
Part XXXI Spherical Time – The Unmasking

Author : Meiliken

Date : 30-12-2020

Everyone repeats the mantra of how terrible 2020 was and they personify and blame the year itself, as if the year or G-d were to blame for the perceived misfortune. Many attribute the circumstances of 2020 to G-d's wrath, and/or a battle between good and evil, darkness and light, but there were no signs of G-d's hands in this, or even of a battle. There were no abnormal number of natural disasters or stronger than usual ones. Everything that happened extraordinary in 2020 was done by the hands of Man: the virus, the lock-downs, the wildfires, power outages, the rioting, the injustice, the rampant election fraud, and wanton violence against humanity, including the forced inoculations of lethal pathogens. Moreover, it was all one-sided, no battle, just an evil-minded hive taking over a complacent passive population. There was no fighting back. While every aspect of our lives was digitized, harnessed to 5G, and then centrally controlled, monitored, and reconfigured, some people fought back with memes, digital postcards. While all freedoms and civil rights were removed worldwide, no one lifted a gun or fired a single shot in defense.

We had a full year's time. Did the faithful fill the prohibited church pews and line the synagogue halls? When fear of the supposed plague struck and they told us to stay home and cover our faces in shame, did man seek out mercy and strength from G-d, or did he acquiesce and abandon His sanctuaries. Where was the defiance? Where were the martyrs? For the sake of fifty righteous men G-d told Abraham he would spare man. Even for the sake of ten. Where were those ten?

We can be grateful for those few that did, like those in Brooklyn who faced down the fire hoses and the antisemitic slurs of the NYC Mayor and NYS Governor who locked them in a ghetto and incited the puppet population to wage a pogrom against them for worshiping and celebrating G-d. Where was everyone else? We are still standing, so maybe it helped.

Some people spoke up. Some wrote about it. Yes, the odds seemed overwhelming. They always do. But did anyone stand up, rally people to the cause by acting, by being a hero, martyr or role model? Was there an active resistance movement?

No, this was no war, no Armageddon. There were no signs from heaven. One man did stand up, try to warn us, defend us the best he could. The love for him was palpable, in boat flotillas, highways lined with supporters, and the chanting at the mass rallies, but we the people stood by and watched him get figuratively crucified for his efforts on our behalf. No one went on strike, no one helped shut down the economy or cut the power to the tech Titans. No one stormed the capitals, state or national, in righteous indignation, demanding justice, a voice, freedom, or common decency.

No, there was no war. No signs of divine intervention, only *man* destroying humanity and willingly erasing civilization.

So, what did happen? As we have been explaining for a while now, we are in the event horizon and everything hidden is being exposed. It is not being overcome; it

is being exposed. At the edge of our Spherical Time Bubble, as the Torus folds back on itself, a wave of information hidden in time is tossed back into the mix. Crash landing where it does, it instantly becomes part of our wakened reality. It was always there and real, only now it was turned over to the light of day. Were once we were obvious, now we are furious.

We learned all about the evil machinations of the global deep state and the plans of the NWO; we saw all the fake numbers and false conflicting claims about the viruses, lock-downs, masks, and the efficacy of therapeutics, we saw the massive child abductions, abuse, sacrifices, and blood draining; we saw the corruption, the Chinese, Iranian and other foreign influence over our economy and politics; we saw the entire rigged election, digital and physical; we saw the absolute control they have over the MSM and the social media channels; we saw how we were sold all these life-changing devices only to be spied on by them 24/7; we saw how they took control of the education system and used it to create generations of automatons; we saw how they built this power base and how they enriched themselves and converted us to serfs and slaves over decades and centuries through credit and debt manipulation; we saw how we were manipulated by the pharmaceutical medical community, who we celebrated as heroes, into becoming dependent addicts. We all now know about the Fed and the central banks. We all now know about all the political assassinations, all the holistic doctors, virologists, etc. that mysteriously died by hammers to the head or by being hit with cars. We all know about the very long list of Clinton associates to have died the same way, including Epstein while he was in Barr's custody. We all know about the false flags and supposed lone gunmen that shoot from multiple directions while someone erroneously gives SWAT and local police stand down orders. We saw how there were no political parties, just deep state operators and patriotic populists and we saw exactly which side everyone was on, even in the highest courts. We all know about the Vatican and their alliance with the Illuminati, the eruv rav. We have all seen the chemtrails and geo-engineering. We may be skeptical, but we have all heard about and seen evidence about

underground tunnels, about evil aliens or inter-dimensional demons assisting the dark deep state and NWO. The same holds true about the Galactic Federation, the portal by the Sun, the stargates in the sky and elsewhere, and the endless daily sightings of unexplained spacecraft, cloaked giant triangular, spherical, oval, and rectangular shapes, punch holes, fiery vertical beams, and endless sighting of mysterious hovering and zooming lights in the skies.

Just a few years back, we heard of almost none of this. Yet, if you look today, the records are there, appearing faster than they can be deleted.

It was man's choice, our personal choice, whether to take that newly exposed knowledge and fight for goodness, justice, and freedom, for the light, or sit with it, and sink into the spreading darkness. Was it a fair fight?

No. Based on all we now know because of the forced exposure, everything was stacked against us, but no one tried. When the Israelites were at the raging Red Sea and the Egyptians were at their backs, someone (Nachshon) had to jump into the water. Moses had the tools to overcome physicality, the same tools that we will discuss today, but someone had to take the physical action and demonstrate his certainty. The stage was set this time as well, but no one rose to the challenge.

It is not G-d who is exposing all this darkness. It is being exposed automatically by the time mechanism designed by the Creator. The hand of G-d moves in broad strokes and we have yet to see it in action at this edge of time. The Torah has many examples of people using what we might call black magic and white magic, and of G-d intervening on behalf of the side of righteousness, yet when evil becomes overwhelming, the Creator no longer intervenes. He lets it well up fully, then He wipes it out completely to the very last person, including the complacent and the innocent. Only the actively righteous are spared.

No, we have not seen the Hand of G-d yet, only the reason why we might. Until we do, we still have time to do our part, even if the tipping point is upon us.

As it says in Genesis 18:28 in response to Abraham's plea: "I will not destroy it if I find **45** there," replied God." That was in the middle of the countdown 50..40..30..20..10 to destruction.

As with the destruction that occurred after that countdown above, the Torah and Zohar tell us that G-d typically sends his angels to do His bidding. Sometimes we find repeated obstacles in our path and it is the will of G-d protecting us from our own ego. Other times, He is giving us the space with which to figure things out. No one has faced more obstacles than **45**.

In the progression of those who held mankind's fate we see that Noach was the **10th** in the lineage of Adam, Man, of numerical value **45**. Abraham was the **20th**. Moses was the **26th**.

י
יוד
יהוה
יוד-הא-ואו-הא

The numerical progression is **10 – 20 – 26 – 45**. Altogether, they sum to **101**, and the protection of the archangel Michael. Time is running out, and yet it was stretched for us just enough for someone to jump into the water. For anyone that has not been following this series from its inception, you can find the [entire work here](#).

The Inner Workings

Along with the raw mechanical exposure outlined above, this brief time-period, or cosmic window, brings permission to reveal the inner-workings of the universe, and as such we have recently explained schematically how the key to unlocking the gates of Spherical Time is Love and Oneness. Next, we need to see how to apply that and to put all the tools together.

The specific dates in Spherical Time were not randomly chosen. We have seen much already, including:

$$2(2018\pi + 3760\pi) = 36304.24470$$

This formula based on the surface area of the spheres gave us the values of *H'Moshiach* (**363**), *Moshiach Ben David* (**424**), **42**, and **4470**, the sum of the first **1000** digits in Pi. The prescribed timespans act as diameters, given that the two radii $2018/2 + 3760/2$ add up to **2889**, the midpoint in King David's life and midway from Adam to *Moshiach* in **5778**:

$$4\pi(2889)^2/2889 = 36304.24470$$

Both equations reduce to:

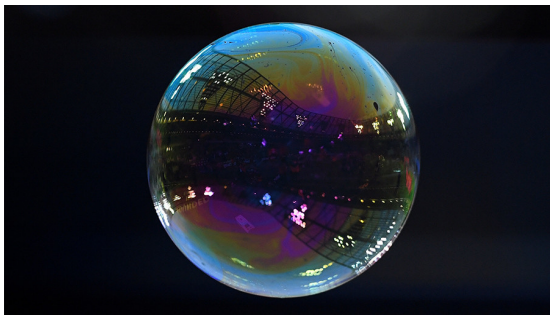

$$2(5778\pi) = 36304.24470$$

Moreover, while it is possible that $36304.24470/42 = 864.387\dots$ refers to the diameter of the Sun considering that the Sun's surface Temperature is **5778** K, there is a more impressive derivative equation. When we divide the *Moshiach* result by the great precession discussed in the previous chapter, we get $36304.24470/25,920 = 1.400\dots$ as in the ordinal position (**14**) in the center of the Essential Cube of Creation and as in King David(???) of numerical value **14** at the exact center of the **5778** year and whose midpoint in his life was in **2889** HC.

$$\frac{2\pi(5778)}{25,920} = 1.400$$

What this is telling us beyond the obvious, is that the circle of Spherical Time is **1.400** times the size of the circle of the great precession of the Earth's axis. Once again, we see the cosmos tuned into Spherical Time like the precision windings and gears of a Swiss watch.

Another example of the specificity of these dates is found in the value **5778** itself, whereby the **4** unique pairings of its digits: $(5 + 7) = 12$; $(5 + 8) = 13$; $(7 + 7) = 14$; $(7 + 8) = 15$, gives us $(12 + 13 + 14 + 15) = 54$, while $(1 + 2 + 1 + 3 + 1 + 4 + 1 + 5) = 18$. While $\text{Phi}^{18} = 5778$ and $(54 \times 107) = 5778$, those two numbers (**54** and **18**) are also central to Spherical Time as discussed in the previous chapter.

The Spherical Time bubble is trifold in that the radius of the superimposed **3760** bubble is **3760** years and that of the **2018** bubble is **2018** years, and when Time is traced back to the far extreme edge of the **3760** bubble, as in **3760** BCE, and forward to the opposite far extreme edge of the **2018** bubble their total time elapsed is **5778** years. Therefore, **5778** years is the diameter of the Spherical Time bubble, and as $\text{Phi}(\?)$ begins in the center and crosses year 1 it spirals outward, crossing year **5778.000** after **18** turns upon itself. That journey circumnavigated the bubble $18/\text{Phi}(\?)$ or **11.12...** times.

Moreover, while $(5 + 7 + 7 + 8) = 27$ and $(3 + 7 + 6 + 0 + 2 + 0 + 1 + 8) = 27$ hint at the **27** positions and **27** letters in the Essential Cube of Creation, the sum of the digits in the **3** Spherical Time bubble dates naturally = **54**, and as previously shown in chapter 30 and elsewhere the value **54** points to the Love in the heart of Creation.

