
The Entrance; A Step Forward and Upward.

Author : Meiliken

Date : 03-09-2010

The article picks up our series about Joseph's Pyramid and its connection to the Future Holy Temple, which we left off late last year (2009). In it, we illustrated a possible design connection to the **6** sefirot (dimensions) of *Zeir Anpin* (the spiritual linkage between the upper world and our world as defined by the Tree-of-Life) with the placement of the extra wide **50**-inch masonry band at the pyramid's **35th** level. It split the pyramid neatly into **1/6th** and **5/6th** of its height, which itself is a reference to relationship between the Hebrew letters Vav (**V**) of numerical value **6** and the letter Hei (**H**) of numerical value **5**, the two final letters in the Tetragrammaton (**YHVH**), which, as we've discussed previously, are at the core of both the pyramid and certainly the Holy Temple.

If we apply that same split to the width of the pyramid's base, **330** cubits, we'd have **55** cubits and **275** cubits respectively. And while **275** corresponds to the full value of the **4** expanded aspects of the Tetragrammaton (**YHVH**) from which the holy cubit (**27.5** inches) derives (see previous articles about the holy cubit for details), **275** is also **10** times **27.5**, a reflection of the full **10** sefirot (dimensions) in their completion.

So knowing that the number **55** (twice **27.5**) may play a part in the design structure of Joseph's Pyramid. Let's revisit the secret entrance to the pyramid, which is exactly **55** feet off the ground. First of all, as we recently did with the Washington Monument's base of **55 ft** wide and its capstone of **55 ft** high, let's note the wonderful symmetry of **55** ft being the exact square root of the the pyramid's base perimeter, **3025** feet. Obviously, this was no design fluke, any more than it was with the Washington Monument. Nor was it a fluke that the base of the pyramid's South side, **756.25** feet, is also the exact square of the **27.5** inch cubit, in other words:

Holy cubit = **27.5** inches

Holy cubit x Holy cubit in inches = **(27.5 x 27.5) = 756.25 = Pyramid Base in ft**

And

756.25 x 4 sides = 3025 = Pyramid Perimeter = 55²

And Holy cubit + Holy cubit = **(27.5 + 27.5) = 55**

Or alternatively

55/2 = 27.5.

The secret entrance to the pyramid lies **55** ft straight up the steep highly polished face of the pyramid and was hidden by a massive hinged stone door, seamless and flush to the face. It guarded the secret entrance for thousands of years, and was never actually revealed beyond a

need-to-know basis. This is why in **820 CE**, Caliph Al Mamoun had to blow a hole in the side of the pyramid in order to open it to the world. He found no gold inside, nor even a King's mummified body. Indeed, no artifacts or bodies were ever concealed or found within the great pyramid. All the secrets were locked within its measurements and unlocked by knowing the measure of the Holy Cubit, itself only recently revealed.

Today, with the magnificent multi-ton casing stones stripped away by earthquakes, time, and urban planners who used them to build mosques in Cairo, we can see and metaphysically enter the Pyramid the proper way. What we find first is that on the **19th** level of the masonry, **55 ft** up, and **24 ft** off center from the Pyramid's exact central axis, is the proper gabled entrance to the Pyramid, with the Tetragrammaton (**YHVH**) engraved above it, the true guardian of the secrets. Of course, **55 feet** being exactly equal to **24 cubits** is just another bit of beautiful symmetry incorporated into its design. And this symmetry connects us to the Future Holy Temple, which is the whole reason we're writing about the pyramid and may be the real reason the pyramid was constructed in the first place. In a subsequent article we'll explain the reason that the upper platform of the Future Holy Temple's centrally located Alter measures **24 x 24** cubits and telescopes down to a base of **32 x 32** cubits. For now, let's just note that they are connected. Don't forget, that since **24 cubits = 55 feet**, the upper platform of the centrally located Alter of the Future Holy Temple measures **55 ft x 55 ft**.

Which means that the mysteriously dimensioned Washington Monument of base **55 ft x 55 ft** would fit seamlessly atop the Alter of the Future Holy Temple. We can ask ourselves why? Why does this Egyptian Obelisk at the center core of the US power base connect to the Great Pyramid in Egypt, at the exact center of the world's land mass, and why is it designed to fit snugly atop the Alter at the exact center of the Future Holy Temple, the nexus point connecting our world and the spiritual one.

As we'll explain in future articles the final gate to the Holy of Holies is the Gate of **42**, all the other Gates of the Future Holy Temple being a full **50** cubits in height. But for now, let's just note that **50 cubits = 1375 inches**, and not only does the last 3 lines of the Holy **42**-Letter names of G-d (Ana B'koach) sum (906+230+239) numerically to exactly **1375**, but

The pyramid's base/the Washington Monument base = 756.25/55 ft = 13.75

Alternatively,

the pyramid's base/it's entrance height = 756.25/55 ft = 13.75

And half a cubit = 27.5/2 = 13.75 inches

Briefly, the measure of the **50** cubits is its connection to the **50** gates of Binah, the upper spiritual dimension of Understanding, and should be noted if one wants to use the last three lines of the Ana B'koach as a gateway. This is also an allusion to the **50**-year jubilee period that the Torah commands us to count.

As for the hidden entrance **55 ft** up being on the 19th level of the pyramid is not so surprising to those initiated to its secrets, or entrusted to keep its secrets. As the kabbalists well knew back then **55** is numerically in Hebrew represented by the letters **Nun (50)** and **Hei (5)** and the ordinal value of **Nun (14)** and **Hei (5)** together sum to **19**. Meanwhile, it was also well known that the two Letters **Hei (H)** of the **YHVH** were both gateways and while the lower **Hei(H)**, representing the world of Malchut, maintains its value of **5**, the upper **Hei(H)**, representing Binah rises to the level of 50. Together, they are **55**. The secret to all this is found in Genesis **42:2**, when Jacob tells

his sons to go down to Egypt, and thus begin the **210** years of exile there. I will explain this in another brief article shortly, for now, please just note that the verse begins with the Hebrew word Hineh (**HNH**) containing the 2 gates (**HH**) and the (**NH**).

Given the spiritual importance of Alter of the Future Holy Temple, and of any entrance, it's not so surprising the the pyramid's entrance was hidden **55** feet high, especially with what we know (and will reveal in subsequent articles) about the advanced scientific knowledge programmed into the pyramid's dimensions.

Nevertheless, before we actually enter the pyramid we should ask what the simple connection is between: the pyramid's capstone being **32 ft x 32 ft**; and the Future Temple's Alter being **32 cubits x 32 cubits** at its base; also with the Alter's summit platform being **55 ft x 55 ft**; and the base of the entire pyramid being **55/2 ft x 55/2 ft**; and with the entire pyramid's base perimeter (3025 ft) also being **55 ft x 55 ft**.

Basically what's the deeper, spiritual, connection between **32** and **55**?

It's Kavod, G-d's Glory.

The numerical value of *Kavod* (**KBVD**) is **32** and when you add its ordinal value you get **55**, so both these figures were intertwined into the pyramid's structure to represent the Glory of G-d,. The great Pyramid never stood for some Egyptian Pharaoh, who never occupied the Pyramid. When Al Mamoun blasted his way in and the 3 gigantic granite plugs were remove from the ascending passage, all the chambers were empty--no pharaoh, no retinue, no gold, no hieroglyphics, nor any carvings of any kind, just lots of secret knowledge hidden in the pure numerical dimensions.

That's not to say there was no power there, just none tied to pagan gods of beliefs.

Shabbat Shalom

Ezra
