# What's Coming From America? The Light is Good.

**Author :** Meiliken

**Date :** 26-12-2008

For a long time most of the world has envied America. For a long time most of the world emulated America. For a long time most of the world took advantage of America. Most of the world hates America.

To cause so much of a reaction, there must be a lot of Light in America. That's a spiritual law. But you can't see Light unless it's encased in darkness. That's also a physical law.

## **America and the Tetragrammaton, G-d's ineffable Name, YHVH**

Just **232** years ago, America created a revolution and a government of, by and for the people, a truly revolutionary concept. It's fitting that **232** is the total value of the full four aspects of the Tetragrammaton (*YHVH, Av, Sag, Mah, and Ban*)

*Av* (YVD HY VYV HY) is composed of *Ayin* (70) - *Bet* (2)

*Sag* (YVD HY VEV HY) is composed of *Samech* (60) - Gimmel (3)

*Mah* (YVD HE VEV HE) is composed of **Mem** (40) - Hey (5)

*Ban* (TYD HH VV HH) is composed of **Bet** (2) - Nun (50)

The two lower aspects *Mah* and *Ban* represents the union of *Zeir Anpin* (the 6 *sefirot*/dimensions of Heaven) and *Malchut* (our world), and thus aptly the 7 lines (*sefirot*) of *Shem Mem-Bet*, the 42-Letter Name, named thusly because the letters **Mem** (40) and **Bet** (2) = **42** in *Gematria*, the ancient science of letter valuation based on energy inherent in the Hebrew letters as first explained to us by Abraham, the Patriarch in his Book of Formation, the *Sefer Yetzirah*.

Meanwhile, the first letters of **Av-Sag** (*Ayin-Samech*), the two upper aspects, add up to **130**, the numerical value of the two synonymous words and thus concepts of Sinai and *Sulam* (ladder) thought by the sages to originate from the center of the *Shem Mem-bet*. You must bear in mind that the 42-Letter name, while arranged 2-dimensionally in our world as a 6-letter by 7 line matrix, is really a multi-dimensional one in the upper worlds.

The combined numerical value of the representative letters (*Ayin-Samech-Mem-Bet*) is **70+60+40+2 = 172** and when we add 1 for the *kolel*, we get **173**, as in **173** keys that the *Zohar*, the *Book of Splendor* written by *Rabbi Shimon Bar Yochai* around 130 CE, tells us were given to Moses, which is just a figurative way of saying he was given the secrets of the 42-Letter Name (the *Ana B'Koach*), which has the small gematria value of **173**.

The remaining letters (*Bet-Gimmel-Hey-Nun*) have a total numerical value of **(2+3+5+50) = 60**, the value of *Samech*, the letter hidden within the center of the *Shem mem-bet*, and **the number of years of Israel's existence as a nation when the USA reached 232 years of age (in 2008 CE)**.

And interestingly enough, if we use the squaring principles of the Arizal and Rabbi Chaim Vital of blessed memory, the four aspects of the Tetragrammaton sum up to **5742**, and then if we add **26** for the original Tetragrammaton they emanated from, as the Arizal was apt to do, we get 5768 or **2008 CE**.

Alternatively, when we add up the spelled out *gematria sofit* values of *Ayin-Samech-Mem-Bet* and include the *kolel* of 16 for the 4 YHVH, we get **2448**, as in **2448** HC, the year the Torah was given at Mt Sinai, **2320** years (or **232 x 10** sefirot) earlier.

---

Then when we add up the spelled out *gematria sofit* values of *Ayin-Samech-Mem-Bet* together with their second letters *Bet-Gimmel-Hey-Nun* and the *kolal* for the number of letters in their spelled out names and also in the 39 letters of the **4** aspects of the Tetragrammaton, we get **3760 HC (0-1 CE)**.

Now, the reason it's said the letter *Samech* is hidden within the center of the **42**-Letter name (*Ana B'Koach*) is that the value of the **21** letters through the midpoint of the **42** Letters add up to **1833** and there are **1833** *samechs* in the entire Torah.

**But here is a deep secret:** The value of the Tetragrammaton (YHVH) is **26**, which in Hebrew is *Caf-vav* (CV) and when we spell out Caf-vav for **3** iterations, we get (C+V) +(CP + VYV) +((CP +PE) + (VYV+YVD+VYV)) or (20 + 6) +(820 + 22) + (901 + 64) = **1833**, so in the center of the **42**-Letter Name is the ladder (*sulam*) to the YHVH, as has been told to us by *chazal*.

### **Let there be Light**

In the **3rd** verse in the Torah, G-d said "Let there be Light." and the numerical value of that verse is **1729**, which is significant because there are exactly **1729** words of numerical value **26**, corresponding to the value of the Tetragrammaton, YHVH.

We have proven time and again that the Torah could not have been written by man, 3330 years ago, or even today--it's just too mathematically intricate. And contrary to popular secular belief the Torah was not written by several authors over hundreds of years. It was produced and given to us instantaneously, complete in all its glory, which is why the moment the thought of Light entered the Torah, there were **1729** instances of it's reflection throughout the 5 Books.

