would have been enough that He arranged the cube so that the sum of the ordinal values of central tier of the cube without the central number/cube of **14** is **112,** and so that the sum of all **3** tiers without the central Pi (3 – 14 – 25) column is **336**, the amount of letters in the **112** Triplets. It would have been enough that He arranged the cube so that it formed **6** internal pyramids centered on the central **14** cube that fit seamlessly together with a total ordinal value of **420**, and whose **24** pyramid corners add up to **336**. It would have been enough that He arranged the cube so that the letter total without that central Pi (3 – 14 – 25) column is **4242**.
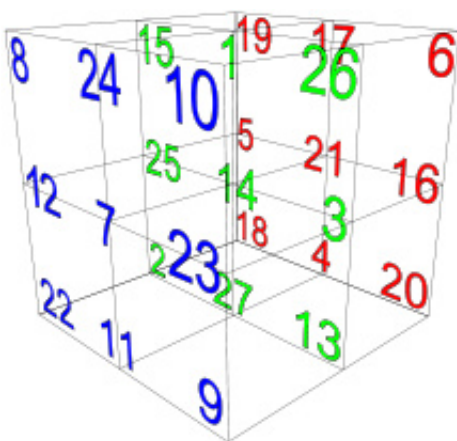

Dayenu.
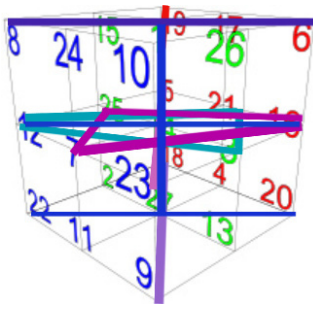

It would have been enough that He arranged the cube so that each horizontal tier equaled **1665**, exactly **1/3** of the *Alef-bet* (**4995**). It would have been enough that He arranged the cube so that any two of those 3 tiers equaled **3330**, as in the **3330**, or **66.6** jubilee, years from the reception of the Torah at Mt Sinai in **2448** HC and today in **5778** HC. It would have been enough that He arranged the cube so that the **3** parallel Stars of David in the vertical axis totaled **1665** and the crosshairs or diagonals totaled **3330**, splitting the cube exactly into **1/3** and **2/3**.

Dayenu.

It would have been enough that He arranged the cube so that there were **6** faces of **9** cubes each and that He placed the numerical string …**999999**… at the 761st digit in Pi and the sequence …**4995**… representing the **27** letters of the *Alef-bet* at the **777th** digit and ending with the **780th** digit, considering the full sequence is …**999999**83**729780**4**995…** and that **729** equals **9^3** and considering that the **666th** digit in Pi is …**343**… or **7^3**. It would have been enough that He arranged the *Alef-bet* and cube so that **4995** = (**45** x **111**) with **111** being the value of *Alef* (**?**), One, and **45** being representative of Adam, of an aspect of the *YHVH* associated with Man, and of the **45th** and current President of the USA.

Dayenu.

It would have been enough that He arranged the cube so that His Name *Yah* (**??**), or **15**, follows a progression from **1** to **10** to **100** in: a parallel set of diagonals in the vertical (1 – 14 – 27) axis, which breaks down tier by tier to **15 – 150 – 1500**; and along the (7 – 14 – 21) axis as a triangle, cross bar, and triangle that also equal **15 – 150 – 1500** respectively; and likewise along the (3 – 14 – 25) axis, where a triangle, cross bar, and triangle also equal **15 – 150 – 1500** respectively. It would have been enough that He arranged the cube so that His Name *Yah* (**??**) x *Alef* (**?**) or (**15** x **111**) = **1665** was built into it in so many ways. It would have been
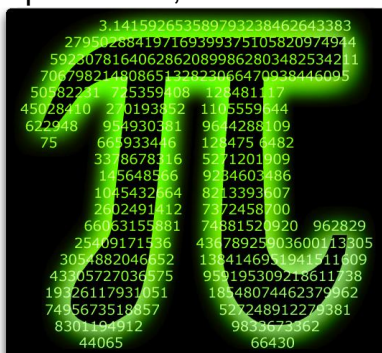

enough that He arranged the cube so that the vertical (1 – 14 – 27) axis also contained the **15** – **150** – **1500** progression in multiple other ways with the uppermost tier having a triangle of **150,** another of **1500,** and a bar of **15;** the middle tier having a triangle of **15,** and another one of **1500**, for a total of **1515**; and the bottommost tier having a triangle of **15,** another of **150,** and a bar of **1500**.

Dayenu.

It would be enough if He had arranged the cube so that the left face, or alternatively the back tier of the (3-14-25) axis, equals **1395**, which like the sum of the 6 Matriarch is the sum numerical value of the **6** Patriarchs—Abraham, Isaac, Jacob, Joseph, Aaron, and Moses. It would be enough if He had arranged the cube so that so many of its resultant values equaled **1665**, the complete value of those same **6** Patriarchs.   It would be enough if He had arranged the cube so that it reflected the numerical value of the names of the **12** Matriarchs and Patriarchs as collectively **3285**, and with the addition of Adam, **45**, the **13** would equal **3330**.

Dayenu.