There is another way we can equate these two separate time frames, that of the simultaneous **2018** and the **3760** radii. Instead of the second inner sphere suddenly appearing after 3760 years as a linear time frame would have it (**0 - 3760** HC (**0** CE) – **2018** CE), what if both spheres came into being in our physical plane at the same moment yet their rate of pacing time was

different.

If time in the **2018** sphere advanced at **1/100,000** of the speed of light faster than the other scale (the peace **3760** sphere) then both time frames (spheres) would reach the same point in time precisely in the years **2018** and **3760** respectively.

So what does that mean? It means the hours in the day in our Western (**2018**) time frame would be **44.70** hours compared to the **24** hours in a day as we perceive and/or define them. Yes, it seems like an odd number, but **24** was an odd arbitrary number as well when it was first chosen.

We have seen and gone into great detail about the usage of the cosmic clock of **12** on multiple levels and how **24** plays into this with day and night etc., but there is more to it than that. The value **24** is the equilibrium aspect between the years **3760** and **2018** in that the sum of the ratios **2018/3760** and **3760/2018** together is about as close to **2.4** as you can get (2.3999). Given **3760** years as a starting time frame, any other year (higher or lower) paired with its corresponding year on the other calendar gets further and further away from the **2.4** aspect limit.

We will explain the $100,000^{\text{th}}$ of the 186,282 mps speed of light shortly, but meanwhile it is extremely important to understand that Spherical Time does not work without the Pi hyperfield and that the number of hours per day in physical time (the **2018** sphere) vs the **24** hours per day in the spiritual time **3760** sphere is **44.70**, as in the **4470** total value of the all-important first **1000** digits in Pi. These are the same **1000** digits where both calendars are marked side by side **3** times. Moreover, the logarithm of **4470** is **3.650**, which again is significant considering we are talking about counting time and there are **365** days in a solar year of the Earth circling the Sun. As the Sun is the chief source of our light this brings us back to the ratio of **44.70/24** hours or 1.8625, nearly exactly $1/100,000^{\text{th}}$ the speed of light, **186,282** mps. There are two other connections between Spherical Time and the speed of light which we will cover later in this chapter, one is far more precise and the other has to do with the **72** triplets.

We will explain more about this time duality soon, meanwhile there is more we need to learn about the tools we need to use to harness that dynamic.

A Cosmic Window Opens

Since $(5 \times 7 \times 7 \times 8) = 1960$ and $(3 + 7 + 6) = (2 \times 1 \times 8) = 16$, we see that $(1960/16) = 122.5$ and that $?1225 = 35$. Then while $(3 \times 7 \times 6) = 126$, as in the sum of each of the faces and planes in the Essential Cube of Creation, we have $(3 \times 7 \times 6) - (2 \times 1 \times 8) = 110$, the conjunction point of the 1.1 and the 27.5 Primal frequencies, and furthermore, $(126 - 122.5) = 3.5$.

While $(3.5 \text{ years} \times 12 \text{ months}) = 42 \text{ months}$, the same can be applied to each cycle of 12. We saw in the element of physicality, the Pyramid, that of its 210 levels there is a singular double thick layer of stone at its 35th level, and again we saw in the element of time that the 35th verse of the Torah holds the first double Name *YHVH Elohim* (????? ?????) of numerical value 112, as in the 112 Triplets found in the Torah.

It may be just a coincidence that Chanukah (?????) of numerical value 89 is the sum of $(54 + 35)$, but it is no coincidence that the 89 verses of Numbers (*B'midbar*) 7:1-89 contain the specific lists of sacrifices read every day during the 8 days of Chanukah and that they form a bundle of 12. Nor is it a coincidence that the ordinal value of *YHVH Elohim* (????? ?????) is 67, as in the numerical value of *Binah*, the emanated source of the energy of Chanukah, and that the complete value of *YHVH Elohim* (????? ?????) is $(112 + 67) = 179$, the value of *L'hadleek* (to ignite) recited in the Chanukah blessing over the candle lighting. It is through this lighting that the 112 Triplets are engaged, and their power is drawn into our world from *Binah*.

Nor was it coincidental that $(89 + 67) = 156$, the central cosmic point *Zion*, represented by Joseph, reachable when the 8 days of Chanukah are properly connected to *Binah* hyperspace.

The Sacrifices

The full set of Chanukah sacrifices stretch through Numbers 7:1-89 in *parsha* Naso and through Numbers 8:1-4 in *parsha* BeHa'alothekha. The combined value of the names Naso and BeHa'alothekha $(351 + 1007)$ is 1358, the same as *Baruch Shem* that we recite silently after each of the 4 Essential Elements of Creation, assisting the connection to *Binah* (1000) and to *Moshiach* 358, basically *Moshiach Consciousness*.

The laundry list of sacrifices that we read about in the portion of Naso, on each of the 8 days of Chanukah and that were to be made by the 12 tribes in the *Mishkan* or Holy Temple include: 1 Silver plate weighing 130 shekels; 1 Silver bowl weighing 70 shekels; and 1 Gold bowl weighing 10 shekels; plus 1 Young bull; 1 Ram; 1 male lamb (1 year old); 1 male goat; 2 oxen; 5 rams; 5 male goats; 5 male lambs (1 year old).

In total, each of the **12** Tribes was required to bring **24** items, connecting to the **24** adornments of the *Shechinah* (the **24** Books of the Tanakh) and of the High Priest, and connecting the cosmic clock to the **24** hours in a day.

It is an odd group of items, but with everything in the Torah, there is always a method in the madness. $(130+70+10+1+1+1+1+2+5+5+5) = 231$, as in the **231** Gates of Wisdom, which we know from Abraham's *Sefer Yetzirah* are the number of pairs of letters that can be made from the **22** letters of the *Alef-bet*, which he called the **22** building blocks of the universe. The value **231** is also the sum of the ordinal values from 1 – **22**.

Besides helping us to cancel out the sins that our souls committed when they were joined as one within Adam during the **130** years that he was separated from Eve, the **130** shekels of silver for the plate that we sacrifice each day correspond to Jacob's age when he entered Egypt to begin the exile in Egypt. This itself is no coincidence as his **130** years also served to mitigate that self-same sin of Adam. The value **130** is also that of Sinai, where the Israelites received the Torah **210** years later. Of course, if we add together the weight of the silver and gold (representing right and left column energies) we get $(130 + 70 + 10) = 210$. Once again, written in Stone; written in Time. Written for us.

By way of further explanation, the **70** shekels of silver correspond to the **70** family members with Jacob who entered Egypt. It also represents the **70** nations of the current exile and the year **70** CE when the Second Holy Temple was destroyed and the current exile began. Moreover, as we will see by the end of this chapter, it also refers to the final **70** years.

The **10** shekels of gold correspond to the **10** utterances received at Sinai and the **10** *sefirot* (dimensions) of the Tree-of-life. Moreover, while the full weight of metals was **210** shekels corresponding to the **210** years of the Egyptian exile, the value of the word Shekel (???) itself is **430**, corresponds to the **430** years of the full first exile from the *Covenant of Abraham*, which began in **2018** HC and ended with the crossing of the Endless Sea and the reception of the Torah at Sinai in **2448** HC. Moreover, the complete value of Shekel (???) is 482, close enough to 481.25 to make the **210** shekels meaningful in another way. Written in Stone(physicality); written in Time. Written for us.

Just as the **8** candles total $8 \times 250 = 2000$ in value and connect to the **2000** generations (iterations) of time—*Notzer Chesed L'Alafim*, the **8th** of the **13** Attributes—so too do the **200** shekels of silver and the **10** shekels of gold: $(200 \times 10) = 2000$. These are both processes integral to the grand design.

This is also why the **4** central letters of the **72** Triplets (????) total **210**. Written in Stone(physicality); written in Time. Written in Ether. Written for us.

וזהו	ילי	סיט	עלם	מהש	ללה	אכא	כחת
הזי	אלד	לאו	ההע	יזל	מבה	דרי	הקם
לאו	כלי	לוי	פהל	נלך	י	מלה	זזהו
נתה	האא	ירת	שאה	רי	אום	לכב	ושר
יזו	להוז	כוק	מנך	אני	זועם	רהע	יז
ההה	מיכ	וול	ילה	סאל	ערי	עשל	ביה
והו	דני	הזוש	עבום	ננא	נית	מבה	פוי
נמם	יל	הרוז	מצר	ומב	יהה	ענו	מוזי
דמב	מנק	איע	זזבו	ראה	יבמו	היי	מום

Another secret within this weight is that “210 shekels (???)” are equivalent to a numerical value of $(210 \times 430) = 90,300$ or (903×100) , with **903** being the sum of all the positive integers through **42** and since there is a spiritual tenet that nothing is ever lost, **903** is the full inclusive value of **42**. This also ties back to the $(89 + 4)$, or **93** verses read during Chanukah.

The word shekel (???) is concentrated within these verses, indeed more than half the times it is found in the entire Torah is among these few verses. It is found **3** ways in these verses, as *Shekel* (???) , as *B'shekel* (????) and as *Mshekelah* (?????) so that the two prefixes are (??) or **42** and the **3** initials (???) are the same as the *Shem Mem-Bet*, the **42**-Letter Name, with the addition letters in *Mshekelah* (?????) being (??), **45**, or Man.

Moreover, during those **93** verses, the word shekel (???) is repeated **26** times, as in the *YHVH* (????), **14** of those **26** times it is as as *B'shekel* (????) and **12** times, corresponding to the Cosmic clock, it is pure *Shekel* (???) . Of further distinction is that the value of the word shekel (???) spelled out (*gematria milui*) is **620**, that of *keter*, the highest, crowning *sefira* (dimension).

The famous phrase *Shekel B'Shekel H'Kodesh* is also found **12** times in this special Chanukah reading that aligns the **12** Tribes with the **12** hours of the Cosmic clock. Meanwhile, the **3** words in it are found **12**, **14** and **15** times respectively, turning the **14** Triplets of the **42**-Letter Name and the **15** Triplets of the *Shema* (Upper **42** letters of the Name) with each hour. Those (29×3) letters times **12** hours = **1044**, as in the **44** Chanukah candles

Meanwhile, the word *H'kodesh* (????), the Holy, in *gematria milui sofit* has the numerical value of **2008**, as in 8×250 candles (??) lit on Chanukah.

Moreover, within the **3** words of the phrase *Shekel B'Shekel H'Kodesh* the first two letters of shekel (???) are repeated in each, leaving (??), meaning “the **4**” of numerical value **9**, as in the separate **9th** candle, in *H'kodesh* (????). Collectively that is $3 \times (??)$ plus (???) plus (???) , which works out to $1200 + 101$ for each phrase and $(12 \times 1200) + 1212$ for all **12** repeated phrases. The total is **15612**, which can be interpreted as Joseph and *Zion* at the center of the

Cosmic clock again, or “the covenant (**612**) of Joseph.”