So after establishing the Light throughout the Torah, in the next verse, G-d establishes that Light is good, but also sets up a destiny that would happen 5536 years later, in the **111th** jubilee year (Biblical 50-year period). We mention this because **111** is the numerical value of *Alef*, the first Hebrew letter, representing a beginning. And a very fitting one, since this destiny was hinted at in the **4th** verse of the Torah and using the prophesied date of **5778** for the *geula* and coming of *Moshiach*, He would arrive in the **4th** jubilee year after the **111th**.

### **It's in the Alefs (the Ones)**

Now, there are 6 letter *alefs* in the Torah's first verse, which correspond to the 6 *elufim* (6 thousand years universally understood by religious Torah scholars) until the arrival of the *Mashiach*, which in actuality is **222**, or **111 x 2**, years less in the year **5778**, and since **111** is the value of the letter *alef*, those **222** years are really **2** *alefs*. It is also the sum of the first 3 letters (*BRE*) in the Torah along with the primordial *alef*, **221 +1 = 222**.

### **So what was that destiny hinted at in the 4th Verse?**

**Genesis 1:4. "God saw that the Light was good, and God divided between the Light and the darkness."**

America was founded in **1776**, a number that is one more than **1775**, the total sum of the **27** letters in the Hebrew alphabet (the *alef-bet* including the 5 final letters), but perhaps more significantly **1776** is the total value of the **4th** verse in the Torah (Bible).

### **It's in the 4's**

OK, the **4th** verse of the Bible connects to America and to Light, the **4** letters in the Tetragrammaton (YHVH), and to the **4** aspects of the full Tetragrammaton (YHVH), which are connected to pure Light and just maybe to America in **2008**, when the darkness first descended

---

upon it and as the 4th exile comes to a close, 4 jubilee years later. So isn't it fitting that the 4th word in this verse is the 4 letter word, *H'OR*, "**The Light**," that has been mentioned 4 times up to and including this 4th verse in the Bible?

Coincidence, right? Is it coincidence too that  $1776 = 4 \times 444$ .

And how many letters were in the 4 YHVH from above? **16**. And how many *alefs* (**111**) in **1776**? **16**

Now let's forget for a moment that the two times that "the light" is mentioned in *this* verse has the numerical value of  $2 \times 212 = 424$ , which is that of *Mashiach Ben David*, and let's move on to examining this significant verse a little closer.

Just about everybody knows that "the light is good," which in Hebrew is "*H'OR Ci Tov*" (HEVR CY TtVB), and the sum of the words "The Light is (H'Or Ci)" is **242**, which is the age the USA will be in the year **2018 (5778 HC)**, the year *chazal* has prophesied for the coming of the *Mashiach* (Messiah) and the final redemption (See *The Divine Calendar* for details), but setting that aside for now, the sum of the first letters of the words in the verse through the word *Tov* (good) is **42**, as in the **42**-Letter Name that we know from *chazal* will help bring about the *Geula*, final redemption, and/or the "end of days" as it is known.

And while **242** can be looked at as the 4 aspects of the Tetragrammaton, **232**, plus the **10 sefirot**, alternatively, if we add the numerical value of *Mashiach Ben David*, **424**, to the age of the US in **2018 (5778 HC)**, we get  $424 + 242 = 666$ , the number *chazal* used to calculate the arrival of *Mashiach Ben David* in **5778**. So how odd is it that **242** years is **4.2%** of the **5778** years from Adam to the prophesied arrival of *Moshiach*?

If you ask why **666**, considering all the negative Christian connotations? Remember, the backbone of the Torah is the **6 sefirot** of *Zeir Anpin*, which is why all but **6** columns begin with the letter *vav* of value (**6**) and **60%** of all verses start with *vav* (**6**), but as the Arizal explains **666** is really just **2/3** and in a very simplistic reduction of the Arizal's explanations, **2/3** of the way through the **6 sefirot** of *Zeir Anpin* is where the emotional world meets the intellectual one (the head of Rachel connecting to heels of Leah **2/3** up into *Tiferet*).

**But back to the Light is Good.**

We also know from *chazal*, the righteous sages of blessed memory, that the final letters in a Biblical phrase point to the future and the final letters in "*H'OR Ci Tov*" (HEVR CY TtVB) add up numerically to  $200+10+2 = 212$ , the numerical value of "The Light" once again. The Torah often does that, utilize overkill and redundancy, when it wants to make sure we get the message loud and clear. In this case it is that: "**THE LIGHT IS GOOD.**"

**The Chanukah connection to Light**

We discussed in our post regarding Chanukah about its lengthy associations with bringing *Mashiach*, and the first letters of the phrase "the light is good," which in Hebrew is "*H'OR Ci Tov*" (HEVR CY TtVB), also hints at Chanukah. As the first two letters **Hey** and **Caf** are the last letter of the word **Chanukah** and have the numerical value **25**, as in the **25th** of Kislev, the first day of

---

Chanukah each year. And the letter *tet*, has the value **9** as in the **9** candles of the Menorah (*Chanukiya*). This would probably be nothing more than a coincidence if the phrase wasn't about light and in the verse first verse of the Torah discussing light and if the holiday of Chanukah wasn't all about lighting candles.

