## The British Played a Critical Role.

**Author :** Meiliken

**Date :** 05-04-2013

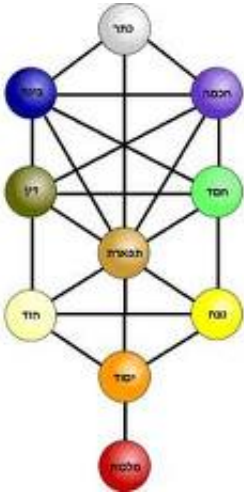

Most readers of our articles are aware of the reflected or mirrored nature of the Hebrew and Western

calendars and the simple [Divine Calendar](#) that exists from Adam until the arrival of *Moshiach* (the Messiah) in **5778 (2018 CE)**. And while Abraham was born in **1948 HC** and Israel became a nation in **1948 CE**, and **70** years later G-d made the [Covenant of Halves](#) with Abraham in **2018 HC** and it is in **2018 CE (5778 HC)** that it has been [prophesied by the tzaddikim](#) to be fulfilled, there is the role of the British that we never discussed. Compared to the Greeks, Romans, Arabs and Ottomans, the time frame that Great Britain ruled over the Holy Land was miniscule, only **30** years, the time period not coincidentally between the end of the 2 World Wars.

[The British Mandate for Palestine](#) began when the British defeated Ottoman Turkish forces in 1917, which was made official on October 30th, **1918** and ended **30** years later at midnight on May 14th, **1948**, when Israel became a nation, which means the British wrestled control of the Holy Lands out of Ottoman hands exactly **100** years before the date given for the fulfillment of G-d's Covenant with the Jews in **2018 CE**.

One Hundred (**100**) in *kabbalah* is universally known as a state of *Keter* (crown) and

represents the full strength of the 10 *sefirot* (dimensions). The 10 *sefirot* that comprise the Tree-of-life are always broken down into the 3 conjoined upper ones and 7 bundled lower ones, or **30 + 70 = 100**.

This relatively tiny **30**-year period encompassed the both World Wars, and the invention of Television, computers, jet engines, and nuclear weapons. It was a time of separation, but it gave way to a changed world, to our current **70**-year period, a world of rapid-fire technology, interconnection and interaction. This final **100** years should give way to the final redemption (the *geula*). The time-line always appears to be created by circumstance, until we step back and examine the big picture. At which point, it appears we had no free will after all; history was designed before it happened.

Like the gold that became the golden calf that had to have been placed in Aaron's hands, if

only briefly, so too the Holy Land had to be placed in the hands of the British. A specific shift in energy was needed to buffer the future from the long length of the past, a tilling of the soil, irrigation, and germination period if you will to change the desert to an oasis. This was on a spiritual level, obviously, because it was never the British intention and the period was marked with much of the worse destruction and senseless slaughter Man has ever known.

And yet, out of Nachor born in 1848 HC, and Terach born in 1878 HC came Abraham in 1948 HC, which is a similar period of **100** years split into two increments of **30** and **70** years, the darkness giving way to the Light. The 18th, 19th, and 20th in line of Adam translating and transitioning to the 18th, 19th, and 20th centuries today.

And when the British handed off this tiny bit of Holy Land in a sea of hostile Arab lands to the Israelites, who was the only nation to stand beside Israel during the final **70** years?

[America, the country who will celebrate its 115th Congress](#) in **5778 (2018 CE)**, just as the the world celebrates the **115th** jubilee year from Adam to *Moshiach* in **5778**.

As the final few years of the **70** whittle down, we can only wonder how fast things will continue to accelerate and what all this interconnection will have brought us. The seeds are already sown. We must ask ourselves: What is growing? What is growing within us?

Shabbat Shalom