Furthermore, the **3** words in the phrase *Shekel B'Shekel H'Kodesh* are found **41** times in the reading, as in the **41** letters in the **3** iterations of the Higher Name *Ehyeh* (????), and the average value of these **41** occurrences is $((15 \times 409) + (12 \times 430) + (14 \times 432))/3 = 5781$, this current year in the Hebrew Calendar. Reducing it by the *kolel* gives us **5778**, the edge of the Spherical Time bubble.

5845 Verses

Then there are also **6** different phrases throughout the sacrifices that have a numerical value of **5777**, (representing the year **2017** CE when **45** was inaugurated). We know the connection of the number **13** to Spherical Time and Creation, so it is significant that of the **5845** verses in the Torah, there are only **13** incidences where the value of a phrase that occurs wholly within a single verse has the value of **5777** and one of those is verse Numbers **7:87** of the sacrifices. It is the summary verse for all the sacrifices: "...**12** young bulls, **12** rams and **12** male lambs a year old, together with their grain offering. **12** male goats..." As the sum of all, **12**, it is the culmination of time and it aligns with the number **13**, *Ahava* (love) and *echad* (oneness) and the year **5777** HC, coinciding with the inauguration of **45**.

All in all, **2520** shekels were offered for the sacrificial basins and bowls and **252** animals were sacrifices. This worked out to **60** x **42** shekels and **6** x **42** animals. Interesting how that worked out.

As for the year **5778**, amongst the **93** verses of the sacrifices there are **16** occurrences of phrases (defined as a contiguous grouping of words) that have the total value of **5778**, the last of which is in the final verse of the sacrifices, Numbers **8:4**, where we find the **22**-word phrase "...the Menorah, just as the Lord Commanded Moses. This is how the menorah was made: It was made from hammered gold...had shown."

And not coincidentally, the number **84** (or twice **42**) represents *Pad*, redemption, the union of the upper and lower *Mem-Bet* (**42**-Letter Names) necessary for the *geula*. Every part of the Torah is designed to convey clandestine messages, connect impossible technology beyond our existence, and to support our chances to override the space-time continuum, in other words to escape the Spherical Time recycling bubble. There are **5845** verses in the Torah and the numbers **58**, **84** and **45** all have meaning, multiple ones. The number **58**, while representing the entire Torah in multiple ways, also is the value for Noach. The number **45** is Adam, Man and the **45th** President of the **13** Colonies. Between Adam and Noach there is $(58 - 45) = 13$ and **84**, Love and redemption. When we add **58**, **45**, and **84** we get **187**, the number of chapters in the Torah and the **12th** Triplet (???) of the **42**-Letter Name.

Of the **5845** verses in the Torah, there are **184** phrases found wholly within verses, or **3.14%** of the total verses, that have a value of **2019**, as in **2019** CE. And of these **184** phrases, **35** are within the **93** verses of the sacrifices, an improbably large percentage. Moreover, **184** is the numerical value of *Pkad*, which *chazal* has independently connected to the coming of *Mashiach* and which we wrote about in a previous blog.

So, of the **93** verses of the sacrifices, fully, **57** (6, 16, and 35) are either connected to the year

2017 (5777), 2018 (5778), or 2019 and another **41** times specifically to **5781** and/or **5778** through the repeated occurrences of *shekel b'shekel h'kodesh*.

There is no statistical way that this is coincidence. And if you grabbed a calculator and did the math, you saw that **57/93 = Phi (.6180...)**. Even more precisely, it worked out as **57/93 = .612903**, or **612** (*brit/covenant*) and **903**, an allusion to the *mem-bet* (**42**-Letter Name) as described above.

Counterspace

Please pay close attention. This is a new concept and unique to higher-dimensional mathematics. All space in physicality and the Ether is cumulative as is energy. Space and energy are one and the same. We see this cumulative effect in the sum of the numbers, **1 – 42** being **903**, the design of the Essential Cube of Creation; **1- 424** (*Moshiach Ben David*) being **90,100**, precisely equivalent to the total occurrences in the Torah of the letters *Yud* (?), *Hei* (?) and *Vav* (?); the sum of: **1 - 73** being **2701**, the value of the Torah's first verse; and **1 – 77** being **3003**, the value of the **11** Triplets that comprise the first **8** words of the Torah, etc. What is new is that counterspace is also cumulative. The counterspace of **89** is (**100 – 89**) at the level of *Zeir Anpin*. We know the value **89** has been assigned to Chanukah and all the cosmic flow from *Binah* that is transferable during those **8** days. One higher way to peer into that counterspace is to see that the sum of the squares of **1² – 11²** is **506**. It is not a coincidence, which means it was designed so that **1²** is on a certain level **12**, as in the **12** hours of the cosmic clock, and that **11²** on that same level is **112**, as in the **112** Triplets. The system was also designed so that **506** would be the first row (two Triplets) of the **42**-Letter Name matrix, and that it would be the numerical value of the Hebrew word for "Unconditional Love," and so that it would be the numerical value of *Moshiach Ben David* spelled out; and so that (**506 + 112**) would equal **618**, Phi(?).

The cumulative sum of **1 – 89** is **4005** and its counterspace element is **90...100** or **1045** with both balanced elements transferring a connection to **45**. This connection was so important that it was the only balance point whose counterspace (**90...100**) would synch with **90,100** and thus the **1820** *YHVH* (????) in the Torah and the value of **424** (*Moshiach Ben David*).

If we were to have any doubts about the validity of this hyperspace mathematical approach, we need only look at the counterspace cumulative of the number **10**, upon which all our mathematics hinges, and upon which the Tree-of-Life and the **10** *sefirot* of the Flow of Creation are generated. It is (**11...100**) = **4995**, the sum of the **27** letters of the *Alef-bet*.

And since this chapter is mostly about the cosmic **8** day window of Chanukah, we see through the instrument of counterspace hyperdimensional mathematics that the **11** Triplets of Creation correspond to **33** letters and that the counterspace cumulative counterpart to **33** is (**34...100**) = **4489** as in the **44** candles of Chanukah of numerical value **89**, exactly **506** less than **4995**. Moreover, the ratio of the cumulative sum of **1...33** to its counterpart, or (**4489/561**), is **8.001...**, as in the **8** days of Chanukah.

If your mind is not blown by this, then you are not following, and I suggest you go back over it before continuing. Every revelation, especially into higher-dimensionality processes is an expansion of our consciousness that was not previously available to us. These are special gifts

to us from the Creator.

The 4 Essential Elements and Cumulative Space

The **112** Triplets are comprised of the **42**-Letter Name, the **8** first words of the Torah, *Shema*/Upper **42**-Letter Name, and **72** Triplets. Their average value is $(3701 + 3003 + 1118 + 9143) = 16965/4 = 4241.25$, an Ethereal allusion to **424** (*Moshiach Ben David*), **42**, and **412.5** which is the Major Seventh (M7) or **412.5** Hz and also to **3** times the Phi(?) angle or $(3 \times 137.5^\circ)$, or **3** turns of the great hand *YH(??)* times the cubit: (15×27.5) .

We can use simple counterspace dynamics to look at them from another angle. The simplest view shows us that their sum, **16965**, is also $(17,000 - 35)$, meaning the value **35** completes the **4** Essential Elements of Creation. It makes them *Tov(???)*, good, of numerical value **17**.

Why is **17** good? The value **17** has a balancing point between its spatial and counterspatial cumulative values of $(4897/153) = 32.00\dots$, as in the **32** Pathways of Wisdom and the Tree-of-Life.

Another way to view them is seeing them complete the value **18,000**, as in $(18,000 - 1035) = 16965$, with **1035** completing them. When we do that, we see that $(18,000/4) = 4500$. This reminds us of the Chanukah connections to the cumulative sum of $(1 - 89)$ is **4005** and its counterspace element of **90...100** or **1045**, and indeed **1045** is only **10** more than **1035**. The value **45** being that of Man and Adam at the start of time and President **45** at the end is an interesting concept. Also, the value **18** in Hebrew is universally connected to life, *chai*, and to those that understand to *Moshiach Ben David* through its square root ($4.2426\dots$).

It is also interesting that the counterspace value **1035** divided by the **5** Essential Elements being $(1035/5) = 207$, the numerical value of Light, *Ohr*. Of course, $(18000/5)$ is **3600**, which is **900** less than the average result of the 4 elements (**4500**), showing us that since $(4 \times 900) = 3600$, the **4** Essential Elements balance the core **5th** Essential one. **5** Kings vs **4** Kings.

What is interesting is that there are **5** final letters (?????), there are exactly **1035** final letters *Zadi* (?) in the Torah. The final letter *Zadi* (?) is the **27th** and last Hebrew letter and has a value of **900**. While the **27th** is eternally reflective of **207**, the Light, the letter's value, **900**, is the result of the equation above $(18,000/4) - (18000/5) = 900$.

Moreover, $18000/900 = 20$, representing the letter *Caf* (?) that has a very interesting property. When spelled out, the letter *Caf* (??) has a value of **100**, or alternatively **820**, as in the Torah verse, "Love thy neighbor as thy self," which appears to be the antidote and anthesis for what we are experiencing in **2020**. As it happens, the letter *Caf* (??) exemplifies the spatial-counterspatial relationship in that $(20 + 80) = 100$, and its cumulative sum of $1\dots20 = 210$ with its counterspatial cumulative sum of **80** or $81..100$ being **1810**, which together sum to $(210 + 1810) = 2020$.

This is why the *Alef-bet* was designed so that the letter *Caf* (?) would be the single closest letter to exponential curve of **1.313**.

We could connect the dots to **210**, and **1810** being **8** less than **1818**, the sum of the **3** iterations

of the *Alef*(?) and with **181** being the **42nd** prime number, but of equal significance is that when we separate out the **1035** final letters *Zadi* (?), the remainder of the letters *Zadi* (?) total **2927**, as in all years up to the construction of the First Holy Temple in **2928** HC.

It also seems as if the Creator is telling us that the final letter *Zadi* (?), the **27th** letter in the *Alef-bet*, somehow, in its **3³** and **30²** construction, represents the **5th** essential element, the Essential Cube of Creation.

The difference between the **4** Essential Elements counterspace value **1035** and the Chanukah counterspace value **1045** is **10**. While we cannot be certain why the Creator designed these cosmic equations this way, we do know that **10** is always an allusion to the **10 sefirot** (dimensions) of the Tree-of-Life. The value **10** is also the sum of the numbers 1 – **4** and unique amongst the cumulative counterspatial values from 1 – 100. The sum of the counterspace values from 5 – 100 is **5040**, as in **7!** factorial and the sum of the radii of the earth and the moon together. What makes it unique though is that all the sums of the digits in all the other counterspatial and spatial pairs equals either **19**, **28** or **37**, all referential to the Torah's first verse, while the sum of the digits of the **10** and **5040** pair that corresponds to the number **4**, equals **10**.

