
The Mystery of the 600,000 letters Solved. The choice: Programmer of Programmee.

Author : Meiliken

Date : 19-11-2008

There has been a great mystery in Kabbalah and Judaic studies for millennium. The *Zohar* and *chazal* clearly state in many places that there are **600,000** letters in the Torah, but just as clearly if you count them, there are only 304,805 actual letters. Many people have posited that they were counting the white fire between the letters, or duplicating the letters by counting their upper world reflections and other theories, but none of these calculations ever came close enough to **600,000** to satisfy anyone, so the mystery persists. Or does it?

The first thing we need to understand is that the letters are already upper world manifestations (black fire) in our world and that their meaning/essence is as hard to actually grasp as is a fleeting inspiration drifting down from *keter* and *chochma*--you may have it one second and lost it the next. But it is essential that grasp and understand the letters as best we can.

But why do we really need to understand the letters when we already understand the words? We can all understand, especially with the guidance of our spiritual rabbis, past and present, the meaning of the words, so why look any deeper to the letters? The answer is the same as with your computer programs. You can email and IM your friends and colleagues and play all sorts of great games on your computer, but unless you know the programming code you can't create programs themselves, and as any kabbalist, spiritual teacher, theologian, and most rabbis and Torah scholars will tell you, our purpose is to be *more like* the Creator, not just his recipient. When you analyze how a program was created, you gain insight into how the programmer thinks, into how his mind works, and so it is with the programming tools of the Torah (which incidentally are mimicked in the technology of all our prayers). These tools are the patterns and algorithms used to create what we call words, verses, paragraphs and the chapters of the Torah. And the building blocks, as Abraham explained to us in the *Sefer Yetzirah*, are the 22 Hebrew letters. He further explained that they should be counted, measured, permuted and studied.

So we can either spend our time sending email to our friends and colleagues, or learn about *who* enabled us with the ability to have friends and colleagues in the first place. Yes, we are supposed to do our spiritual work in this world with those people, but if you have the merit to understand more, you have the obligation to those very people to do so. You must be their channel. You also have the obligation to yourself to be more like the Creator, because the more you understand about how He thinks, the more that gets revealed to you about how the universe really works. You can see the email on your screen, or look deeper and see the world for the illusion that it really is.

Every bit of technology that gets revealed comes with a gift. It comes with additional understanding to be sure, but it also comes with the means to bridge Heaven and Earth, to change your reality, to help people, to improve the world of *tikun*, and for you to do your part in bringing about the arrival of *H'Mashiach*.

The choice is yours--it always has been: To be a programmer or to be programmed.

As we draw within a short few years of the programmed date for the arrival of the messiah and *Mashiach* consciousness, the Lord is fulfilling his promises of revealing all the knowledge to us.

Thus each one of us will have been given the tools to have done his part in bringing about the *geula*, the final redemption. On the flip side, no one will be able to say that they weren't given the opportunity and had chosen accordingly. There will be a great split (schism) accompanying the time of *Mashiach* and there will be two different worlds afterwards. And we'll each be given the opportunity to *prove* which world we belong in, for that is why we were born in this generation.

For that reason, it's time to reveal the **600,000** letters, which we know from *chazal* connect with the **600,000** Jewish souls that received the Torah **66.6** jubilee years ago at Mt Sinai, and for a lack of belief of a mere **6** hours lost the opportunity to know immortality on the heavenly scale. It's said that we all have a letter in the Torah, now we know it is our root to Heaven. It is also our route.

The answer to the riddle of the **600,000** letters is quite simple, which in and of itself explains why it must have been concealed from *chazal* until now. If the 22 plus 5 final Hebrew letters are broken down into their correct **50** composite parts (letters) the answer becomes clear. But first, we should note that when we break down a composite letter into the letter elements that formed it, we're going one step deeper into the mind of the Creator. For example, the *mem* is written (created) by combining a *caf* and a *vav* and placing them in an exact juxtaposed position. We know that *Caf-vav* of numerical value **26** is a direct reference to the Tetragrammaton, (YHVH) and the ordinal value of *Caf-vav* is **17**, that of *tov*, meaning good, so just having this little bit of programming knowledge brings new meaning to every word you see and read containing the letter *mem*.

