
The Alpha and the Omega Come Together in a Revelation.

Author : Meiliken

Date : 09-05-2013

There is always a beginning and an end. Well, not really, all time is infinite, but it can be segmented into discreet bundles. Moreover, there is one time segment in particular that the Torah, modern mathematics, ancient philosophy, and Biblical history all converge to make extra special.

We turn to the Hebrew alphabet and the Torah's first verse for our first clues. The Greek alpha comes from the Hebrew **Alef (E)** and the Greek omega comes from the Hebrew letter **Tav (T)** so it's fitting that the complete gematria of the letter **Tav** is **400** plus its ordinal value amongst the 22 letters of the Hebrew alphabet, which is **22**, thus together **422**. And **422** is the gematria (numerical value) of the Hebrew word *ShBAYM* "seventy (**70**)."

The beginning and the end come together in the number **70**.

As explained in [The Divine Calendar](#) the discreet bundle of **70 years** is repeated over

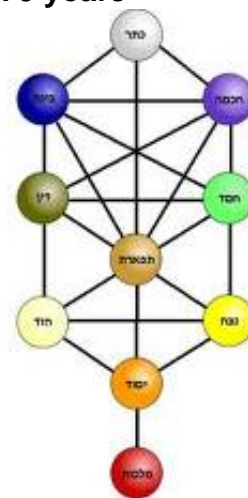

and over again in terms of Biblical history and divine consciousness, whether it's the **70 years** that Adam gave up for King David's life (**70 years**), or the age G-d made his Covenant with Abraham (**70**), or the period of the Babylonian exile (**70 years**) between the Temples, or the year the 2nd Temple was destroyed (**70 CE**), **70** marks very crucial periods in our existence. Thus it should not be such a shock that the First Temple too, which was destroyed in **3338 HC**, corresponds to the year **-422 BCE** in the reflected Western one, or as we just learned **70** (seventy) in gematria. Also as just mentioned, the Second Temple was built **70 years** later and then destroyed in **70 CE**.

David lived **70 years** and enabled his son, young King Solomon, to build the First Temple shortly afterward; The First Temple was destroyed in the year equivalent to **70**; The Second Temple was built **70 years** later at the end of the **70 years** of exile; the Second Temple was destroyed in **70 CE**.

Kabbalistically, **70** is crucial because it represents the full development of the **7 sefirot** (dimensions) with their **10 sub-sefirot** each that are designed to be bundled together as a bridge between the upper (heaven) worlds and ours.

Yet, as explained in [The Genesis Prayer](#) it is mathematics that bundles the **70 years**

together in indelible ways. First of all, the sum of the logarithms from **1** to **70** is exactly 100.0, representing the fullest spread (10^3) of the **10 sefirot** from the beginning all the way to the end. This mimics the spread of Judaism from Abraham (**1**) to the **70** Israelites who entered Egypt in **3** generations. The **3** always represents the **3-column** system of the Tree-of-life, energetically aligned with the **3 Patriarchs**: Abraham, Isaac, and Jacob.

Moreover, the **Natural Log of 70** is **4.248**, the same **4248** as the sum of all the spelled out names of all 22 letters of the Hebrew alphabet, **4248**. That's all of them, from the beginning to the end.

Perhaps, this has to do with why the Zohar talks so extensively about the **70 Nations** and G-d told Moses to create a Sanhedrin of **70 Elders**, and the sages tell us their are 70 faces of the Torah.

To understand this deeper, let's go back to the two letters *Alef* and *Tav*, **ET**, that comprise the 4th word in the Torah's first verse and who represent the coming together of the alpha and the omega. If *Tav* represents the end of the **70 year** period through its complete gematria of **422**, *Alef* represents the beginning, with its numerical value of **1** and its ordinal value also of **1**, together making **2**, as in the first letter of the Torah, the *Bet(B)* of *Bereshit* ("In the beginning")--once again from Beginning to End.

Thus the word (article) **ET**, the 4th word in the Torah has a complete gematria of **424**, which just happens to be that of *Moshiach Ben David* (the Messiah).

"ET go home"

This is the concealed essence to which the **70 year** periods of time are attached: the energy and consciousness of *Moshiach*. When that energy was wasted (squandered), we received destruction; when it was nurtured we received G-d's Revelations.

Now, the **6th** word in the Torah, **V'ET**, has the letter *Vav (V)* added of numerical value **6**, representing the ladder from the upper worlds (heaven) to ours. All together **V'ET** has a numerical value of 407, whose square root is 20.17**424** or numero-graphically the year **2017 CE (5778 HC)** and **424**, *Moshiach Ben David*. Maybe it's just a coincidence that **5778** is the year prophesied by Rav Ashlag, etc for the arrival of *Moshiach* and the final redemption (*geula*)? We'll see...

We've seen how the first two Temples were connected to the **70** year time frame, but as explained in the [The Divine Calendar](#), The Final Temple, *B'H* will be available to us **70** years after Israel became a nation in **1948**, (**5778 HC, 2018 CE**), which is also **1948** after the Second Temple was destroyed, which corresponds to Abraham's birth in **1948 HC**, and G-d's Covenant with Abraham in **2018 CE**.

Now if you recall, during the **3 x 70 years** of the Egyptian exile we went from **70** Israelites who entered Egypt to **600,000** who exited .

And as it just so happens the logarithm for **600,000** as in the **600,000** Israelites at Mt Sinai and the **600,000** component letters in the Torah, is **5.778**

By the mathematical definition of logarithms this means that **10** raised to power of **5.778** is **600,000**, so that there were **$10^{5.778}$** Israelites at Sinai when the Torah of **$10^{5.778}$** component letters was given. Hmm!

The **10 sefirot** raised to the power of **5.778**. It would appear that **5778** is some special limit. Just as **5778 K** is the surface temperature of the sun, just the right temperature for life to flourish on Earth.

Given this new beginning from **70** to **$10^{5.778}$** it's fitting that the prophecies say that 66.6 jubilee years later, G-d's Covenant with Abraham should be fulfilled on the same date it was given in the reflective calendar (**2018 CE**, which is **5778 HC**), and that this falls at the end of the final **70 year** period. In other words in **5778** the **70** sub-dimensions of the **10 sefirot** (dimensions) should be sufficiently rectified to bring us *Moshiach*. B'H

There is a Beginning and there is an End. When this **70 year** period closes in 5 years, will we be able to say the energy of *Moshiach* was squandered or nurtured?

It seems we still have a choice.

Just remember, the gematria of the number **70** (*ShBAYM*) is **422**, the same as *Arik Anpin*, "the vast countenance of G-d