We do not yet know why all the others must equal **19**, **28** or **37**, only that this pairing is the only exception and that the sum of all the digits in the 99 pairs is **2928**, as in the year the First Holy Temple was built in **2928** HC, when 2 is added for the *kolel* of the pairings. What we do know is that **(19 + 28 + 37) = 84**, and as just reiterated, it is twice **42** and it represents *Pad*, redemption, the union of the upper and lower *Mem-Bet* (**42**-Letter Names) necessary for the *geula*.

Also, as if by magic, which is just hyper dimensional transference, the sum of the integers from 1 to **10**, taken as a fraction of **10**, in other words **10** divided by each of those **10** integers, add up to **(10/1 + 10/2 + 10/3...10/10) = 29.28...**, which is yet again a reference to the year (**2928** HC) when the First Holy Temple was constructed.

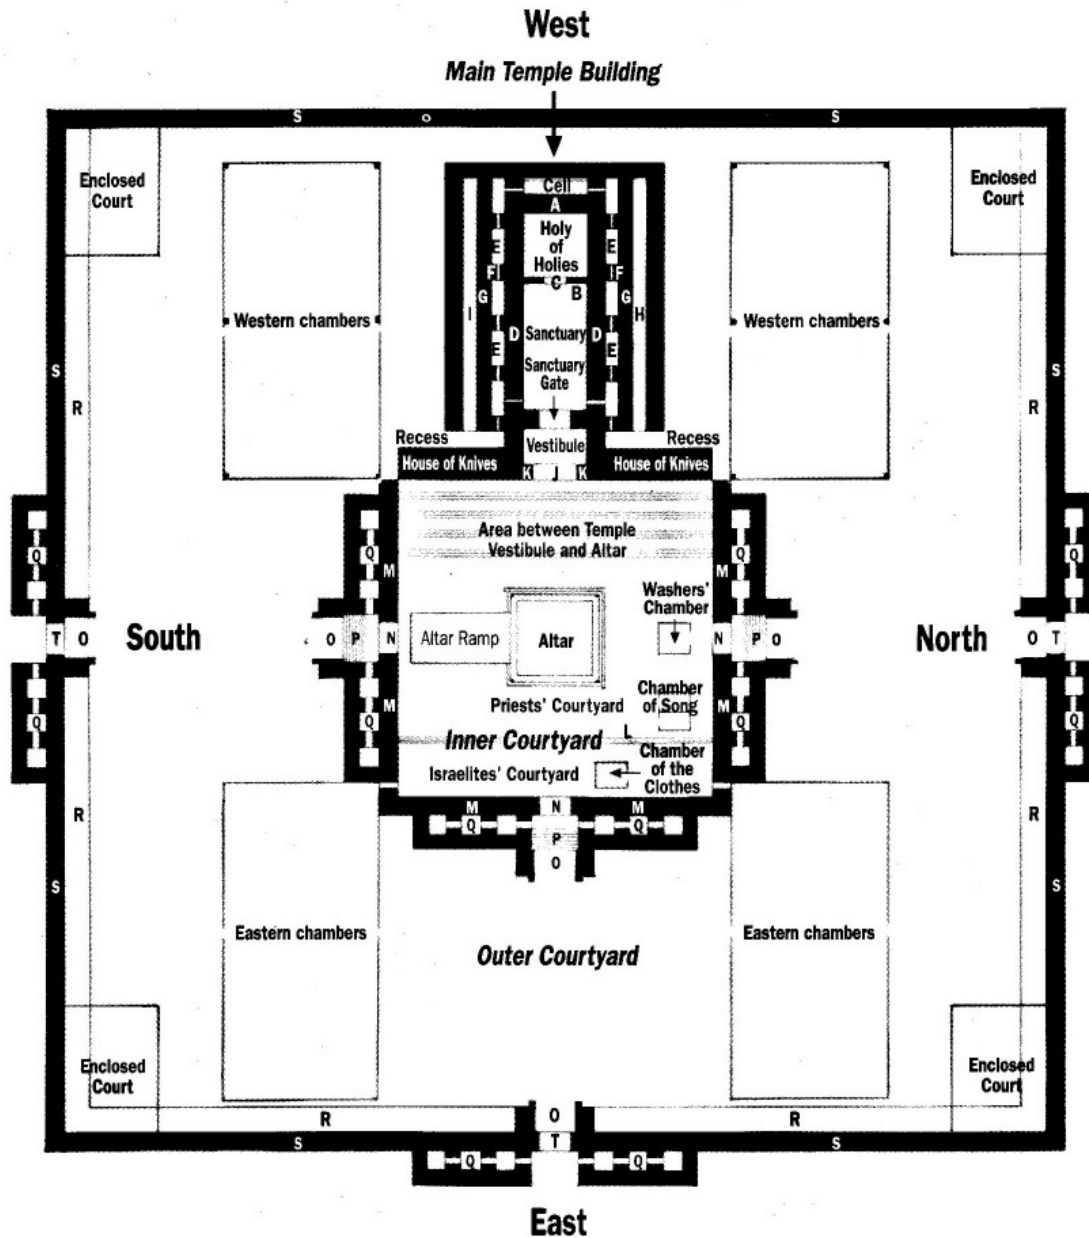

The sum of all 99 counterspatial cumulative sums is **333,400**, a possible reference to **4** years before the First Holy Temple was destroyed in **3338** HC, a process that began with the siege of Jerusalem on the **10th** day of the **10th** month, **18** months before the stones of the Holy Temple fell, **410** (???) years after it was built. What is written in the Ether is written in Time and then written in Stone (physicality).

Here is another deep secret. The value **410**, as in the first Triplet of the **15** that contain the Upper **42** Letters of the Name, also pertains to the initials of "the tip of the *Yud* (????????????)," referring to the highest of the highs, *Keter*, *Atzilut*. The Triplet (???) and the 3 initials (???) also share the same ordinal value of **50**. This is a great hint in the order of arranging the **4** sets of Triplets around the central Cube of Creation. We can thank the *Yenuka* for opening this connection.

In addition, with the flame of *Lamed* (?) in the middle and with its complete value of **42**, like the central Essential Cube of **42**, the rest of the letters (?????) total **112**, completing the design for those that understand. Moreover, the ordinal value of the 3 sets of letters is **(50 + 12 + 40)** and with the *kolel* of the **9** letters, it becomes **111**, as in the Primordial Alef (?) upon which the **4** sets

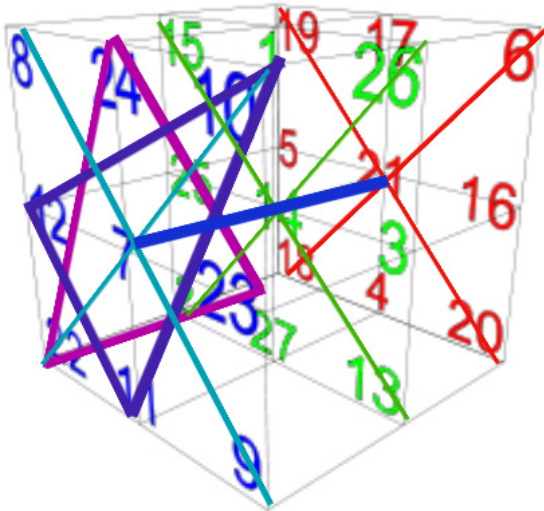

of Triplets rest.

Plan of the Third Temple

Key:

- | | |
|--|--------------------------------|
| A: Back wall of Holy of Holies | K: Vestibule Wall |
| B: Wall of Holy of Holies | L: Platform and Duchan |
| C: Entrance to Holy of Holie | M: Inner Courtyard Wall |
| D: Sanctuary wall | N: Inner Courtyard Gate |
| E: Cells at the sides of the Sanctuary | O: Vestibule of the Gate |
| F: Cell wall | P: Eight steps |
| G: Exterior wall of cells | Q: Cells by the gate |
| H: Winding staircase | R: Elevated paved gallery |
| I: Rainwater spout | S: Wall of the Outer Courtyard |
| J: Vestibule Entrance | T: Gate of the Outer Courtyard |

As stated previously, **10** is also special because its cumulative sum is **55** and its counterspatial sum is **4995**, the sum of the **27** letters of the *Alef-bet* and also the **27** letter value of the Essential Cube of Creation. This is important on so many levels. One reason is that we do actually know why the complementary pairs to 100 must equal **10, 19, 28, or 37** and if there were more digits, in other words complementary to 1000 or 10,000, the next values in the sequence would be **46, 55, 64** and **73**. Since the two sets of digits added come from complementary numbers, it has to do with the dynamic of **10** and bundles of **9** similar to what we saw with the residues of the primal frequencies (1.1 and 27.5). Think of (**10, 19, 28, and 37**) as little equations unto themselves: (10, 1 x 9 + 10, 2 x 9 + 10, 3 x 9 + 10).

The math behind it is wordy to explain and not so relevant, so we should not get bogged down in it, only that none of this explains is why those numbers were chosen to be embedded as the dynamics of the **28** letters of the Torah's first verse, whose last two words "and the earth" equal **19 x 37**. We can obviously add **73**, as the 7 words equal **37 x 73**, and as the sum of the integers to **73**. Also **64** played a part when we looked at all the combinations of those 7 words. What is curious is why it did not work out to **54**, as in the value of the first 5 words is **37 x 54**. It worked out to **55** instead, which we have seen as 2 cubits of **27.5**, the **10th** Fibonacci number, etc. It worked out to **46** as well, the numerical value of *me'ah* (???), *amah* (???) and *ha'em*(???), or **100**, cubit, and the mother (*Binah*) respectively, so perhaps they go hand in hand in the cosmic scheme of things.

Mathematically, they fit the dynamic perfectly; nevertheless, the missing **54** is curious, especially in light of its integral connections with Spherical Time. Yet there is an equivalent to this in the Torah, were we find the Hebrew word for "went" *V'Yetzei* (????) has a numerical value of **107** and is likewise found **55** times and not the expectant **54**. Like, we saw with **73** and the first verse, the sum of the integers to **107** equal **5778**, which is also **54 x 107** and hence why we would have expected **54**, and not **55** occurrences in the Torah. Perhaps, both instances are related and are conveying the same message. It was so important that *V'Yetzei* (????) was named one of the **54** portions of the Torah.

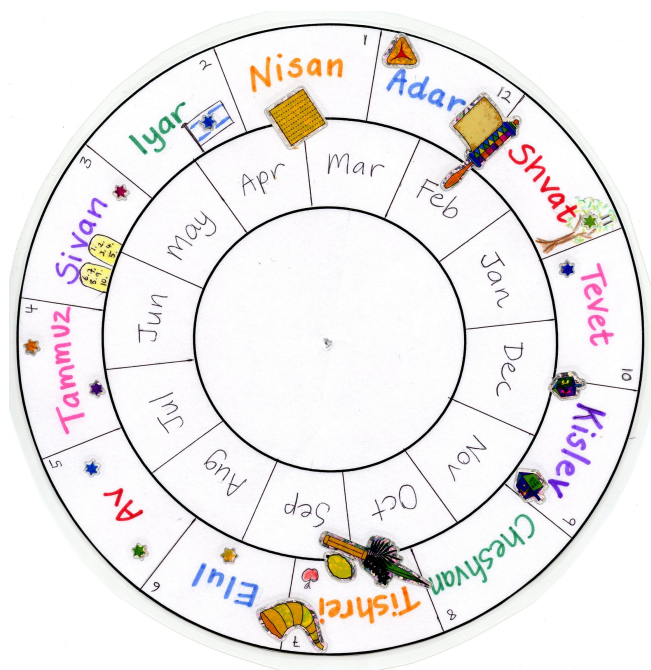

By the way, as an aside, if we subtract the ordinal value of **35** from *V'Yetzei* (????), we get (**107 - 35**) = **72**. It is funny how the Torah drew our attention to this and *V'Yetzei* (????) complements the 4 Essential Elements of Creation as **17000** = (16965 + **35**). Written in stone, time, and the ether, over and over again.