The next point we need to know is that there being **50** essential letters (composite parts) is no accident. We know from *chazal* that **50** connects to *Binah* (the upper *sefira* of understanding) and that the Torah makes a very distinctive point to tell us to count the jubilee years, each of which is **50** years long.

Once we multiply the 27 letters, individually broken down into **50** parts by the number of times each letter occurs in the Torah, we get a total of 599592 letters, or exactly (**600,000 - 408**) as shown in the chart below:

	Ord Value	# of Letters	Component Letters	Tot'l Letters
alef	1	27059	4	108236
bet	2	16345	3	49035
gimmel	3	2109	2	4218
dalet	4	7032	1	7032
he	5	28056	2	56112

vav	6	30513	1	30513
chet	7	2198	1	2198
zayin	8	7189	2	14378
tet	9	1804	2	3608
yud	10	31531	1	31531
caf	11	8610	1	8610
lamed	12	21570	2	43140
mem	13	14465	2	28930
nun	14	9867	1	9867
samech	15	1833	1	1833
ayin	16	11250	2	22500
pe	17	3975	2	7950
zaddi	18	2927	2	5854
koof	19	4695	2	9390
resh	20	18125	1	18125
Shin	21	15595	3	46785

Tav	22	17950	2	35900
caf sofit	23	3358	1	3358
mem sofit	24	10625	4	42500
nun sofit	25	4259	1	4259
Pe sofit	26	830	2	1660
Zaddi sofit	27	1035	2	2070
	378	304805	50	599592
				600000
				599592
				408

So why not exactly **600,000** letters, which would show us perfection? Because we already know G-d is perfect and what He wants is for us to understand his thought process, the underpinnings of the universe, and then realize how perfect the *universe* is.

So why exactly **408** letters shy of perfection (**600,000**) as we understand it. Since **60%** of the verses in the Torah begin with the letter *vav* of numerical value **6** and all but **6** columns begin with the standard letter *vav* (**6**) and since the letter *vav* represents *Zeir Anpin*, the connection to Heaven, and thus represents the link to the upper *sefirot*, let's see what happens if these **408** letters were all *vavs*, and **408 x 6 = 2448**. And if you recall from *The Divine Calendar* or from your own Biblical studies, **2448** was the year of the Exodus from Egypt and the reception of the Torah at Mt Sinai.

Now, if we've learned any insight into the thought process of *Hashem*, it is that everything has multiple correct meanings and every bit of technology works overtime to delineate multiple story lines for us, multiple opportunities and streams of knowledge for us. One of those streams leads us to the realization that the **50** component letters led us to (**600,000 - 408**) which led us

to $408 \times 6 = 2448$ HC and that in turn leads us to $2448 + 50$ (jubilee year) $\times 66.6 = 5778$, the year prophesied for the arrival of *H'Mashiach*.

The *Zohar* explains this connection to the jubilee year and to **408** in *Toldot* 8:68., in referring to *Vayikra* 25:13, "In the year of this *Yovel*, you shall return every man to his possessions, when this (*h'zot*) shall be finished. The numerical value of *hazot* is **5408**."

According to the *Zohar*, the **6** directions/extremities of Heaven measures **600,000** parasangs, so the **408** could also represent a space, but that's just a thought to ponder. What we do know is that the highest word value in the Torah is the word from *Devarim* 7:3 (shall marry, TChTTN) of numerical value **1500**, but when we use the 5 final letters the highest word value is from *Bamidbar* 16:13 (you shall rule, TShTRR) and it is **1908** and interestingly enough $1908 - 1500 = 408$.

Now, **1908** is not only **110** (the numerical value of *nes*, miracle) years earlier than **2018**, which in the Hebrew calendar was the date of the Covenant of Abraham and in the Western (Gregorian) calendar is the year prophesied for the arrival of *H'Mashiach* (**5778** HC), but $600,000/1908 = 314.465408...$ with **314** being Pi, *Shin-dalet-Yud* (*Shaddai*) and Metatron, the archangel (and a central reference point of *Bereshit*, as per all the revelations in *The Genesis Prayer*. And if we wanted to examine this deeper, we could say that **46** in 314.465408 is *Me'ah*, the measure of the cubit (a whole secret unto itself for later posts) and that **5408** in 314.465408 is **370** years before **5778** and we know from the Arizal how important **370** is in conjunction with the **370** lights of *Arich Anpin*.

