
What the 10 Sefirot Reveal?

Tonight is the hillula of the Arizal, one of the greatest kabbalists of all time and to whom we owe most of our understanding (even if only on a limited basis) of the Tree-of-life. It is in his merit that we share today new revelations about the Tree-of-life. And as Abulafia said, nothing gets revealed without heavenly permission; everything in its time. As you'll see now is the time. Rabbi Chaim Vital of blessed memory, the Arizal's prized student and redactor, explained that the Tree-of-life was directly connected to the **42**-Letter Name through the **10 sefirot** (dimensions and **32** Paths of Wisdom that interconnect them, but it seemed in conflict with other commentary that described it was **10 sefirot** and **22** linkages for a total of **32**. Nevertheless, what neither he, nor anyone that we know of, has ever written about is that the **42**-Letter Name also connect to the Tree-of-Life through the **42** letters in the **11** Names of the *sefirot* (including the all-important balancing dimension of Da'at, located between Chochma and Binah).

Now, we can't tell you how they interact--anymore than Chaim Vital did over 400 years ago--but we do know, as the sages have told us, that it's the understanding of the **42**-Letter Name that will bring the *geula* (final redemption) and we *can* show you how the **42** letters of the **11** Names in the Tree-of-life mathematically spell out the date for the *geula*, the same date given to us by Rav Yehuda Halevi Ashlag, of blessed memory.

But first let's examine what a little understanding can connect us to. First and foremost we must understand that, as explained by Abraham in his *Sefer Yetzirah*, the Hebrew letters are the building blocks of the universe and that how they recombine determines both the physical and spiritual (energetic) structure of the universe, so they are a lot more than squiggles on a page. Every word and name they form has significant individual meaning with far-flung consequences we can't see nor fathom. And it's only through the translation of gematria and simple mathematics that we get even a glimpse into that deeper meaning and purpose.

The **11** Names of the sefirot that make up the dimensional structure of our greater universe (Keter, Chochma, Binah, Da'at, Chesed, Gevurah, Tiferet, Netzach, Hod, Yesod, and Malchut are spelled in Hebrew:

It's well known from the writings of the Arizal that the initials of these *sefirot* (without the inclusion of Da'at connect to the **5** letters of the name Israel through it's value (**541+5 = 546**), and some people know that the first **4** initials of the upper *sefirot* (Keter, Chochma, Binah, Da'at) add up to **32**, as in the **32** Pathways themselves. But what no one has written about that we know of is that there are 11 sefirot, 22 outer letters in the **11** Names, and 20 inner letters, and that the ordinal value for the letter **C**, **T**, and **R**, spelling Keter (**CTR**) are **11**, **22**, and **20**; therefore, it's through the spelling of these **11** Names that we can eventually connect to Keter, the crowning *sefira*.

And the timing for accessing that crowning level is found within the numerical value of the first and last letters of the **11** sefirot: **1985** plus **32** for the kolel of the **32** Paths equals **2017** (5778). Moreover, the total value of the **42** letters in the **11** sefirot is **3342** and **3342- 11 (kolel) = 3331**. And **3331** years (**66.6** jubilee years) from **2448 HC**, when the Israelites left Egypt and received the **10** Commandments, equals the end of the year **5778** and a new beginning, for it's in the beginning where we found the **42**-Letter Name and the Tree-of-Life.

A similar parallel exists between the structure of the Tree-of-life and **10 plagues** that preceded the last opportunity we had for achieving the Tree-of-life reality.

The **11** initials of the **10** plagues numerically equate to **541**, the numerical value of Israel. The last two initials of the **11** words in the **10** plagues are **M-B**, as in the **Shem MB**, the **42**-Letter Name. And with that, we'll segue into the hidden spear in Washington DC that also points to **2018 (5778 HC)** in our next article.