Moreover, as covered in prior segments, the **4 Essential Elements** of the **112 Triplets** each contain an element of the cubic nature of 10^3 , or **1000**, their link to *Binah*. There are **1000** letters in the *Shema*; the **72 Triplets** have an **8 x 8** square of **8 x 1000** built into their design; and there is a difference of **1000** between the **42-Letter Name** and the Torah's first verse (3701 – 2701). Altogether they total (**1000 + 1000 + 8000**) = **10,000**, which equals a hyperspace cube of 10^4 .

The Annual Circle of Time

What you are about to read overturns everything we ever thought we knew about the holidays, at least Chanukah. Chanukah begins every year on the **25th** of Kislev, **89** days from the day of Creation, the **25th** of Elul. You thought Purim is about drinking and masks? That might be, had we did not realized that the gematria of Purim (?????) is **336**, as in the **336** letters in the **112 Triplets**, so many of which are hidden in the *Megillat Ester*.

The Hebrew Calendar is a complicated give and take with the progression of the holidays as it tries to set and reset the lunar calendar with the solar ones. Each month alternates between 29 and 30 days so that it will average out to the 29.5 day lunar month. Every 7 out of 19 years an extra 30 days is added as a 13th month to even out the calendars and 3 extra days are added on the 7th of those leap years. On a normal year, 12 out of every 19 years, the cycle of holidays is **358** days from let us say Shavuot to Shavuot.

All the holidays are really specific cosmic windows, and the distance between them will seem very familiar. We just mention the **89** day interval to Chanukah. There are **107** days between Shavuot to Rosh Hashanah and **107** days again from Chanukah to Pesach, and **50** days from Pesach to Shavuot. There are **42** days from Zot Chanukah to Tu B'Shvat, then **110** days to Shavuot. In between, there are **72** days from Zot Chanukah to Purim. There are **26** days from the Day of Creation to Shemini Atzeret and **27** to Simchat Torah. Like the **50** days from Pesach to Shavuot there are also **50** days from Chanukah to Tu B'Shvat.

We all know about the **50** day counting of the Omer between Pesach and Shavuot, and the **8**

days of Chanukah, but what about the **107** days from Chanukah to Pesach or the subsequent **107** days from Shavuot to Rosh Hashanah or the **84** days from Rosh Hashanah to Chanukah again, completing the **358**-day annual cycle?

This is the cosmic calendar according to the cosmic clock, counting from Holiday to Holiday or window to window. As an annual lunar device, it is actually **12** lunar months or **12** x 29.5 days, which is **354** days per cycle. Over the **12** normal years, **12** x **354** or **12²** x 29.5 days pass, which equals **4248** days, as in the **4248** total sum of the 22 spelled out letters of the *Alef-bet* and the Primal Equation $1/.23571113... = 4.24248100...$

The extra month added in the **7** leap years causes those **7** years to total 2688 days and the difference between the two sets of years (4248 – 2688) = **1560** days, or Joseph/Zion (**156**) x **10**. This difference is the **13th** month added **7** times.

Over two years (**2** x **354**) or **24** lunar months, a total of **708** days pass, as in the value of the Upper **42** letters of the Name of G-d. We need to learn how to count time.

The Real Hannukah Candles

As discussed already in great detail, the design of the **72** Names (Triplets) matrix is extraordinarily complex. For example, the sum of the square roots of each of the **72** Triplets is **720.0** and the sum of the square roots of each of the **9** rows of **8** Triplets each is **280.0**, together they equal **1000.0**, connecting them all to *Binah*, the *sefira* (dimension) of limitless possibilities. As R' Chaim Vital of blessed memory said, all Torah Light is spread through squaring. By examining the square roots of a Torah number, we are studying it one dimension deeper and closer to its source. Then by compiling connected Torah numbers or their sources, we are adding to their strength. When multiple additions, especially numerous ones, add up to a whole number beyond the decimal place, the Creator is giving us a taste of certainty and of the perfection of the world to come, *Binah* understanding. Like when a chef prepares a scrumptious meal and begins it with a tasting, an *amuse bouche*, it is meant to provoke a hunger inside us to desire more.

We have further discussed how within the **72** Triplets matrix there is a perfect **8** x **8** Triplet square that has a total numerical value for its **64** Triplets of **8000**, meaning that each of the **8** columns has an average numerical value of **1000** each. In Kabbalah, the numbers **8** and **1000** both represent the hyperdimension of *Binah*, the **8th** *sefirot*. The value **1000** represents the completeness of the **3** columns of the Tree-of-life, or **10³**, and thus *Binah*, which is also why the Essential Elements of Creation are all presented as Triplets.

והו	יולי	סיט	עלם	מהש	ללה	אכא	כחת
1000 הזי	1000 אלד	1000 לאו	1000 ההע	1000 יזל	1000 מבה	1000 הרי	1000 הקם
לאו	כלי	לוו	פהל	זלך	ייי	מלה	זזהו
נתה	האא	ירת	שאה	ריי	אום	לכב	ושר
יזו	להוז	כוק	מנד	אני	זועם	רהע	ייו
ההה	מיכ	וול	ילה	סאל	ערי	עשל	מיה
והו	דני	הזוש	עמם	ננא	נית	מבה	פוי
נמם	ייל	הרזו	מצר	ומב	יהה	ענו	מוזי
דמב	מנזק	איע	זזבו	ראה	יבמו	היי	מום

The 8 Candles

These **8** columns of **1000** within the **72** Names are akin to the **8** Channukah candles, each connected to the river (*Nacha*) that flows from *Binah* into them. Above each is a single Triplet or flame, **8** flames in total. Each of the **8** columns or candles includes **8** Triplets or **24** letters, as in the **24** hours in a day. One day; one candle; one connection to *Binah*. Each letter conforms to a single hour. A proper meditation would pause at each letter and Triplet for each candle lit. Start from the top like a candle that burns from the top down.

If you recall, there was a special hidden repetitive **18**-digit sequence that summed to **54** within the Fibonacci numbers that was also hidden or derivable from the forward and reverse sequencing of **123456789** and **987654321**, akin to counting out the candles from **1** to **9** and

back again. When we divide the two directions by each other (**987654321/123456789**) we get **8.000000729** with **729 = 9³**, equal to the 2nd line of the **42**-Letter Name matrix. What a beautiful allusion to the **8** candles plus the **9th** one. Or is it more than a hyper-dimensional allusion? Another equation between the two directions that ties in the **8** and **9** dynamics of Chanukah and the **72** Triplets is (**123456789 x 8 + 9**) = **987654321**.

Referring to the complexity built into the **72** Triplets, Peter pointed out a while back that the **3rd** set of **18** Triplets, from **37 – 54** has a total value of **2584**, which is the **18th** Fibonacci number. Indeed, as Shane just informed me, the **15th**, **16th**, **17th** and **18th** Fibonacci numbers total **5778**, just like Phi(?)¹⁸. What is also intriguing about this hyper-dimensional connection is that the sum of the digits in the **15th**, **16th**, **17th** and **18th** Fibonacci numbers (**610**, **987**, **1597**, and **2584**) is **72**. While the last value in this short series, **2584**, has origins in the **72** Triplets, so too the first value, **610**, that corresponds to the **27th** Triplet (???) of the **72**.

The Flames

The Hebrew word for flame (????), not only is structurally similar to the word for love, *Ahava* (????), meaning love, but it has the numerical value **42**. By the way, the ordinal value of the *Alef*(?) of *Ahava* (????) and the *Lamed*(?) of (????) together is **13**, as in Love and Oneness(???). Like the sequential **13 – 42 – 55** occurrences of the letter *Vav*(?) that are initials in the *Shema*, as previously discussed in depth, there are **30** *Lameds*(?) as initials in the **248** words and **1000** letters of the *Shema*. The *Lamed* (?) has a numerical value of **30**, so the **30** *Lameds*(?) also reflect the **900**, or **30²** of the letter *Zadi sofit* as discussed above.

The letters *Lamed*(?) and *Vav*(?) go together as the (??), **36**, *tzaddimim* necessary to sustain the world. We can see how deep the relationship goes in that of the **55** occurrences of the letter *Vav*(?) initials in *the Shema*, **13** are in the first paragraph, as oneness and love (????), and **42** in the other two paragraphs. This further breaks down to **30** in the second paragraph and **12** in the third, which correspond to the value of the letter *Lamed*(?) and of its ordinal value, **12**, respectively. The *Vav*(?) is the candle to the flame *Lamed*(?). The connection gets deeper through the **42** *Alef*(?) initials in the *Shema*, with **2** in the first verse, **4** in the **42** Letter first paragraph, and **36** (??) in the final two paragraphs.

In these days more than ever, it is important to keep in mind what we revealed in chapter 29, that the deep secret of "The Tree in the middle of the Garden" from Genesis **3:3** is that its initials spell out Love: *Ahava* (????).

Just as the word for flame (????) has a value of **42**, the initial of the same word (????) is *Lamed*(?) with a complete value of **42**, and *Lamed*(?) is the letter that not only looks like a dancing flame but is representative of *Binah* since it is the only letter that goes up and beyond the upper base of the **27** letters. The letter *Lamed*(?) is also not coincidentally the first letter of *L'hadleek* from the Channukah blessing, meaning to ignite. The next two initials in the Channukah blessing, as pointed out by the Arizal, spell *ner*(??), candle. The **3** initials with a collective value of **280** spell out a candle (**250**) with its flame(**30**). They are also equivalent to the ordinary value of the **5** final letters (?????), meaning that the lighting of the candle has the potential to overcome judgement.

The **8** candles of Channukah each have flames of **42**.

The ordinal value of the word flame is **24**, as is the complete value of the back of the word for flame (????), signifying the **24** hours in One day. As with the menorah (*chanukiyah*) in the days of the Maccabees, the flame burns **24** hours a day.

The **8** candles of Channukah have flames of **42** that last for **8** days or **24** hours each.

Within the **14** Triplets of the **42**-Letter Name, the **6th** and **7th** Triplets sum to $(330 + 211) = 541$, the value of Israel. And the **5th** and **8th** equal $(57 + 493) = 550 = 10 \times 55$, while the **9th** equals **110** $= (2 \times 55)$, meaning that the **5th**, **8th** and **9th** Triplets equal 660, or (12×55) , which is (24×27.5) , **24** cubits, each connecting to an hour of the day.

