
Tohu V'Bohu and the Messiah, H'Mashiach

Author : Meiliken

Date : 02-11-2008

Genesis 1:2 *Tohu v'Bohu*: "The world was *empty and without form*." We know from *Chazal* that this refers to the **10 sefirot** (dimensions) before the interconnectedness of the *sefirot* (in other words, order). *Tohu* represents the **10 sefirot** (vessels) that were shattered, fell, and then scattered throughout our world, the world of *Tikun*, and these became the holy sparks that we must all help to gather in from the **70** nations of the world to bring *Mashiach*. *Bohu* represents the present 3-column schematic of the interconnected dimensions.

The 3 words that express this in the Torah, come after the 8th word (*V'H'ERZ*, "and the Earth") in the Torah, and they represent the final transformed letters of the all-important **42**-Letter Name of G-d connected to Creation and the Messiah.

The first of these three, *H'YTH*, has the value **420** as in **42 x 10** or the **42** Letters in the **10** dimensions (*sefirot*). And if we add the *kolel* (**4**) for the **4** letters of the word, we have **424**, the value for *Mashiach Ben David*. This is significant because the sum total of the *sofit* values of the **33** letters (**8** words) preceding this 9th word, totals **5778**, the year prophesied for the arrival of *H'Mashiach* as is explained below.

From the middle of the 9th word, *Ha'itah* (*HYTH*) to the middle of the **10th** word, *Tohu* (*THV*), we get the numerical value of **820**, which is the value of the all-important (all encompassing) Torah verse for "Love they neighbor as thyself"

Then the six letters including the 3 of *Tohu* (*THV*) and the first 3 of *Bohu* (*VBHV*) add up to **424**, the value for *Mashiach Ben David* again.

While the full phrase *Tohu v'Bohu* has the numerical value of **430** as in the **430** years of exile between the Covenant of Abraham and the Exodus (also the reception of the Torah) as explained in depth in *The Divine Calendar*.

Moreover, the 5 letters between the final *He* of *Ha'itah* through *Tohu* to the *Vav* of *V'Bohu* add up to **422** as in the numerical value of the Hebrew word for **70**, which as explained in *The Divine Calendar* connect to the fall of both Holy Temples in the years **-422 BCE** and **70 CE** respectively and much more, including the **70** years of King David.

And by extention the 6 letters between the final *He* of *Ha'itah* through *Tohu* to the *Bet* of *V'Bohu* add up to **424** as in the numerical value of *Mashiach Ben David* yet again.

On interest to note is that the sum of the *sofit* values for the **33** letters through the **8th** word of the Torah is 5743 and when we add **33** to it for the **33** letters and either the *kolel* of 1 or 2, we get either **5777** or **5778** respectively, the date prophesied for the arrival of *Mashiach*. Now, as discussed at length in *The Genesis Prayer* and as explained in *Nothing is Random in the Universe*, while the entire Torah is encoded and every letter is specifically set these first few words and verses hold tremendous and deep power and meaning. And while the sum of all the letter values in the first verse (7 words) add up to 2701, which just happened to be the sum of all the positive integers through 73, the value of *Chochma* (wisdom, the 2nd highest *sefira*), the total value of all **8** words is **3003**, which happens to be the sum of the positive integers through **77**, the value of the word *Mazal* (fortune/destiny/luck).

To see yet another glimpse of how these words/letters are structured to connect us with the underlying patterns/order we see that the sum of the first letters of the first **8** words, representing

the **28** letters before it is **28** and the sum of the first letters of the first 9 words, representing the **33** letters before it is **33**.