As far fetched as this seems, the *Zohar* in *Toldot* 8:68, tells us in explanation of the Bible codes that the word *H'zot* defines the arrival of *Mashiach* and then **40** years later the resurrection of the dead, but I'll expand on that in a separate post and it goes on to explain that the reason for this is that with the He of *h'zot*, the word value becomes **5408**, as in the year **5408**. What they didn't say was that the small gematria of *h'zot* is 5718 and if we add the *cholam* for forgiveness to the *alef*, we get **5778**, the prophesied date for *H'mashiach* and the *geula*.

Meanwhile $600,000/1500 = 400$, signifying *an end* by the value of the letter *Tav* (**400**). And according to *chazal*, in the end of days there will be a period of **8** years in which in *H'Mashiach* will have to pass through in order to achieve the *brit*, covenant in **5778**. *Obviously, this is the same process as the brit milah* for the newborns.

The value **408** is also the value of the word, *Zot* (TzET), meaning "that" in the feminine. According to the *Zohar*, *Zot* is a code word for the Messiah, It also signifies *Malchut*, our world of receiving, which is why when we lift the Torah, we recite *V'Zot H'Torah*, because the **408** (the *malchut*) is not part of the Torah and must be added to it to complete it. Also, by coupling it with *Vav*, representing the **6** *sefirot* of *Zeir Anpin*, it's yet another indication that $6 \times 408 = 2448$, as explained above. Moreover, the numerical value of *Zot* plus *H'Torah* is $408 + 616 = 1024 = 32$ squared, or the **32-Paths of Wisdom (the tree-of-life_ squared**. And we know from R' Chaim Vital of blessed memory that all Torah light is spread by squaring. **The value 1024 is also the total number of different word values in the Torah**, of which **1500** was the highest. It is also **2** raised to the power of **10** (*sefirot*, dimensions).

But since we know from the revelations about the verses of *Vayera*, **Bereshit 2018** and **21:1** made in previous posts and from the revelations in the book *Nothing is Random in the Universe* that there is a split in the time frame from before **2018** to after **2019** is it really a surprise to find out that the square root of **408** is **20.19**...?

And how perfect is it that when we take the complete value of each of the 27 letters (standard plus ordinal and the complete value of the 50 composite letters that make up those 27 letters we get a total valuation for the *alef-bet* of **10386**, which works out to the number of net actual rows

in the Torah (**248** columns x **42** rows less the blank lines) and for the (**600,000 - 408**) composite letters in the Torah that this gives an average of **57.73** letters per line. **600,000/10386** would have given us and even closer date of **57.77**, so maybe that **408** represents a space that we have to fill to overcome the gap between ourselves and *Mashiach* consciousness.

Is it a **fear**, as the word *Chat* (ChT) of numerical value **408** would indicate? Perhaps, to know that we must *all* look inside. The Torah and the letters provide us with the clues and the technology, but *we* must do the work. That is why we were born in this generation. It is a great merit; let's take advantage of it.

And speaking of *Mashiach*, if we take those **10386** full complete values individually and multiply them by the occurrences of their corresponding 27 letters in the Torah and then take their square roots (since R' Chaim Vittal of blessed memory has revealed to us that all Torah light is spread through squaring) the 27 (50) letters' square roots sum to **35797.9359**, which is only a tiny **.005766%** off an exact **35800**, or **358 x 100** (*keter*), with **358** being the value of *Mashiach*. What do we gave to fear?

And regarding the **600,000** Jewish souls at Sinai in **2448**, we know from the Arizal that it was no accident for the Jewish soul root can be traced from the **600,000** to the **70** members of Jacob's family who entered Egypt to his **12** sons to the **3** Patriarchs and back to Adam, and:

One soul divided by (**600000/12/70/3**) = **.0042** or simply **42**, as in the *Shem mem-bet*, at the very root of our soul. And as preposterous as this may seem **1/(600000/12/70/3) = 238.095**, which is the exact the atomic weight of Uranium **238**.

$$1/(600,000/70/12/3) = 238.095$$

and

$$1/238.095 = .0042$$

or simply

42

as in the *Shem Mem-Bet*