All **8** flames have a value of **336**, as in the **336** letters of the **112** Triplets of Creation, including the **72** Names, the 11 Triplets of *Bereshit*, the **42**-Letter Name, and the 15 Triplets of the Shema that conceal the Upper **42** Letters of the Name.

Given that the letter *Lamed*(?) has a numerical value of **30** and the two junction points of the **42** and **72** Letter Names are at **112**, where they are combined within the **112** Triplets, and nominally as $(42 + 72) = 114$, it is noteworthy, as Moshe pointed out, that right in between **112** and **114** we find the **30th** prime number, **113**.

Understand this, this same fusion of the **42** and **72** Letter Names made with love can and should be made when lighting the Shabbat candles each week when the connections are also elevated.

We recite the **42**-Letter Name over each lit candle, meaning that the **14** Triplets of the **42**-Letter Name matrix are ignited and linked to the **8** Triplets of the **72** Triplet matrix every day. That gives us the power of $(8 \times 14) = 112$ each day plus $(8 \times 14) = 112$ for all **8** days of the flames. Either way, the lighting of the Hanukkah candles is our connection to the **112** Triplets. The value of the **9th** candle is **1143**, and by combining all **72** Triplets with the **42** Letters we are creating a combined value of $(72 + 42) = 114$ with the **3** in **1143** representing the Triplets.

Moreover, by silently reciting the *Baruch Shem* of numerical value **1358** after each **42**-Letter Name recited, over the **8** days we are connecting the **1000** of the *Baruch Shem* to the **1000** of the **8** Triplets each day and the same goes for the **9th** candle. What gets released is the **358** each time, or *Moshiach*.

Overcoming our Physicality

Yes, $(8 + 14) = 22$, as in the **22** letters of the *alef-bet*, but the **8** days and **24** letters and hours per day works out to $(8 \times 24) = 192$ letters and hours of total connection to *Binah* consciousness. The **9th** candle lit **8** times also equates to (8×24) Triplets = **192** Triplets and **192** hours of *Binah* consciousness.

Those **192** hours of the **9th** candle are not only equal in duration to the **8** candles but are equal in ethereal value to the full **72** Triplets, as $8 \times 1143 = 9144 = 9143$.

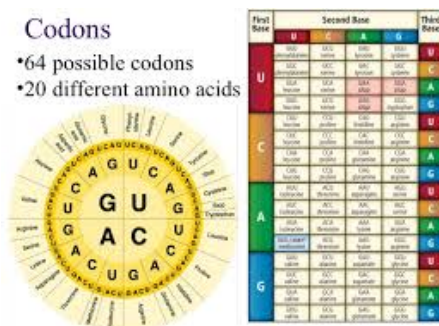

For **8** days during Channukah we read about the sacrifices that the Israelite Tribes brought each day. We find them in Number 7: 1 – **89**. One of the secrets in these sacrifices is that each tribe brought **24** items, connecting to the **24** adornments of the *Shechinah*. The **192** letters and hours from the **8** candles plus the **192** letters and hours of the **9th** candle together equal $(192 + 192 + 1) = 385$, the numerical value of the *Shechinah*.

What are these **192** Triplets akin to?

We covered this in the middle chapters of this series. Analogous to the **64** Triplet grid of the **8** days and **8** candles, we have the **64** codons of our DNA, with each codon being a Triplet sequence

Our DNA is what enables us to exist in bodily form. It creates our avatar within the ether.

Where are the **72** Triplets concealed within the Torah? In the **3** consecutive verses of **72** letters each that split the Red Sea that nullified physicality. It is known that Moses used the **72** Triplets along with the **42**-Letter Name to properly connect with the fields of the Creator in the ether to nullify or suspend physicality in that powerful scene. We can do the same with the lighting of the **9** candles during the **8** days.

In the **64** triplets or codons in our DNA, each base unit or nucleotide will appear **48** times and since there are **4** of them, $(48 \times 4) = 192$, matching the Essential Triplets of Creation we are igniting on the **8th** day of Chanukah, *zot Chanukah*. As previously explained, the **4** Hebrew letters (????) assigned to the **4** nucleotides add up to **424**, ergo the total is 192×424 , the numerical value of *Moshiach Ben David*.

When we add the *Moshiach Ben David* reference (**424**) to the **192** times that these **4** nucleotides are repeated in our **64** DNA codons

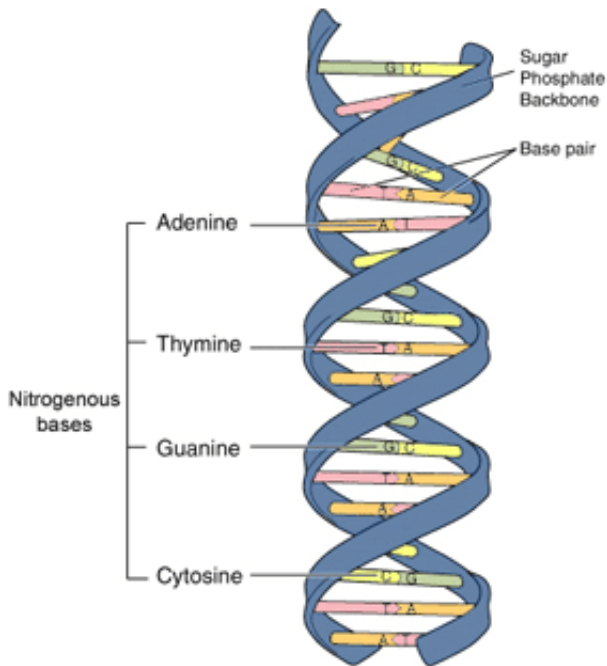

Image adapted from: National Human Genome Research Institute.

(triplets) it equals $(424 + 192) = 616$, the value of “*H’Torah*, The Torah.”

To overcome physicality, we need to break the limiting bonds of 3-dimensional space. The proper lighting of the full set of Hanukkah candles helps us do just that. While a 3-d cube has **26** collective vertices, edges, and faces, connecting our existence to the boundaries of *Zeir Anpin* and the *YHVH* (????); and the 4-d Tesseract hypercube has **72** collective vertices, edges, and faces; connecting the **72** Triplets to the first step of liberation; the 5-dimensional Penteract hypercube has a collective **192** vertices, edges, and faces.

When the **9** candles are lit, we are connecting to the fusion of the **14** Triplets of the **42**-Letter Name and the **72** Triplets of the **72** Names and to full-on *Binah* hyperspace and limitless freedom, overcoming the limitations of the programming of our DNA, and connecting to the aspect of *Moshiach Ben David* that is intrinsic to it.

The **5**-dimensional hypercube with its **192** total elements breaks down to **32** vertices, **80** edges, and **80** faces, which means that either the edges or the faces combined with the vertices total **112**, as in the **112** Triplets.

The Signs of Chanukah

How do we know that this is not just our own projections? The Creator left us very specific signs. He wanted us to have complete certainty. The square root of **8000** is **89.4427...** with **89** being the value of Channukah (?????) and **44** being the ordinal value of Channukah and the number of candles lit on Channukah. Moreover, the sum of the square roots of the **8** candles—each of the **8** decapitated Triplet columns—is **250.44...** with **250** being the value of candle (??) and **44** being the number of candles lit on Channukah.

והו	ילי	סיט	עלם	בהש	ללה	אכא	כהת
הזי	אלד	לאו	ההע	יזל	מבה	הרי	הקם
לאו	כלי	לזו	פהל	זלך	יזי	מלה	זזהו
נתה	האא	ירת	שאה	ריי	אום	לכב	ושר
יזו	להז	כוק	מנד	אני	זזעם	רהע	יז
ההה	ביכ	וול	ילה	סאל	ערי	עשל	מיה
והו	דני	הזוש	עמם	ננא	נית	מבה	פוי
נמם	ייל	הרזז	מצר	ומב	יהה	ענו	מזזי
דמב	בזק	איע	זזבו	ראה	יבמו	היי	מום

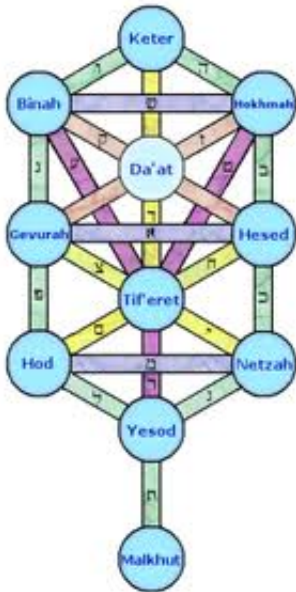

The first row in the 72 Triplets becomes the 9th candle, the *shamash*, or required helper candle critical to the lighting and Chanukah process. It is required to sit above the other 8, which must all be on the same level. There are 8 Triplets in the row, just like the other 8 candles, and this first row's full value is 1143, or 1000, representing *Binah*, and 143, the value of the aspect of *Ehyeh* (????????????), also representative of *Binah*. As explained previously, the value 1143 is independently special because the Creator designed it to be 1/8th the full value (9143) of the 72 Triplets. It is further designed as the sum of 1000 (*Binah*) and 143 (*Binah*). The square root of 1000 plus the square root of 143 plus the square root of 42 for the flame is 50.0618, as in the 50 gates of *Binah*. Therefore, all 9 candles connect to the hyperdimensional metaphysical energy of *Binah*, the source of potentiality. This is why the 9 flames total (9 x 42) = 378, the numerical value of *chashmol*, the electricity of the angels. Moreover, as discussed many times already, it is the value of "Echad Ushmo Echad, His Name is One," and 378 is the sum of the ordinal value of the 27 or 3³ letters of the *Alef-bet* and 27 positions of the Essential Cube of Creation, the Magical Cube of 42.

The value 1143 for the first row or 9th candle, the *shamash*, is especially designed so that over the 8 days of Channukah, the total value of this candle, which is lit 8 times, is (8 x 1143) = 9143, that of the entire 72 Triplet/Name matrix.

The *chanukiyah* of 8 candles with one above the 8 is in actuality the 72 Triplets. It consists of 8 candles and a 9th one above them. It existed before Creation and was encoded into the Torah over 1000 years before the Maccabees.

The first or uppermost letter in each of the 9 candles (?????????) sums to exactly 107, as in the sum of the integers from 1 – 107 that equals 5778, the year the cosmic window of *Moshiach* opened and with it the event horizon. The value 107 also equals the counting of the days between the cosmic holidays. When we add 107 to 9143, we get 9250 or 9 candles (??) of numerical value 250.