It would have been enough that He arranged the cube so that the rear face, or vertical tier, equaled **855**, the location in Pi (**855**[th] digit) where we find the digital

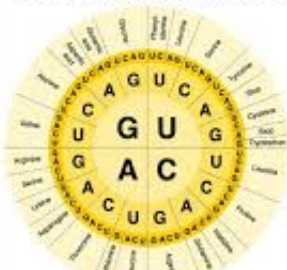

string …**1000**… that split the first **1000** digits into the sum of the **11** *sefirot* (**3804**) and **666**. It would have been enough that He arranged the **4** Essential Elements of Creation that comprise the **112** Triplets so that that each connects to **1000,** or the 10^3 cube of *Binah*: the **1000** letters of the *Shema* ; the sum of the square roots of the **72** Names that sum to **1000.0**; the difference between the Torah's first verse *Bereshit* **1:1** and the **42**-Letter Name, (**3701 -2701**) = **1000**.

Dayenu.

Codons
•64 possible codons
•20 different amino acids

It would have been enough that He arranged the cube so that the central cube that made it all work was associated with David (**14**) and with the letter *Nun* (**?**) of numerical value **50**, linking us to the **50** Gates of *Binah* associated with the jubilee year, and the necessary connection between *Da'at*, the **11**[th] *sefira,* and *Moshiach Ben David* (**424 + 50**) = **474**. It would have been enough that He arranged the cube so that the central cube that made it all work had an ordinal value of **14** and the letter value **50**, as in the (**50 + 14**) = **64** codons (Triplets) in our DNA, and as in Adam and Eve (**45 + 19**) = **64**, the two sources of life provided by the Creator. It would have been enough had **64** not also been a cube of **4³**.

Dayenu.
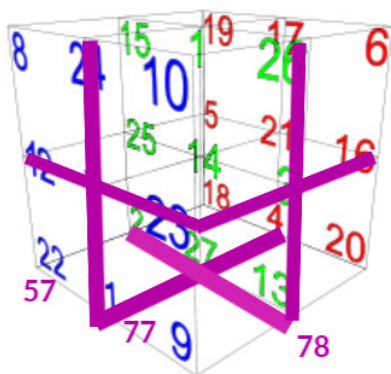

It would have been enough that He arranged the cube so that the sum of the crosshatches of **3** contiguous faces gives us **5778**: the bottom face (2,4,13,11,27) is **57**, the front face (12,24,23,11,7) is **77** and the right face (23,26,16,13,3) is **78**. It would have been enough that He arranged the cube so that the complete set of crosshatches (**417**), with the corners (**112**) and the center cube (**14**) or (**417 + 126**) = **543**, the numerical value of "I am that I am (?????????????)," considering there is the Pi (**3 – 14 – 2**5) triplet bar through the heart of the cube that could represent the small gematria (**3142**) of "I am that I am," and considering the Triplet *asher* (**???**) has an ordinal value of **42** like the two *Ehyeh* (**????**).
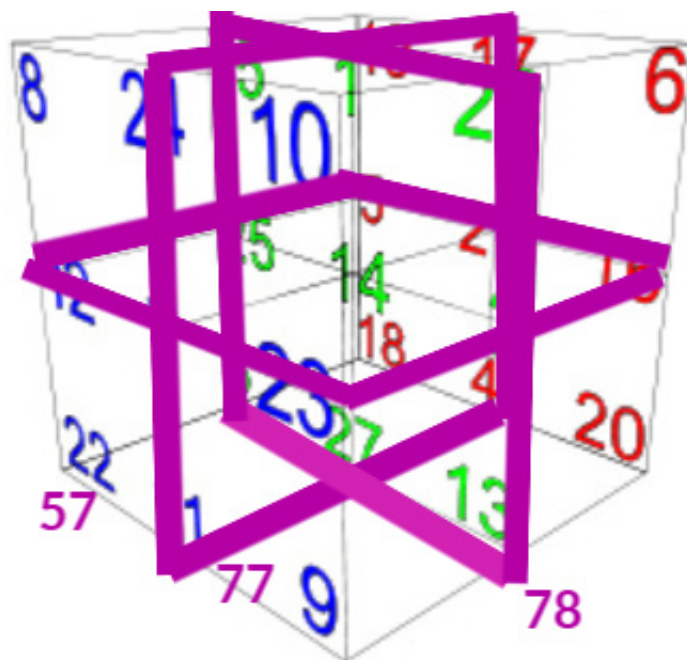

Dayenu.

It would have been enough that He arranged the cube so that each tier and several sets of parallel bars had not totaled **126** or (**3** x **42**). It would have been enough that He arranged the cube so that each of the **6** faces surrounding the central cube of **14**, the numerical value of David (**???**), each totaled **126**, the complete numerical value of King, *Melech* (**???**). It would have been enough that He arranged time so that the midpoint in King David's life (2889 HC) was also the midpoint from Adam to **5778**, given that He placed David's cube in the center of the **27** cubes and **14** is the middle number from 1 – **27**. It would have been enough that He gave us King David, who was born in **2954** HC, given that **2954** = ($14^1 + 14^2 + 14^3$). It would have been enough that David was **35** years old at the midpoint in his life in 2889 and that the **35**th of the **72** Names (**???**) has a value of **126**, and that Israel just formed its **35**th Government after **500** days, **3** elections and both **70** (last government) and **72** years, given that there is a triplet bar sequence in the cube (23 – 3 – 16) or in letter values (**500** – **3** – **70**).

Dayenu. Dayenu (**????**), represents the **6** (**?**)-sided cube of ordinal value **14** (**??**) and Hebrew letter (**?**).

Dayenu. Dayenu
