
Torah Perfection

Author : Meiliken

Date : 17-07-2011

More Torah perfection awaits those that choose to see. Before we

move on to the promised article on "the beast" there was an important bit of Torah knowledge that we neglected to pass on in our last post.

We recently illustrated that the square root of the total number of words, letters and verses in the Torah is exactly **625**, which matched the Regressive (squared) spelling out of the 4 aspects of G-d Name, *YHVH*, which led us to conclude that there was a part of G-d Name at the source of each individual letter, etc in the Torah.

We further illustrated that 625^2 equaled 5^8 and that **.625** is also exactly **5/8**. We then mentioned that in choosing **5778** as the year of the *geula*, G-d must have known that **5778** is only **22** (as in the **22** letters) years shy of **5800** and that it must all play some part together is His grand plan.

What we neglected to mention was that the Torah, as is all Hebrew, is built only **22** letters--building blocks, as Abraham the Patriarch referred to them in his [Sefer Yetzirah](#)--and that each of those those has a specific numerical value corresponding to their spiritual energy. That energy and numerical values is the basis for all gematria and that Kabbalistic studies. And when the sum up the total numerical value of all 304,805 letters in the Torah, we get 33640626, which is precisely 5800.05397^2 , off by only 626 from 5800.000^2 . 626 is obviously **625 + 1** (*Kolel*). As mentioned before, **625** is the gematria value of *H'Keter*, the crowning *sefira* (dimension), above all else.

Man obviously didn't create the Torah. It would have been beyond his capabilities just considering the few facts in this post, which are but a drop in the bucket to all the others we're previously revealed in [The Genesis Prayer](#), the [Divine Calendar](#), [Nothing is Random in the Universe](#), and our hundreds of articles, and these are but a drop in the ocean compared to what's really in the Torah. Nevertheless, if Man didn't create the Torah, who did, and why base it on G-d's Name?

However you answer that, and there can be only one right answer, you must then ask what the meaning is behind the **5-8** relationship? Remember numbers are only reflections of the energy levels an sources they represent. Why was it so important to the Torah's design? What will it mean for us as we quickly approach the prophesied date of **5800 - 22 (5778, 2018 CE)**?
