
The power to control water and destiny

Author : Meiliken

Date : 15-11-2008

We recite this verse to begin havdalah at the end of every Shabbat: Genesis **6:8** *V'Nach Mazeh Chen Bayeni Adonai*

As G-d was making his decree on the Earth, he stated the above verse "But Noach found favor in G-d's eyes," which saved humanity, so as you can imagine there are innumerable secrets here. One of the largest is the power of the righteous to control water. I won't explain how for that is reserved for those that understand, but will reveal some of the technology built into the verse.

First of all, please note that the word *chen* in the middle of the verse is *Noach* spelled backwards and as such it's value *sofit* is **708**, that of the upper 42-letters of the Name of G-d, while *Noach* or *chen* without the *sofit* is 58, which is 100 (*keter*) less **42**.

Note further that the full value of the 5 words of the verse is **421** or **10 x 42** plus 1.

Moreover, the **5** final letters of the verse add up to 724 and if we add the *kolel* of 5 we get 729, which is not only $9 \times 9 \times 9$, but the value of the entire second line (KRASHtN) of the *Shem Mem-bet*, the **42**-letter Name of G-d used by the righteous to aid in performing miracles. The 5 first letters of the words in the verse add up to 66, thus the final and first letters together, plus the *kolel* for the 10 letters and for the 5 words is $66 + 724 + 10 + 5 = 805$, which is the value of "The Rainbow," which was G-d's first covenant with the Earth, immediately after the Flood.

It's also not a coincidence that there are 17 letters in this verse, connecting to *Tov* (good). Of that the **4**th word and the **2**nd word begin with *Bet* and *Mem* as in *Mem-Bet* (**42**). Nor is it a coincidence that there are **4** *yuds* (of value 10 each) in the final **2** words of the verse, which connects to healing and to the **4** *yuds* of the **42**-letter Name (*Ana B'koach*).

The final letters of the first 3 words is the same letters as 3 of the sequential central letters (EChN) of the verse, which has the value 709, that of the 7 planets and doubles (BGDCPRT) that controls destiny.

Please note that this verse connects to powerful angels. And that the chapter and verse **6:8** does connect with **68**, the value of *Cha'im*, life, and to the life giving waters that can sustain or destroy us. And this is why there are 3 letter nuns (50×3) and 1 *alef* (1) for a total value of the 4 letters of **151**, that of *Mikve*, in the verse. Or that the rest of the letters add up to 270, that of *RA*, evil, which the ultimate *mikve*, flood waters cleansed away.

So this Havdalah, pause a second as you begin, think about the *Shem Mem-bet* and the favor that Noach found in G-d eyes and ask that all of us find it as well. You can control our destiny.
