## Rav Ashlag and the 13 Leaps of Love.

**Author :** Meiliken

**Date :** 09-07-2013

By now, most of you know of the prophetic Hebrew calendar date for *Moshiach* (the

Messiah) and as some say the end times or the end of days, **5778**, and how [Rav Yehuda Halevi Ashlag revealed it](#) to me through my teacher and [how much more it connects to](#). And more recently, we've revealed the connection between the [13 measures of 444 years and the year 5778](#).

I recently returned from Israeli and it was while visiting HaRav Ashlag (*HaSulam*) that the significance of the **444**-year span came into sharper focus. I had been contemplating the connection between the **13** measures of **444** and 2nd plague,

*tzfardea* (frogs) of numerical value **444**, and I came to the obvious and not so profound link that frogs leap and that the **13** spans of time are like **13** leaps of love (*ahava*, numerical value **13**). As previously revealed, **444** is the numerical value of "from generation to generation (*L'dor V'dor*) and I knew there had to be a special reason that the [only 10-letter word \(an obvious connection to the 10 sefirot\) in the Torah is found in the reading about the frogs](#).

Yet it was during the brief time I had with Rav Ashlag that he suggested I divide **444** by **22**, as in the **22** Hebrew letters, in order to understand the significance of **444**. Any connection to the **22** Hebrew letters would bring this number, **444**, back to its root energy and deconstruct it to, as Abraham Avinu put it in his *Sefer Yetzilah*, the **22** building blocks of the universe.

So it was beautifully enlightening that the beloved *tzaddik* of blessed memory who revealed to us the year **5778** for *Moshiach* and the final redemption (*geula*) also revealed that the essence

---

of the **13** measures of love, of G-d's **13** attributes is  $444/22 = 20.18$ , as in the Western calendar year **2018 CE**, which just happens to be the Hebrew calendar year **5778**.

It also harks back to [G-d's Covenant with Abraham in 2018](#) in the Hebrew Calendar, but that's not coincidental. It would also mean that G-d made his Covenant with Abraham exactly **100 blocks** ( $100 \times 20.18$ ) from the time time began.

Yet another reminder that G-d's hand is in everything and that there are scant few years left for us to make the leap and find that unconditional love within us.

As Rav Ashlag himself pointed out, there the last leap, of **444** years would take us from the death of the Arizal until *Moshiach*. We can now see that the final (**22nd**) block of that final time span is **20.18** years, which begin in 1998. It is also the last of the **100 blocks** of time from the year the Western calendar began in 3760 HC (0 CE).

In between the two sets of **100 blocks**, the first when G-d made his Covenant and the last when he will fulfill it are the **86 Blocks** of *Elohim* (numerical value **86**).