### It's also about the 42-Letter Name.

The **42-Letter Name** has been utilized and concealed by the sages throughout the Mid-East and Europe for thousands of years, but its powers are only now being revealed for all to benefit from, and they are being revealed in America through web sites and blogs and books like *The Genesis Prayer*. So the fact that it is numerically linked to the birth date of the US should be no surprise.

And so there is a curious equation derived from cubing the digits in the year of America's birth, **1776**, which is that  $1^3 + 7^3 + 7^3 + 6^3 = 903$ , and **903** is the sum of all the integers from 1-**42**, which because in spirituality nothing is ever lost, **903** is the collective consciousness of **42**. It is in the same way that the value of the first verse in the Torah, **2701** is the sum of all the integers from 1-**73**, which is thus the collective consciousness of **73**, the numerical value of *Chochma* (Wisdom/crown). And likewise, the same holds for the first **8** words of the Torah equally 3003, or the sum of all the positive integers through **77**, *Mazal* (fortune), so this is obviously more than a coincidence. **It is a plan.**

It's also very odd that **2701 - 903 = 1776 + 22**, as in the **22** letters of the *alef-bet*, tying the Torah's 1st and 4th verses together in an odd way.

Light or "the Light" is mentioned only **7** times in the Torah and the total gematria value of those **7** mentions is **1701**, which must be meaningful, because the total gematria value of the Torah's first verse is **2701**, and the total gematria value of the **42-letter Name** is **3701**, each increments of **1000**, which in Hebrew is *elef*, the same word as *alef*, the primordial letter that preceded the Torah, whose component value is **32**, as in the ordinal value of the word *H'Or* (the light) and as in the **32** paths of Wisdom that is the tree-of-life.

So given these odd connections, let's contemplate this next mathematical link between the 1st and 4th verses: **73 - 42 = 31**, which corresponds to the value of *El* (G-d, **31**) and to the **31** verses of the Torah's first chapter. And then there is the equation **2701 - 903 = (1776 +22) = 1798** and **1798/31 = 58 = (100-42)**.

Which brings us back to Chanukah, whose first two letters spell Noach, of numerical value **58**, and whose last 3 have the numerical value of **31**. Now **58** is the numerical value of Noach (Noah) and the Biblical word for flood is *Mbul*, which begins with *Mem-bet* (**42**), but there is an interesting secret embedded in the Torah's first reading, *Bereshit*.

As each column of the Torah scroll has **42** lines, the first chapter of **31** verses is written in **57** lines and the next two readings, which ends with Genesis 3:21 where the Lord banishes Man from the Tree-of-life, cover a total of **78** lines, which not only makes **57** and **78** written lines, but

---

between them there are a total of **77** verses, aptly spelling out **5778**, from Creation through the banishment from the Tree-of-Life reality.

But back to America's birth and its connections to the *Mashiach* and thus the end of days. Did you notice that **5778-1776 = 4002**, which is both graphically **42** and numerically **40** (x10 *sefirot*) **+ 2 = 42**, *mem-bet*?

And then there are the factors of **1776 = 37\*12\*4**, which is all very interesting because there are **12** words in the **4<sup>th</sup>** verse and it loosely connects us to Genesis (*Bereshit*) chapter **37** in Torah portion Vayeshev, the **9<sup>th</sup>** one in the Torah and the **73<sup>rd</sup>** paragraph in it. Not by coincidence **73** is the numerical value of *Chochma*, (wisdom) the **9<sup>th</sup>** or second highest *sefira*/dimension, and the inner light, or ordinal value, of the letters in *Chochma* (ChCMH) is **37**.

In Vayeshev, Joseph (The Light) and one of Jacob's **12** sons has the dream alluding to them final redemption and is sold to the Israelites (the Arabs and/or Persians) partially because of it. First they wanted to kill Joseph (the Light) then they sold him, then he was brought down to Egypt (*Mizra'im*), known as "the darkness," where he shined, faded, and kept hope alive for **210** years until the **2448**, when the Torah was given. We learn right away in Chapter **37** that Joseph was **17** years old when he had his dream of *Mashiach* and the end of days, and **17** is the value of *tov* (good), bringing us back to verse Genesis 1:4 and the Light is good,"and if we count backwards **17** years from the final year **2018**, we get **2001**, as in **9/11 2001** when the bubble first burst on our illusions and the countdown to the final days began. And again, where did this happen? To better understand the process of these last **17** years for America and the world please see our post titled "Separation." As we head into the darker days, this serves to remind us that the final outcome for those that believe in the Light is *tov* (good).

We could go on and on, but suffice to say, there are reasons for everything, even for the darkness, and candles of light that were lit 5768 years ago will glow ever more intense the darker it gets. The candles were lit for America, the country that for all its many faults, was created in, and for the most part lived by, the premises of freedom. And thanks to America, people throughout the world have the freedom to choose the light. For all their hatred of America, if it were not for America most of the world would live under oppressive dictatorships, modern day Egyptian Pharaohs, and not know freedom at all.

Now, it's up to each of us in these ever darker times to remember to light our own candles and that "The Light is Good."