The Arizal explained that when we recite the Chanukah blessings, at the word for candle, *ner* (??) of numerical value **250** we should actively meditate on the **3** Names, *Ehyeh* (????), *Elohim*(?????), and *Adonai* (????), collectively of numerical value **172**, combined or intercalated with the **3** *YHVH* or (**3 x 26**) each connect with the **11** Triplets of *Bereshit* and **15** Triplets of the *Shema* for a total or **26**. This means that upon the lighting of each candle all 4 component sets of the **112** Essential Triplets of Creation are present and can be activated. The **172** of the **3** Names and the **78** of the **3** *YHVH* together equal **250** (??).

As it happens, the sum of the 10th (???) and 11th (???) Triplets of the **42**-Letter Name equate to (129 + 43) = **172**, meaning they equate to the **3** Names, *Ehyeh* (????), *Elohim*(?????), and *Adonai* (????). While these two triplets contain the initials *Lamed* (?) of *L'hadleek* and the *Nun*(?) of *Ner*, the 9th Triplet just before them (???) contains the *Chet*(?) of *Chanukah* that spell out *Nachal*(???)

We have already seen how Chanukah connects with the value **11** and thus the access to the **11** *sefirot* or the **11th** sefira, *Da'at*, an important connection between *Binah* and *Chochma*. So how appropriate is it that the Hebrew word for Holiday (??) is found at the **24th** and **25th** letters of the **42**-Letter Name to initiate the sequence of the **9th**, **10th** and **11th** Triplets. And how appropriate that the **9th** Triplet (???) has the numerical value of **110**, that of *Nes* (??), miracle, or that the two letters (??), the **33rd** and **34th**, at the end of the **11th** Triplet (???) also total **110**, that of *Nes* (??), miracle.

And we should also keep in mind that the **26** of the *YHVH* (????) is a conjuncture of the 2 primal frequencies, **1.1** and **27.5**.

$$\frac{x/27.5 + x/1.1}{x/27.5} = 26 = YHVH (\text{יהוה})$$

Over the course of the **8** day cosmic window of Chanukah, we can properly ignite the Light of all **72** Triplets and connect them through their flames to the Primordial **42**. It is the Light of *Moshiach* (*Ohr H'Ganuz*) that lasts **8** days, not the oil. This connection has existed for us since the beginning of time. Like us today, the Maccabees were directed to it at just the right moment.

Every Letter that is ignited in the **8** candles has an average value of **42**, all **24** x **8** of them. There are **42** Rows and **248** Columns in the Torah.

Every Letter that is ignited in the **8** candles has an average value of **42**

Every Letter that is ignited in the **8** candles has an average value of **42**. The **64** Triplets of **3** letters each, **192** in total, have a combined value of **8000**, and $(8000 + 64)/(64 \times 3) = 42$. If we just divide $8000/(64 \times 3)$ the difference from exactly **42** is **.333**, the value for darkness, *H'choshech* (????). The value **42**, connecting to the Names of **42** and the Infinite or Endless **42**, is the Light that overcomes the darkness.

This is an unprecedented moment. We are at the final tipping point. This time, of all the *Chanukot*, the Creator has given us a wondrous cosmic gift, unwrapping the power of the cosmic *chanukiyah* and the flames of the ether to restore order, stop the false reset, and to ignite freedom and *Moshiach* Consciousness.

In the previous chapter in this series, with the guidance of the Creator we showed that Love and Oneness were the keys to igniting the *kavannot*, the Names and Triplets. In this Chanukah segment, with the help of the Creator we have given you the first set of schematics for applying that Love and Oneness. The Creator has provided the cosmic window. The rest is up to each of us to do our part.

Over the course of the **8** cosmic days, we light **44** candles and $5778/44 = 131.31818\dots$, a composition of **1313** together with **1818**, representing the **3** iterations of the Alef(?), the One. The year **1313** BCE was the year we received the Torah at Sinai and the value **1.313** is the value the exponential scale of the *Alef-bet* is based on. Love and Oneness.

The Creator wants to make sure we understand Spherical Time and what it means for us. When we apply the simple by ancient decoding algorithm or gematria cipher and multiply the two dates of the Spherical Time bubble (**2018** x **3760**) then divide it by (**2018** + **3760**) we get precisely **1313.2018**.

You may do the math. The Creator already has.

Upper Chanukah

Zion, of the Daily Zohar, advised us of a couple new Chanukah meditations revealed by the Yenuka, Rav Shlomo Yehuda Be'eri ??? ???? ????? ?????. The first one connects us to *Keter* by using the Holy Name "???????? ?????" "I AM WHO I AM" from Exodus 3:14 that we have covered extensively and will continue to do so because of the power in that Name on high. Using the first two parts of that Name, he equated them in the style of the Arizal to the blessing of lighting the Chanukah candles "?????? ?? ??????" *L'hadleek Ner Chanukah*. This

meditation is in addition to the ones from the Arizal that we have previously explained and the new ones on the 9 candles and their flames that we have just revealed.

It is in the next revelation of the Yenuka that we want to expand and extend its blessings 10-fold throughout all 10 sefirot(dimensions). He informs us that *Ohr Haganuz* (??? ?????), the Light of *Moshiach*, of numerical value 278, is equivalent to Honor + Image + God (???? + ???+ ?????) and that during the 8 days of Chanukah when the *Ohr Haganuz* is present we can use this connection to defeat the global plague.

אֱהִיָּה אֵשֶׁר

אור הגנוז = כבוד צלם אלוקים (278)
 " (בראשית טו, ב) באדם דמו ישפך כי בצלם אלוקים" = מגפה בעולם (278)

We can amplify the power of the *Ohr Haganuz* in our world by concentrating on what we are lighting. Besides the 72 Triplet connection and the 42-Letter Name ones that you should now be making, please note that the first candle for the first day is lit for 8 days and therefore its power is 1⁸. The second candle for the second day is lit for 7 days and therefore its power is 2⁷, and so forth until all 8 candles are lit (1⁸ + 2⁷ + 3⁶ + 4⁵ + 5⁴ + 6³ + 7² + 8¹). Over the 8 days the Light released if we make this new connection is 2780 or (10 x 278), the 8 letters in *Ohr Haganuz* (??? ?????) expanded to fill all 10 sefirot.

In addition, the initials of to Honor + Image + God (???? + ???+ ?????) total 111, as in the value of the *Alef*(???), while the 3 final letters add up to 84, the fusion of the two 42 Names and redemption.

Chanukah in Space and Time

The first row of the 72 Triplets is considered the *shamash* or helper candle. The total value of that row is 1143, exactly 1/8th or 12.50% the total of the 72 Triplets. Its 8 component Triplets are 1/9th of 72. While (1 + 1 + 4 + 3) = 9, as in the 9th candle, the product of its digits (1 x 1 x 4 x 3) = 12, the cyclical time coefficient. If we square the value of each of the Triplets in that first row, they total 332989 or (333,000 – 11), much as Chanukah (?????) is (100 – 11), as much as the sum of the squares of the 24 letters in the 9th Candle, the same first row of 8 Triplets as above, is (266666 – 11).

I hope you can see the importance of the 11th Sefira, *Da'at* (Knowledge) in all these connections.

As for Chanukah (?????) being (89 + 11) = 100, we must also understand that the 11th Fibonacci number is 89 and that Phi(?), of which the Fibonacci number series is dependent,

governs time. Moreover, as previously discussed, time is dependent on **12** as a universal constant and the **12th** Fibonacci number is **144**, with their sum being $(144 + 12) = 156$, the numerical value of Joseph and Zion in the center of the clock. The value **156** is also the **12th** even pronic number, while **1560** is the difference between the **7** and **12**-year periods in the Hebrew cycle of measuring time.

Let us get the messaging straight. The first row, independent from all the other **8**, has a numerical value as a whole of **1143**, or $(1100 + 43)$ or even $(1100 + 11 + 32)$. The **11** in this last equation that possibly represents the **11** dimensions and **32** Paths of the Tree-of-Life, can be found in the first two letters of the same first row, *Vav-Hei* (??) of the first Triplet (???) and of the *YHVH* (????). Then when we sum the squares of the **8** Triplets in this row, we get $(333,000 - 11)$, or alternatively when we sum the squares of the **24** letters in this row, we get $(266,666 - 11)$. While **8** Triplets and **24** letters represent a cosmic inclusion of $(8 + 24) = 32$, there is no mathematical reason that the two complementary values $(333,000 - 11)$ and $(266,666 - 11)$ work out the way they do. Ergo, they must work out that way for specific connections to the Ether and there must be a cosmic message in these numbers for us: 11, 2.666 and .333.

Moreover, this is similar to the **9** flames of the **42**-Letter Name of numerical value **3701** each, in that $(9 \times 3701) = 33309$. And both $(333,000 - 11)$ and **33309** are reflective of the **3330** years between the Torah reception on Mt Sinai in **2448** HC (**1313** BCE) and **5778**.

As for the rest of the candles, their collective **8000** value for the **8** days divided by **24** hours is naturally **333.333/day** on average and $(42 - .333)/hr$.

Perhaps it has something to do with the Sun's mass being **333,000** times the mass of the Earth, or that the **9th** candle, the *Shamash* is spelled the same as the Hebrew word for Sun, *Shemesh* (???) of numerical value **640** as in the **64** Triplets of the **8** days, and of ordinal value $(21 - 13 - 21)$ like the Name *Ehyeh Asher Ehyeh* (????????????). The ordinal value of (???) also breaks down to $(13 + 42) = 55$, like the amount of *Alef* (?) initials in the *Shema*(???) when segregated into its first paragraph of **42** words and the rest.

Length and Time

We further see that the squares of the numerical values in Chanukah (?????), or $(8^2 + 50^2 + 6^2 + 20^2 + 5^2)$, equal **3025**, which is equivalent to **11** cubits or **302.5** inches. Taking the Chanukah square result as feet, **3025** ft, we understand that it is equivalent to (4×756.25) or (4×27.5^2) , the perimeter of the Pyramid. Written in stone.

Moreover, the small gematria (**85625**) of Chanukah (?????) gets revealed as the volume of the Ark of the Covenant that we studied in the previous chapter, 5.625 cu^3 , an allusion to *H'Keter* (**625**) of *Binah*.

And while the product of the letters in Chanukah (?????) is **240,000**, alluding to the **24** hour daily cycle $\times 10^4$, or 10,000 days, we should not overlook the simple cosmic breadcrumb that the **8 x 9** in Chanukah's numerical value of **89** represents the **8 x 9** Matrix of **72** and the **9** candles of **8** Triplets each.

The Ethereal Bridge

The total value of the **72** Triplets is **9143**. The value of the first row of the **72** Triplet matrix is **1143**, and the average value of a Triplet in that row is **143**, or 142.875. The **8 x 8** matrix beneath that first row totals **8000** and $8000/112$ (Triplets) = 71.42857143 = **70** plus **10/7**. This is reminiscent of how **9** divided by the small gematria of the **42**-Letter Name is $9/1.23049\dots = 73.141593\dots$ defining **70** and Pi to an astonishing **7** degrees of accuracy.

The **143**-component in **9143**, **1143**, **143**, and **71.43** is physically and metaphysically **1/7**.

We have seen that the **8 x 9** matrix is a complex design capable of connecting our consciousness to a very potent means for overcoming physicality. Now we see that the number **7** or the proportion **1/7th** plays a role in this equation.

The first row of numerical value **1143** or **(1000 + 143)** yields an equation such that $1000/143$ or more precisely $1000/142.857142\dots = 7$. Likewise, the total for the **72** Triplets, **9143**, or **(9000 + 143)** yields $9000/142.857142\dots = 63$, the *Binah* aspect of the *YHVH* (????). Together **(63 + 7) = 70**. Perhaps, this is a reflection of the mechanism by which the **7** lines and **70** sefirot of the **42**-Letter Name work together with the **70** unique Triplets in the **72** Names.

Keeping in mind that the **72** Triplets were designed so that the sum of their square roots of all **72** Triplets and all **9** rows would total **1000.0**, they were also designed so that their total (**9143**) divided by the sum of the first row (**1143**) would be $9143/1143 = 7.99\dots = 8$ and that the sum of the rest of the **64** Triplets (**8000**) divided by the first row (**1143**) would be $8000/1143 = 6.999 = 7$. Moreover, the sum of all the first row Triplets individually divided by their daily candle (**8** Triplet totals) equals $1.199\dots = 1.2$.

Moreover, the amount that the sum of the square roots of all **72** Triplets and all **9** rows were off from a perfect total of **1000.000000** was **1/18.600**. It is interesting that the speed of light is approximately **186,000** miles per second.

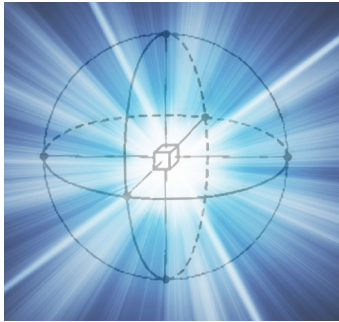

That is incredible complexity, especially given everything else that we have revealed about them, including that the atomic weights of the metals gold, silver, and copper—the essence of physicality for millennia—are found together in their most central Triplets. And especially given that the **72** Triplets deconstruct to **3** coherent sequential **72** letter verses in the Torah that describe the splitting of the Red (Endless) Sea, one of the most iconic moments in the entire Torah, *the* moment associated with escape and freedom.

The values **7**, and even more so **70**, represent the **7** or **70** *sefirot* (dimensions) in the completed *Zeir Anpin-Malchut* structure, which comprise every aspect of physicality and consciousness below the threshold of *Binah*. This is why there are **70** unique Names (Triplets) within the **72** Triplet matrix.

Of the 4 elements, the one that represents physicality is the Pyramid and we have already explored in depth how the Pyramid's foundation is based on the number **72**. We have just seen how the number **7** was incorporated in the **72** Triplets, one of the Essential elements (fields) of the Ether, a hint that it is a transition element guiding the path from the physical to the ethereal where it joins with the **42**-Letter Name to breach the void, much as the Israelites crossed the Endless Sea to escape Egypt. We saw that the value **11** is also woven into the dynamic of the **72** Triplets in multiple ways. What we have not revealed until now is that the ratio of the Base of

the Pyramid to its Height is exactly $(756.25/481.25) = 11/7$. Connecting the physical to the Ethereal.

If you have not figured it out by now, the Pyramid's design is that of the Creator, no matter who claimed it, built it, or what was done with it. It stands in stone in Egypt, not Eretz Israel, because, according to the Zohar Egypt was the essence of physicality.

By the way, speaking of the speed of light. It is a major factor in the design of our Spherical Time Bubble. You see, the ratio of the two equidistant bubbles is $3760/2018 = 1.86282$, which is $1/100,000$ of the speed of light, **186,282** mps. This works out precisely in the month of May **2018**.

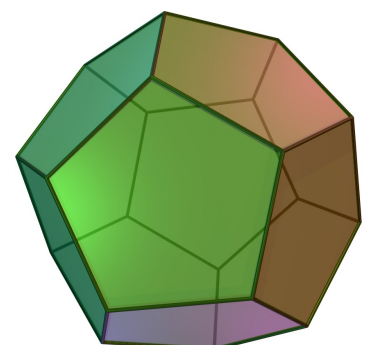

The **45th** US President moved the US Embassy to Jerusalem on May **14th 2018**, exactly **70** years after Israel became a nation. Everything is in the hands of the Creator: Time, Space, the Cosmos, and Counterspace (the Ether).

The Chanukah Gift

If we do the connections and blessings correctly for the **8** days, our gift on *Zot Chanukah*, the **8** day, is revealed by the last **8** Triplets of the **8** candles that sum to **702**, Shabbat, the Great Shabbat of *Binah*. Each candle of **24** hours or **24** letters is divided into **8** Triplets. The final Triplets of each day represent the full manifestation of the Light of *Binah* in that day, and all **8** days of that full manifestation total **702**.

It is All About 42

In the previous chapter we showed how quantitative totals of the Torah's main elements all center on the numbers **6480**, **64.80**, and **648.0** and that it ties into

Spherical Time and the Cosmic Clock through $6480 = 120 \times 54$, the age of Man times the

annual cycle of the Torah. We did not mention though that the great precession of **25,920** years divided into **4** great seasons = **6480** years per season, or that there are **6480°** in a dodecahedron, a **12**-sided polyhedron, one of the 5 platonic solids. There is a hyperdimensional metaphysical reason for all this and that is that **42** is at the center of everything that emanates from the Essential universe.

The square root of **42** is **6.480...**

$$\frac{4 \times 1 \times 2 \times 7 \times 3 \times 3 \times 9 \times 6 \times 2 \times 5}{4 + 0 + 1 + 2 + 7 + 3 + 3 + 9 + 0 + 6 + 2 + 5} = \frac{272160}{42} = 6480 = 80 \times 81$$

$$\frac{4 \times 1 \times 2 \times 7 \times 3 \times 3 \times 9 \times 6 \times 2 \times 5}{4 + 0 + 1 + 2 + 7 + 3 + 3 + 9 + 0 + 6 + 2 + 5} = \frac{272160}{42} = 6480$$

$$\sqrt[3]{272160} = 64.80 \dots$$

$$\frac{3 \times 9 \times 6 \times 2 \times 5}{3 + 9 + 0 + 6 + 2 + 5} = 64.80$$

$$64.80 \times 100 = 6480$$

$$401,273 - 390,625 = 22^3$$

$$22^3 = 10,648$$

$$10 \times 648 = 6480$$

$$25,920 / 4 = 6480$$

$$\sqrt{42} = 6.480 \dots$$

Regarding the element of stone, physicality, we previously explained that the Pyramid's slope angle (**51.84°**) measured at the center of its faces connects to the **72** Triplets through its square root in that **5184 = 72²**. Also, that the slope angle of the Pyramid is **42°** at its corners, and the face to face edge angle is **112°**, and that the apex angle is **76°**, as in the ordinal value of the Torah's first word. By the way, this means that the two angles that define the apex of the Pyramid total (**112 + 76**) = **186**, an allusion to the speed of light, and that the four face to face edge angle plus the two apex angles (**4 x 112 + 2 x 76**) = **600°**.

Now, knowing that the flame of **42** dances above the **8** candles of the **72** Triplets, we see that the sum of the **8** square roots of **42** or (**8 x 6.480...**) = **51.84....**

The sum of the **4** slope angles is (**51.84° x 4**) = **207.36** and **20736** is **12⁴**. Precision Timed.

??????? ?????? ???????, ?????????????? ???-??????; ??????????, ?????????, ???????,

????????????? ??????????.”

And a river went out of Eden to water the garden; and from thence it was parted and became four heads (major rivers).”

-Bereshit 2:10

A river went out of Eden and became the 4 Essential Elements recorded in the Torah, and in stone. What is important is not that they were recorded for us to find, but that they exist in the Ether. The energy and power that we can and need to tap into exists in the Ether, not on paper, nor etched in stone, nor in the connections of the cosmos.

These are the four real elements: Ether, Time, Cosmos, Physicality; the YHVH (????).

That same great precession of 25,920 years divided by the 192 hours of Chanukah equals 135 or 3×45 , and 25,920 years divided by 45, Man, equals 24^2 , the hours in a day squared. Earlier we saw how the four sequential 15 - 18th Fibonacci numbers equal 5778. Now, we see that the seven sequential 8th – 13th Fibonacci numbers equal $= 24^2 = 25,920/45$. Notzer Chesed L'Alafim, the 8th of the 13 Attributes speaks to us of the 2000 generations and of $24^2 = 576$, as in 5760 (2000 CE).

Between the 8 – 13th and the 15 – 18th Fibonacci numbers is the 14th one, as in the 14th position at the core of the 27 position of the Essential Cube of Creation, and of David (14) at the exact center of the 5778 years. The value of all 27 positions is 378 while the value of the 14th Fibonacci number is 377, possibly connected. Meanwhile, the value of the 1 – 7th Fibonacci numbers is 33 and thus the 1 – 7th and the 14th Fibonacci numbers together, completing the first 18 in this eternal Ethereal puzzle is 410 (???). You can connect the dots yourself.

How long is the reign of 45 supposed to last? Could it be through 2025 or 45^2 ? What is the difference from the 44 Chanukah candles squared and 45^2 ? It is $(45^2 - 44^2) = (2025 - 1936) = 89$, as in Chanukah (????). Was this difference designed so that $(2025 - 2000) = 25$ (??) and $(2000 - 1936) = 64$ (???)?

And was it designed so that that the equation derived from the product of the letters in Chanukah (????) in order $(Chet(?) \times Nun(?) \times Vav(?))/(Caf(?) \times Hei(?)) = (8 \times 50 \times 6)/(20 \times 5) = 24$? Or that the equation derived from the sum of the letters in order $(Chet(?) + Nun(?) + Vav(?))/(Caf(?) + Hei(?)) = (8 + 50 + 6)/(20 + 5) = 64/25 = 2.56$ or 2^8 , which is the numerical value of Aharon, charged with lighting the Menorah, and also of the Ark of the Covenant, charged with guarding the Torah.

On the flip side, $25/64 = .390625$ = the number of words, letters and verses in the Torah.

Moreover, $(20 \times 5)/(8 \times 50 \times 6) = 100/2400 = .041666$, off from exactly 42 by .333, the value for darkness, H'choshech (????). The value 42, connecting to the Names of 42 and the Infinite or Endless 42, is the Light that overcomes the darkness, the light of the eternal flame.

What is this telling us about Time?

How do we use the power of the Chanukah lights the rest of the year?

When the 8 days are over, do the **72** Triplets that the candles are made of go anywhere? Do the **14** Triplets of the **42**-Letter Name that comprised each of the 9 flames go anywhere? Do the Holy Names that comprised the blessings over the candles disappear? Does the Torah disappear?

What is written in the Ether is written in Time. What is written in Time is written into physicality. How do we change physicality?

By tapping into Time.

How do we change Time?

By tapping into the Ether.

For anyone that has not been following this series from its inception, you can find the [entire work here](#).
